

# MASTER OF ENGINEERING, PLAN C, COMPUTER ENGINEERING SPECIALIZATION

---

From self-driving cars to smart cities, we live in a hyper-connected world. As the smart thinkers behind today's smart devices and systems, computer engineers hold the key to understanding, advancing, and protecting the security of next generation technologies and data networks.

The Master of Engineering, Plan C, Computer Engineering Specialization produces professionals with broad engineering backgrounds who are capable of applying in-depth knowledge and creativity to drive innovation in virtually any field. Students have flexibility to develop a plan of study in their area of interest. Students interested in graduate work should refer to CSU's Graduate and Professional Bulletin (<http://catalog.colostate.edu/general-catalog/graduate-bulletin/>) and the Electrical and Computer Engineering Department (<http://www.engr.colostate.edu/ece/>) website.
