Major in Family and Consumer Sciences, Family and Consumer Sciences Concentration

The Family and Consumer Sciences concentration provides students with a focus on consumer and family well-being, growth and development of family members, and the relationship of households to their environment. The concentration is interdisciplinary, bringing together courses in human development, family studies, nutrition and foods, consumer sciences, apparel and textiles, and design and merchandising.

It is highly recommended that students participate in internships, volunteer activities, or cooperative extension opportunities to enhance their experiences and development. Graduates who seek advanced degrees attain higher level professional positions.

The concentration includes All-University Core Curriculum courses, subject matter courses, and elective courses to enhance personal and professional development.

Requirements Effective Spring 2012
