

MAJOR IN SOCIOLOGY, ENVIRONMENTAL SOCIOLOGY CONCENTRATION

Environmental sociology teaches you how to address contemporary issues and why that matters at multiple scales – from individuals, to communities, to nations. Our students develop tools to better understand the sources of and create systems-based solutions to vital social and environmental problems. Our faculty teach courses that address issues like environmental inequalities, natural resource conservation, and food justice. Moreover, our undergraduate program provides students with a strong theoretical foundation in sociology, research methods, data collection, and analysis. These are all essential skills for a wide variety of careers associated with environment, natural resources, policy, justice, or advocacy—as well as strong preparation for graduate or law school. Our unique mentoring program models how to transfer students' sociological skill sets to meaningful employment after graduation. We can't wait to guide you through a life-changing major!
