

MAJOR IN FOREST AND RANGELAND STEWARDSHIP, FOREST BIOLOGY CONCENTRATION

The Forest Biology concentration in the Forest and Rangeland Stewardship major provides forestry education that spans the entire range of experiences necessary to understand and manage forests. Curricula include a background in the biological, physical, social, and management sciences, followed by professional forestry courses. The curriculum also focuses on forest biology, forest ecology, natural resource management, and the physical sciences. More specifically, this concentration is intended for students interested in forest ecology and tree biology and it prepares students for graduate studies in forest biological sciences and eventual careers in teaching or research.
