Warner College of Natural Resources

Office in Natural Resources Building, Room 101
(970) 491-6675
warnercnr.colostate.edu (http://warnercnr.colostate.edu)

Professor John Hayes, Dean

Undergraduate Majors
- Ecosystem Science and Sustainability
- Fire and Emergency Services Administration
- Fish, Wildlife, and Conservation Biology
- Forestry
- Geology
- Human Dimensions of Natural Resources
- Natural Resource Recreation and Tourism
- Natural Resources Management
- Rangeland Ecology
- Watershed Science

Undergraduate Minors
- Ecological Restoration
- Fishery Biology
- Forestry
- Geology
- Range Ecology
- Spatial Information Management
- Watershed Science
- Interdisciplinary Minor in Conservation Biology

Master Programs
- Master of Fish, Wildlife, and Conservation Biology, Plan C, (M.F.W.C.B.)
- Master of Greenhouse Gas Management and Accounting, Plan C, (M.G.M.A.)
- Master of Natural Resources Stewardship, Plan C, Ecological Restoration Specialization
- Master of Natural Resources Stewardship, Plan C, Forest Sciences Specialization
- Master of Natural Resources Stewardship, Plan C, Rangeland Ecosystems Specialization
- Master of Natural Resources Stewardship, Plan C, Sustainable Military Lands Management Specialization
- Master of Science in Conservation Leadership, Plan A
- Master of Science in Conservation Leadership, Plan B
- Master of Science in Human Dimensions of Natural Resources, Plan A
- Master of Tourism Management, Plan C

Ph.D.
- Ph.D. in Earth Sciences
- Ph.D. in Earth Sciences, Geosciences Specialization
- Ph.D. in Earth Sciences, Watershed Science Specialization

The College offers studies and professional training in the management, administration, and scientific investigation of renewable and nonrenewable natural resources. Programs include the study of every component of natural systems with particular emphasis on fish, forests, minerals, range, watershed, wildlife, and outdoor recreation areas.

The Natural Resource Ecology Laboratory, housed in the College, is devoted to research and training in ecosystem science and management.

The College also houses the Center for Environmental Management of Military Lands which is a team of environmental professionals experienced in the conservation and sustainable management of natural and cultural resources on Department of Defense lands.

College Programs

Undergraduate Majors
The scope of the College's programs is more broadly based than most natural resources schools. There are nine undergraduate curricula, most with specialized concentrations or designated areas of further study. Undergraduate majors in all five departments lead to the Bachelor of Science degree, which requires a minimum of 120 credits. A minimum of 42 credits in upper division courses is required for all majors.

Field Training Programs
Most undergraduate majors require the completion of a four-week summer field training program (five credits) before their junior year. Summer field instruction is given at the CSU Mountain Campus (http://www.colostate.edu/features/pingree-park.aspx) campus, 55 miles west of Fort Collins. Permanent quarters and meals are provided.

During interim or summer periods, some majors devote several weeks to advanced field training programs off campus. Students taking advanced ROTC should arrange their schedules with their advisors in their junior year to avoid conflicts during senior spring semester. It is recommended for all majors, and required for some, that students have a minimum of one summer of field experience before graduation.

International Education
International resources management is an increasingly important concern of the Warner College of Natural Resources. It is desirable that students in the College have opportunities to study abroad, just as students from abroad are encouraged to study here. CSU has agreements covering study abroad opportunities with institutions throughout the world. Students may complete one or two semesters of resources management education abroad. Students interested in studying abroad should plan far in advance by discussing
opportunities with their academic advisor and by visiting the Office of International Programs (http://international.colostate.edu) in Laurel Hall.

**Graduate Programs**
Master of Science and Doctor of Philosophy degree programs are offered in most departments. A program leading to the professional degree, Master of Natural Resources Stewardship, is offered in the Department of Forest and Rangeland Stewardship. The Department of Fish, Wildlife, and Conservation Biology also offers a professional degree, Master of Fish, Wildlife, and Conservation Biology. Descriptions of the various graduate programs may be found in the Graduate and Professional Bulletin or on the departmental websites.

**Admissions Information**
Contact: Ethan Billingsley, Director of Undergraduate Programs
(970) 491-4994
ethan.billingsley@colostate.edu

**For High School Graduates**
High school students are advised to take all the English, science, and mathematics courses possible to prepare for college-level work in natural resources.

**Limitation on Transfer of Credits**
Students planning to attend another college or community college prior to enrolling at CSU should follow the freshman program for their chosen major as closely as possible. To assure that they have the opportunity to complete all degree requirements in four years, they should plan to transfer to CSU no later than the beginning of their junior year. Credits which transfer but are not equivalent to specific curriculum requirements may be used as elective credits.

**Transfer Students**
Students are required to choose a major when enrolling. Transfer students, therefore, should follow the departmental curriculum closely. Check the individual major and concentration for specific courses.
