A minor in Environmental Health will benefit students majoring in a variety of biosciences who are interested in career options in public health, private sector environmental health and safety, sustainability, or graduate school.

### Requirements

#### Effective Fall 2017

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.
