Mechanical engineers are creative problem solvers who design, develop, and manufacture the machines and instrumentation that run energy, building, environmental, and transportation systems. Examples include biomedical devices, ground/air/space vehicles, robots, environmental control equipment, and power plants.

In Mechanical Engineering, students take basic science and mathematics courses while beginning their engineering studies in design and computing. A broad spectrum of classes is designed to sharpen problem-solving skills. The senior year focuses on a year-long capstone design course to help students in the transition from college to an engineering career. Students also choose technical electives from the energy, materials, mechanics and controls, thermal sciences, and biomedical engineering areas. Participation in labs further develops design, modeling, and analysis skills.

Mechanical Engineering at CSU is dedicated to graduating ethical mechanical engineers who:

- Make an impact on society’s global grand engineering challenges
- Are innovative and creative engineering designers who identify, analyze, and solve complex problems
- Are accomplished thinkers with hands-on practical skills
- Are local, regional, and global collaborators and communicators
- Are vested in life-long learning

Student Outcomes

Graduates of the undergraduate Mechanical Engineering program will have:

- An ability to apply knowledge of mathematics, science, and engineering
- An ability to design and conduct experiments, as well as to analyze and interpret data
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- An ability to function on multidisciplinary teams
- An ability to identify, formulate, and solve engineering problems
- An understanding of professional and ethical responsibility
- An ability to communicate effectively
- The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- A recognition of the need for, and an ability to engage in life-long learning
- A knowledge of contemporary issues
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Potential Occupations

Graduates from the Department of Mechanical Engineering are expected to have the fundamental knowledge required for the successful practice of mechanical engineering. CSU engineering graduates are generally well prepared for a professional career with a greater than 90% pass rate on the Fundamentals of Engineering professional examination. Participating in internships, volunteer activities, or cooperative education opportunities is highly recommended to enhance practical training and development.
Students who go on for graduate studies can attain more responsible positions with the possibility of rising to top professional levels.

Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Attendance at the required workshops may be spread over the student’s four-year program.

School of Biomedical Engineering

Scott Bioengineering Building, Suite 225
engr.colostate.edu/sbme (http://www.engr.colostate.edu/sbme)
(970) 491-7157

Professor Stuart Tobet, Director
Professor Kevin Lear, Associate Director; and Director, Undergraduate Programs

The School of Biomedical Engineering (SBME) is supported by four CSU colleges and more than 40 faculty members in over 10 departments, providing students with broad expertise, active researchers, and excellent instructors. At the graduate level, SBME offers a Master of Science and a Doctor of Philosophy in Bioengineering, and a Master of Engineering (online and on campus) with a specialization in Biomedical Engineering. See the Graduate and Professional Bulletin for graduate program listings. The College of Engineering offers undergraduate programs leading to a Bachelor of Science in Biomedical Engineering and a Bachelor of Science in Chemical & Biological Engineering, a Bachelor of Science in Biomedical Engineering and a Bachelor of Science in Electrical Engineering, and a Bachelor of Science in Biomedical Engineering and a Bachelor of Science in Mechanical Engineering, as well as an undergraduate minor.

See University-Wide Instructional Programs for the interdisciplinary minor.

Biomedical engineering lies at the interface of engineering, biology, and medicine. The SBME provides extensive opportunities for research, ranging from investigating new therapies and imaging modalities for fighting cancer or cardiovascular illness, to examining organ development or function, creating devices to diagnose devastating diseases, to developing the next generation of gene therapies and engineered tissues. CSU is positioned to offer unique bioengineering degree programs due to our faculty expertise, the interdisciplinary nature of the SBME, and the highly-ranked College of Veterinary Medicine and Biomedical Sciences, providing a rich environment for interdisciplinary research and day-to-day collaborations. Our biomedical engineering programs integrate biological, chemical, physical, and mathematical sciences with engineering principles and clinical studies and our graduates are well prepared for careers in research, education, veterinary or human medicine, and industry.

Biomedical engineers are involved in a wide variety of activities on a daily basis. Practical applications of biomedical engineering include doing development, design, production, research, or teaching in areas such as:

• Designing biomedical materials and/or medical devices and equipment (e.g., pacemakers, bio-compatible wheelchairs, exercise equipment for astronauts, or creating/improving materials to help joint replacements last longer)
• Developing or improving therapies for fighting cancer, tuberculosis, or other illnesses and diseases (e.g., nanoscaffolding for localized chemotherapy delivery, telemetric sensors to determine healing rates in bone fractures or to detect key chemicals in live tissue with high temporal and spatial resolution)
• Finding better ways to image and/or diagnose illnesses (e.g., using lasers to detect viruses, developing ways to increase electrical signals to detect threats to food safety and security, designing a biosensor to diagnose cancer cells, or developing software to determine toxicity levels in people exposed to pesticides)

Potential Occupations

Biomedical engineering applies engineering principles to medicine and improving quality of life for humans and animals. Biomedical engineers work in a variety of settings. Some biomedical engineers spend their days in the lab, researching new devices and systems that solve medical and health care-related problems. Others might work in clinical settings, run biomedical-focused enterprises, design new therapies or diagnostics, assist medical facilities with engineering systems, or engage in regulatory affairs or patent law. Our graduates are well prepared for careers in research, education, veterinary or industry.

Undergraduate

Undergraduate Bachelor of Science Programs in Biomedical Engineering

The Bachelor of Science program in Biomedical Engineering has four pathways, corresponding to four rigorous traditional coursework plans that provide depth and support the breadth of biomedical knowledge and applications. The coursework in these four pathways is designed not only to support biomedical engineering but also to satisfy the curricular requirements of one of four traditional engineering degrees as administered by partner engineering departments.

The four curricular pathways for the BME B.S. degree are:
• B.S. degree in Biomedical Engineering combined with a B.S. degree in Chemical and Biological Engineering
• B.S. degree in Biomedical Engineering combined with a B.S. degree in Electrical Engineering, Electrical Engineering Concentration
• B.S. degree in Biomedical Engineering combined with a B.S. degree in Electrical Engineering, Laser and Optical Concentration
• B.S. degree in Biomedical Engineering combined with a B.S. degree in Mechanical Engineering

The BME program requires 157 or 158 credit hours of coursework, depending on the selected pathway, nominally distributed over five years. In the first year, students take BIOM 101 as well as foundational math and science courses. Through the second and third years, they gain a foundation in the traditional engineering major as well as life and physical sciences courses needed for biomedical engineering. The following years allow students to build a more thorough understanding of biomedical engineering, and their studies will culminate in a Senior Design project in the fifth year that will provide hands-on experience with an interdisciplinary team of peers. This combination of practical application and traditional academic rigor complement the breadth and depth of this fairly unique program, and provides excellent preparation and market value for graduates’ next steps in industry, academia, or research.

With the first BME graduates in Spring 2015, the BME program became eligible to apply for ABET (http://www.abet.org) accreditation, a process that spans two years. SBME has been visited by evaluators and submitted all documentation and is awaiting a decision in late summer 2016. If accreditation is granted, it will be retroactive for earlier graduates of the program. Please visit www.egr.colostate.edu/sbme/accreditation.html (http://www.egr.colostate.edu/sbme/accreditation.html) to learn the current status of accreditation for the BME program. The educational objectives of the biomedical engineering program are to prepare our students to:

• Demonstrate high professional, social, and ethical standards while examining and addressing the global impact of technology to improve quality of life in our society and environment
• Apply broad and deep knowledge, practical experiences, and creativity to solving problems at the interface of engineering and the life sciences as individuals and team members
• Use their multidisciplinary background to foster communication and collaboration across professional and disciplinary boundaries
• Recognize and expand the scope of their knowledge, continue self-directed learning, and identify and create professional opportunities for themselves and others.

Graduates in Biomedical Engineering will have an ability to:

• Apply knowledge of mathematics, science, and engineering.
• Design and conduct experiments, as well as to analyze and interpret data.
• Design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
• Function on multidisciplinary teams.
• Identify, formulate, and solve engineering problems.
• Understand professional and ethical responsibility.
• Communicate effectively.
• Understand the impact of engineering solutions in a global, economic, environmental, and societal context.
• Recognize the need for, and ability to, engage in life-long learning.
• Gain knowledge of contemporary issues.
• Use the techniques, skills, and modern engineering tools necessary for engineering practice.
• Apply principles of engineering, biology, human physiology, chemistry, calculus-based physics, mathematics (through differential equations), and statistics.
• Solve biomedical engineering problems, including those associated with the interaction between living and non-living systems.
• Analyze, model, design and realize biomedical engineering devices, systems, components, or processes.
• Make measurements on and interpret data from on living systems.

BME Bachelor of Science Programs

• Biomedical Engineering and Chemical and Biological Engineering
• Biomedical Engineering and Electrical Engineering, Electrical Engineering Concentration
• Biomedical Engineering and Electrical Engineering, Lasers and Optical Engineering Concentration
• Biomedical Engineering and Mechanical Engineering

Master Program

Master of Engineering, Plan C, Biomedical Engineering Specialization

Courses

Biomedical Engineering (BIOM)

BIOM 101  Introduction to Biomedical Engineering  Credits: 3 (3-0-0)
Course Description: Basic principles, fundamentals in biomedical engineering including molecular, cellular and physiological principles, major areas such as biomechanics.
Prerequisite: None.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.
BIOM 300  Problem-Based Learning Biomedical Engr Lab  Credits: 4 (1-4-1)
Course Description: Group problem-based learning approach to problems spanning all core areas of biomedical engineering.
Prerequisite: (BIOM 101) and (MATH 340 or MATH 345).
Registration Information: Must register for lecture, lab, and recitation.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: Yes.

BIOM 306  Bioprocess Engineering  Credits: 4 (3-2-0)
Also Offered As: BTEC 306.
Course Description: Material, energy balances; fluid flow, heat exchange, mass transfer; application to operations in food, fermentation, other bioprocess industries.
Prerequisite: (CHEM 107 or CHEM 111) and (PH 121 or PH 141).
Registration Information: Must register for lecture and laboratory. Credit not allowed for both BIOM 306 and BTEC 306.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 421  Transport Phenomena in Biomedical Engineering  Credits: 3 (3-0-0)
Course Description: Engineering models of active and passive mechanisms of momentum. Heat and mass transport in mammalian cells, tissues, and organ systems.
Prerequisite: (BMS 300) and (CBE 332 or MECH 344).
Registration Information: Credit not allowed for both BIOM 330 and BIOM 421.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 422  Kinetics of Biomolecular and Cellular Systems  Credits: 3 (3-0-0)
Course Description: In-depth analysis of the systems approach to biology and biological engineering at the molecular and the cellular scales.
Prerequisite: BIOM 330 or CBE 320.
Registration Information: Credit not allowed for both BIOM 422 and BIOM 400.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 431  Biomedical Signal and Image Processing  Credits: 3 (3-0-0)
Also Offered As: ECE 431.
Course Description: Principles, features and mathematical processing of biomedical signals and images including interference and noise filtering and feature enhancement.
Prerequisite: (ECE 303 with a minimum grade of C and ECE 311 with a minimum grade of C) and (PH 142 with a minimum grade of C).
Registration Information: Credit not allowed for both BIOM 431 and ECE 431.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 440  Biomechanics and Biomaterials  Credits: 3 (3-0-0)
Course Description: Principles of biomechanics, biofluids, and biomaterials.
Prerequisite: BMS 300, may be taken concurrently and CIV 360 and MECH 324, may be taken concurrently and MECH 331, may be taken concurrently and MECH 342.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 441  Biomechanics and Biomaterials  Credits: 3 (3-0-0)
Course Description: Principles of biomechanics, biofluids, and biomaterials.
Prerequisite: BMS 300, may be taken concurrently and CIV 360 and MECH 324, may be taken concurrently and MECH 331, may be taken concurrently and MECH 342.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 470  Biomedical Engineering  Credits: 3 (3-0-0)
Also Offered As: MECH 470.
Course Description: Engineering application in human/animal physiology, diagnosis of disease, treatment, rehabilitation, human genome manipulation.
Prerequisite: (PH 141) and (MATH 155 or MATH 160).
Registration Information: Credit not allowed for both BIOM 470 and MECH 470.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 476A  Biomedical Clinical Practicum I  Credits: 2 (0-0-2)
Course Description: Biomedical lab work or exposure to the hospital/clinical environment.
Prerequisite: (BMS 300) and (BIOM 470 or MECH 470).
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U Sat/Unsat Only.
Special Course Fee: No.

BIOM 476B  Biomedical Clinical Practicum II  Credits: 4 (0-0-4)
Course Description: Biomedical lab work or exposure to the hospital/clinical environment.
Prerequisite: (BMS 300) and (BIOM 470 or MECH 470).
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U Sat/Unsat Only.
Special Course Fee: No.

BIOM 486A  Biomedical Design Practicum: Capstone Design I  Credits: 4 (0-0-10)
Course Description:
Prerequisite: (BIOM 300) and (BIOM 330 or BIOM 441 or ECE 441).
Registration Information: Enrollment in biomedical engineering major.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 486B  Biomedical Design Practicum: Capstone Design II  Credits: 4 (0-0-10)
Course Description:
Prerequisite: BIOM 486A.
Registration Information: Enrollment in biomedical engineering major.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 495  Independent Study  Credits: Var[1-6] (0-0-0)
Course Description:
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.
BIOM 504 Fundamentals of Biochemical Engineering  Credits: 3 (3-0-0)
Also Offered As: CBE 504.
Course Description: Application of chemical engineering principles to enzyme kinetics, fermentation and cell culture, product purification, and bioprocess design.
Prerequisite: (MIP 300) and (MATH 255 or MATH 340) and (BIOM 306, may be taken concurrently or BTEC 306, may be taken concurrently or CBE 320, may be taken concurrently).
Registration Information: Credit not allowed for both BIOM 504 and CBE 504.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

BIOM 522 Bioseparation Processes  Credits: 3 (2-2-0)
Also Offered As: CBE 522.
Course Description: Analysis of processes to recover and purify fermentation products.
Prerequisite: CBE 331.
Registration Information: Must register for lecture and laboratory. Credit not allowed for both BIOM 522 and CBE 522.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 525 Cell and Tissue Engineering  Credits: 3 (3-0-0)
Also Offered As: MECH 525.
Course Description: Cell and tissue engineering concepts and techniques with emphasis on cellular response, cell adhesion kinetics, and tissue engineering design.
Prerequisite: BC 351 or BMS 300 or BMS 500 or BZ 310 or NB 501.
Registration Information: Credit allowed for only one of the following: BIOM 525, CBE 525, MECH 525. Sections may be offered: Online.
Term Offered: Spring, (even years).
Grade Mode: Traditional.
Special Course Fee: Yes.

BIOM 526 Biological Physics  Credits: 3 (3-0-0)
Also Offered As: ECE 526.
Course Description: Mathematical and physical modeling of biological systems. Mass transport in cellular environments. Electrical/mechanical properties of biomolecules.
Prerequisite: (MATH 340 or MATH 345) and (PH 122 or PH 142).
Registration Information: Credit not allowed for both BIOM 526 and ECE 526. Sections may be offered: Online.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 531 Materials Engineering  Credits: 3 (3-0-0)
Also Offered As: MECH 531.
Course Description: Selection of structural engineering materials by properties, processing, and economics; materials for biomedical and biotechnology applications.
Prerequisite: MECH 331 or MECH 431.
Registration Information: Credit not allowed for both BIOM 531 and MECH 531. Sections may be offered: Online.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 532 Material Issues in Mechanical Design  Credits: 3 (3-0-0)
Also Offered As: MECH 532.
Course Description: Failure mechanisms from materials viewpoint with emphasis on use in design. Fracture, creep, fatigue and corrosion.
Prerequisite: MECH 331.
Registration Information: Credit not allowed for both BIOM 532 and MECH 532. Sections may be offered: Online.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 533 Biomolecular Tools for Engineers  Credits: 3 (2-3-0)
Also Offered As: CIVE 533
Course Description: Theoretical and practical aspects of biomolecular laboratory tools--PCR, cloning, sequencing, single-molecule optical techniques and live-cell imaging.
Prerequisite: BMS 300 or MIP 300.
Registration Information: Must register for lecture and laboratory. Credit not allowed for BIOM 533, CIVE 533 and ECE 533.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: Yes.

BIOM 537 Biomedical Signal Processing  Credits: 3 (3-0-0)
Also Offered As: ECE 537.
Course Description: Measuring, manipulating, and interpreting biomedical signals.
Prerequisite: MATH 340 or ECE 311 or STAT 303.
Registration Information: Credit not allowed for both BIOM 537 and ECE 537.
Term Offered: Spring (even years).
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 543 Membranes for Biotechnology and Biomedicine  Credits: 3 (3-0-0)
Also Offered As: CBE 543.
Course Description: Polymeric membrane formation, modification, module design and applications to bioseparation and biomedical separations and tissue engineering.
Prerequisite: CHEM 343 and CBE 310.
Registration Information: Credit not allowed for both BIOM 543 and CBE 543. Sections may be offered: Online.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 570 Bioengineering  Credits: 3 (3-0-0)
Also Offered As: MECH 570.
Course Description: Physiological and medical systems analysis using engineering methods including mechanics, fluid dynamics, control electronics, and signal processing.
Prerequisite: MECH 307 and MECH 324.
Registration Information: Credit not allowed for both BIOM 570 and MECH 570. Sections may be offered: Online.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.
BIOM 573  Structure and Function of Biomaterials  Credits: 3 (3-0-0)
Also Offered As: MECH 573.
Course Description: Structure-function relationships of natural biomaterials; application to analysis of biomimetic materials and biomaterials used in medical devices.
Prerequisite: MECH 331.
Registration Information: Credit not allowed for both BIOM 573 and MECH 573. Sections may be offered: Online.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 574  Bio-Inspired Surfaces  Credits: 3 (3-0-0)
Also Offered As: MECH 574.
Course Description: Analysis of surface functionalities of various biological species; identification of design principles.
Prerequisite: MECH 342 and CHEM 111.
Registration Information: Sections may be offered: Online. Credit not allowed for both BIOM 574 and MECH 574.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 576  Quantitative Systems Physiology  Credits: 4 (4-0-0)
Also Offered As: MECH 576.
Course Description: Quantitative, model-oriented approach to cellular and systems physiology with design examples from biomedical engineering.
Prerequisite: BMS 300 and CHEM 113 and MATH 340 and PH 142.
Registration Information: Credit not allowed for both BIOM 576 and MECH 576. Sections may be offered: Online.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 578A  Biomedical Clinical Practicum  Credits: 2 (1-3-0)
Course Description: Graduate-level activity, such as biomedical research or design of a new medical device, for exposure to the hospital/clinical environment.
Prerequisite: (BMS 300 or BMS 500) and (BIOM 570 or MECH 570).
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U Sat/Unsat Only.
Special Course Fee: No.

BIOM 578B  Biomedical Clinical Practicum  Credits: 4 (1-6-0)
Course Description: Graduate-level activity, such as biomedical research or design of a new medical device, for exposure to the hospital/clinical environment.
Prerequisite: (BMS 300 or BMS 500) and (BIOM 570 or MECH 570).
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U Sat/Unsat Only.
Special Course Fee: No.

BIOM 592  Seminar  Credits: Var[1-3] (0-0-0)
Course Description: Student and research faculty presentations, guest and invited extramural speakers.
Prerequisite: None.
Registration Information: Sections may be offered: Online.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

BIOM 671  Orthopedic Tissue Biomechanics  Credits: 3 (3-0-0)
Course Description: Linear elastic, finite deformation, and viscoelastic theories applied to the mechanical behavior of orthopedic tissues (bone, tendon, cartilage).
Prerequisite: CIVE 560.
Restriction: Must be a: Graduate, Professional.
Registration Information: Credit not allowed for both BIOM 671 and MECH 671 or for BIOM 671/MECH 671 and BIOM 571/MECH 571.
Term Offered: Fall (odd years).
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 674  Bio-Inspired Surfaces  Credits: 3 (3-0-0)
Course Description: Analysis of surface functionalities of various biological species; identification of design principles.
Prerequisite: MECH 342 and CHEM 111.
Restriction: Must be a: Graduate, Professional.
Registration Information: Credit not allowed for both BIOM 674 and MECH 674.
Term Offered: Spring.
Grade Mode: Instructor Option.
Special Course Fee: No.

BIOM 699  Thesis  Credits: Var[1-18] (0-0-0)
Course Description:
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

BIOM 695  Independent Study  Credits: Var[1-18] (0-0-0)
Course Description:
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

BIOM 750  Grant Proposal Writing and Reviewing  Credit: 1 (1-0-0)
Course Description: Preparation and review of applications for fellowships and grants.
Prerequisite: None.
Registration Information: Written consent of instructor.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

BIOM 784  Supervised College Teaching  Credits: Var[1-6] (0-0-0)
Course Description:
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

BIOM 786  Practicum-Laboratory Rotations  Credits: Var[1-18] (0-0-0)
Course Description:
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.
BIOM 795 Independent Study Credits: Var[1-6] (0-0-0)
Course Description:
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

BIOM 798 Research-Laboratory Rotations Credits: Var[1-6] (0-0-0)
Course Description: Doctoral laboratory rotation.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

BIOM 799 Dissertation Credits: Var[1-18] (0-0-0)
Course Description:
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Attendance at the required workshops may be spread over the student's five-year program.

Distinctive Requirements for Degree Program:

TO DECLARE MAJOR: Engineering is a controlled major: students are admitted into the major only if they meet established academic standards. Please see competitive major requirements or the advisor in the Department for more information.

TO PREPARE FOR FIRST SEMESTER: The curriculum for this major assumes students enter college prepared to take calculus and chemistry. To qualify for graduation, students in the biomedical engineering combined with chemical and biological engineering program must achieve a minimum 2.000 grade point average at CSU in all courses in engineering, mathematics, computer science, statistics, physics, and chemistry as well as courses taken as technical electives. Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Distinctive Requirements for Degree Program:

TO DECLARE MAJOR: Engineering is a controlled major: students are admitted into the major only if they meet established academic standards. Please see competitive major requirements or the advisor in the Department for more information.

TO PREPARE FOR FIRST SEMESTER: The curriculum for this major assumes students enter college prepared to take calculus and chemistry. To qualify for graduation, students in the biomedical engineering combined with electrical engineering program must achieve a minimum 2.000 grade point average at CSU in all courses in engineering, mathematics, computer science, statistics, physics, and chemistry as well as courses taken as technical electives. Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Attendance at the required workshops may be spread over the student’s five-year program.

1 Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Attendance at the required workshops may be spread over the student’s five-year program.

2 Select a total of 17 credits from ECE 400-level or higher courses not otherwise required. 3 of the 17 credits must be from ECE courses dual-listed with the BIOM subject code.

Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Attendance at the required workshops may be spread over the student’s five-year program.

Select 9 credits from courses with the BIOM or ECE subject code.

**Major Completion Map**

**Distinctive Requirements for Degree Program:**

**TO DECLARE MAJOR:** Engineering is a controlled major: students are admitted into the major only if they meet established academic standards. Please see competitive major requirements or the advisor in the Department for more information.

**TO PREPARE FOR FIRST SEMESTER:** The curriculum for this major assumes students enter college prepared to take calculus and chemistry. To qualify for graduation, students in the biomedical engineering combined with electrical engineering program (with concentration in lasers and optics)
must achieve a minimum 2.000 grade point average at Colorado State in all courses in engineering, mathematics, computer science, statistics, physics, and chemistry as well as courses taken as technical electives. Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Attendance at the required workshops may be spread over the student’s five-year program.

Select 3 credits from any of the following: MECH 303 or any 400-level MECH course except MECH 486A, MECH 486B, MECH 408, MECH 410, MECH 495, MECH 498A, or MECH 498B.

Major Completion Map

Distinctive Requirements for Degree Program:

TO DECLARE MAJOR: Engineering is a controlled major: students are admitted into the major only if they meet established academic standards. The biomedical engineering combined with mechanical engineering program has additional admissions requirements and enrollment limits. Please see competitive major requirements or the advisor in the Department for more information.

TO PREPARE FOR FIRST SEMESTER: The curriculum for this major assumes students enter college prepared to take calculus and chemistry. To qualify for graduation, students in the biomedical engineering combined with mechanical engineering must achieve a minimum 2.000 grade point average at CSU in all courses in engineering, mathematics, computer science, statistics, physics, and chemistry as well as courses taken as technical electives. Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Attendance at the required workshops may be spread over the student’s five-year program.

College Programs
The College of Health and Human Sciences (http://www.chhs.colostate.edu) comprises six academic departments and two schools. It is a human-centered place, with a focus on educating students for people-oriented professions and on applying creative, interdisciplinary research to solve social problems. Each of its units offers professional education for careers and for lifelong learning, through a solid grounding in the natural sciences, social sciences, and humanities as well as courses specific to each field of study. The College currently includes the Departments of Construction Management; Design and Merchandising; Food Science and Human Nutrition; Health and Exercise Science; Human Development and Family Studies; and Occupational Therapy; and the Schools of Education and Social Work.

Learning within the College takes place in a variety of settings on and off campus, forging strong links between the classroom and the workplace. All of the College’s programs combine classroom instruction with hands-on experience in state-of-the-art computer laboratories, research laboratories, or specialized centers and institutes that emphasize the practical application of new knowledge.

Faculty in the College of Health and Human Sciences maintain valued and useful relationships with a broad range of constituents, enhancing College visibility within the larger community, fulfilling CSU’s land-grant mission. These vital connections also provide students with excellent opportunities for working internships in their fields. For all its students, the College places a strong emphasis on experiential learning and leadership opportunities that allow students to test new skills in real-world settings. Numerous scholarships (http://www.chhs.colostate.edu/students/scholarships.aspx) are available through the College of Health and Human Sciences each spring semester.

Professor Mostafa Khattab, Department Head

The Construction Management (CM) program at CSU is one of the top-ranked programs in the nation. Since its inception in 1946, more than 5,000 students have graduated, many of them going on to become leaders in their field. The program is accredited by the American Council for Construction Education.

Construction management is the overall planning, coordination, and control of a project from inception to completion. The CM major addresses issues related to the management of multiple project sites and the applications of resource management, schedule control, cost control, design, and other requirements of the construction process. Design elements concentrate on the relationship between the built environment and the comfort of its inhabitants while safety education emphasizes the health of the individual worker.

Undergraduate Program

A major in Construction Management provides a strong foundation for professional careers in the construction industry. The curriculum integrates technology and innovative management systems with the basics of civil engineering, business and management, and the communication skills required to be successful in today's world. Coursework includes construction methods, estimating, scheduling, computer technologies, architectural principles, fundamentals of management and law, steel and concrete structures, and soils. The curriculum incorporates hands-on labs for most courses. This diverse program creates a broad range of career options for graduates.

Graduate Program

The Department of Construction Management offers graduate study leading to the Master of Science degree. The focus of the department is on professional programs that successfully combine theory and application with a strong emphasis in applied management. The master's program is an advanced curriculum designed to allow students to tailor a portion of the specialization requirements to meet individual interests and goals.

Each program can be individually tailored to meet the needs and interests of the student.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Construction Management (http://cm.chhs.colostate.edu).

Master Programs

- Master of Science in Construction Management, Plan A
- Master of Science in Construction Management, Plan B

Courses

Construction Management (CON)

CON 101 Introduction to Construction Management Credits: 3 (3-0-0)  
Course Description: Identify and understand relationships among participants in the construction process and its history.
Prerequisite: None.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 131 Graphic Communications for Construction Credits: 2 (0-4-0)  
Course Description: Reading technical drawings, 2D/3D visualization, manual drafting techniques, introduction to design software applications.
Prerequisite: None.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 151 Construction Materials and Methods Credits: 3 (3-0-0)  
Course Description: Materials and methods utilized in the design and construction of buildings.
Prerequisite: None.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.
CON 251  Materials Testing and Processing  Credits: 2 (1-2-0)
Course Description: Testing of construction materials for standards and quality. Conduct common quality tests and document the results.
Prerequisite: CON 151.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: Yes.

CON 261  Construction Surveying  Credits: 3 (2-3-0)
Course Description: Surveying fundamentals to field of construction, building layout, measurement procedures, vertical controls, line and grade, surveying instrument operation.
Prerequisite: (CON 131 or INTD 166) and (MATH 125 or MATH 160).
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: Yes.

CON 265  Construction Estimating I  Credits: 3 (2-2-0)
Course Description: Integration of construction materials and methods into construction systems that will be incorporated in projects.
Prerequisite: CON 131 and CON 151.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 267  Construction Management Pre-Internship  Credit: 1 (0-0-1)
Course Description: Skills and concepts related to successful internships within the construction management industry.
Prerequisite: None.
Registration Information: Construction management majors only.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

CON 270  Introduction to Road Construction  Credits: 3 (3-0-0)
Course Description: Steps necessary to construct a paved roadway from conception, land acquisition and finance through paving operations and trafficking.
Prerequisite: None.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

CON 317  Safety Management  Credits: 2 (2-0-0)
Course Description: Safety management in construction, corporate, and institutional environments.
Prerequisite: None.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 351  Construction Field Management  Credits: 2 (1-2-0)
Course Description: Materials and methods used in construction, administrative and organizational planning used to complete a project.
Prerequisite: CON 251, may be taken concurrently and CON 317, may be taken concurrently.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: Yes.

CON 352  Metal Fabrication for Construction  Credits: 2 (1-2-0)
Course Description: Shaping, cutting, and joining of structural and non-structural metal. Emphasis on jobsite safety, economics, and efficiency.
Prerequisite: CON 251.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 359  Structures I  Credits: 4 (4-0-0)
Course Description: Behavior of structural components and systems, overview of structural engineering analysis/design process.
Prerequisite: MATH 125.
Registration Information: Junior or senior standing.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 360  Electrical and Control Systems  Credits: 3 (2-2-0)
Course Description: Electrical and control systems and their application in the construction industry.
Prerequisite: CON 265.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 365  Construction Estimating II  Credits: 3 (2-2-0)
Course Description: Industry-recognized methods for work item analysis, quantity surveying, resource estimating, and bid development using work breakdown structures.
Prerequisite: CON 265.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 366  Construction Equipment and Methods  Credits: 3 (2-2-0)
Course Description: Equipment/methods in heavy and highway construction; equipment selection, productivity, and costs. Infrastructure, tunneling, and trenchless technology.
Prerequisite: CON 261.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 367  Construction Contracts/Project Administration  Credits: 3 (3-0-0)
Course Description: Utilization of field engineering systems and procedures to effectively meet project objectives.
Prerequisite: CON 265 and CON 351, may be taken concurrently.
Registration Information: Construction management majors and minors only.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.
CON 370  Asphalt Pavement Materials and Construction  Credits: 3 (2-2-0)
Course Description: Constituents of asphalt pavements; manufacture of asphalt cement, emulsions, and cutbacks; material properties and behavior.
Prerequisite: None.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 371  Mechanical and Plumbing Systems  Credits: 3 (3-0-0)
Course Description: Heating, ventilation, air conditioning, plumbing, and fire suppression with emphasis on design, operation, and interaction.
Prerequisite: CON 360, may be taken concurrently or INTD 276, may be taken concurrently.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 384  Supervised College Teaching  Credits: Var[1-5] (0-0-0)
Course Description: 
Prerequisite: None.
Registration Information: A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

CON 450  Travel Abroad-Sustainable Building  Credits: 3 (3-0-0)
Also Offered As: INTO 450.
Course Description: Major components of sustainable design and construction, energy, healthy buildings, natural resources and other environmental issues.
Prerequisite: None.
Registration Information: Credit not allowed for both CON 450 and INTO 450.
Term Offered: Summer.
Grade Mode: Traditional.
Special Course Fee: No.

CON 459  Structures II  Credits: 4 (4-0-0)
Course Description: Design of formwork, falsework, and shoring.
Prerequisite: CON 359.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 461  Construction Scheduling and Cost Control  Credits: 3 (2-2-0)
Course Description: Strategies and techniques for efficient scheduling of project activities and control of project costs; emphasis on Critical Path Method.
Prerequisite: CON 365.
Registration Information: Construction management majors and minors only. Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 462  Financial Management for Construction  Credits: 3 (3-0-0)
Course Description: Financial statements, financial ratios, applications of engineering economy, cash flow analysis, construction financing, and cost information systems.
Prerequisite: (ACT 205 or ACT 210, may be taken concurrently) and (MGT 305 or MGT 320).
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 464  Construction Leadership  Credits: 3 (1-0-2)
Course Description: Leading projects and people in a construction business and application of skills in a construction-based community service learning project.
Prerequisite: CON 365 and CON 367, may be taken concurrently.
Registration Information: Must register for lecture and recitation. Written consent of instructor.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 465  Construction Management Professional Practice  Credits: 3 (1-0-2)
Course Description: Professional practice using an understanding of the contractual and working relationships among all participants in the design/construction process.
Prerequisite: (CON 461, may be taken concurrently) and (CON 487A or CON 487E or CON 487B).
Registration Information: Construction management majors only. Must register for lecture and recitation.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 469  Soils Engineering for Construction Managers  Credits: 3 (2-0-1)
Course Description: Soil mechanics, foundation engineering, and foundation construction.
Prerequisite: CON 359.
Registration Information: Must register for lecture and recitation.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 471  Project Management for Mechanical Systems  Credits: 3 (3-0-0)
Course Description: Fundamental principles of mechanical systems. Presentation and practice of management principles relevant to mechanical projects.
Prerequisite: CON 371 and CON 365, may be taken concurrently.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

CON 476  Sustainable Practice-Design and Construction  Credits: 3 (3-0-0)
Course Description: Major components of sustainable design/construction: energy, healthy buildings, cultural, natural resources, use, other environment/economic issues.
Prerequisite: None.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.
CON 477  Residential Aging-in-Place and Green Building  Credits: 3 (3-0-0)
Course Description: Aging-in-place and green building aspects of the residential construction market.
Prerequisite: CON 265.
Restriction: .
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 487A Internship: Construction Management I  Credits: 6 (0-0-18)
Course Description:
Prerequisite: CON 267 and CON 367.
Registration Information: OSHA 10-hour construction safety card.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

CON 487B Internship: Construction Management II  Credits: 3 (0-0-9)
Course Description:
Prerequisite: CON 267 and CON 367.
Registration Information: OSHA 10-hour construction safety card; 500 hours documented work experience.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

CON 495 Independent Study-Construction Management  Credits: Var[1-18] (0-0-0)
Course Description:
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

CON 496 Group Study-Construction Management  Credits: Var[1-9] (0-0-0)
Course Description:
Prerequisite: None.
Registration Information: Maximum of 9 credits allowed in course.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

CON 502 Research in Construction Management I  Credits: 3 (2-0-1)
Course Description: Research, discuss, and present current issues and trends in the construction industry related to business, management, engineering, and technology.
Prerequisite: None.
Registration Information: Must register for lecture and recitation. Credit not allowed for both CON 502 and CON 562.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

CON 503 Research in Construction Management II  Credits: 3 (3-0-0)
Course Description: Models and methods of disciplined inquiry used in diverse application-based organizations. Preparation to use disciplined inquiry methods to solve applied problems in construction management or related fields. Topics include problem/topic selection, writing research questions and objectives, literature reviews, selection of research methods, data collection and analysis, and conclusions and implications.
Prerequisite: CON 502.
Registration Information: Credit not allowed for both CON 503 and CON 500.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 511 Project Procurement and Preconstruction  Credits: 3 (2-0-1)
Course Description: Advanced project procurement procedures with a focus on early design phase planning applications and preconstruction management techniques.
Prerequisite: CON 461.
Registration Information: Must register for lecture and recitation. Credit not allowed for both CON 511 and CON 566.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

CON 512 Post-Award Construction Management  Credits: 3 (2-0-1)
Course Description: Advanced topics related to post-award construction management issues with a focus on multiple project controls and project risk management.
Prerequisite: CON 461.
Registration Information: Must register for lecture and recitation. Credit not allowed for both CON 512 and CON 560.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 521 Sustainable Building & Infrastructure Systems  Credits: 3 (2-0-1)
Course Description: Issues and state-of-the-art resources needed to construct, remodel/retrofit, operate and maintain the built environment (buildings and infrastructure). Specifically, resources will include major materials, components and technologies, as well as energy and water resources are needed in the different life-cycle phases of the building or infrastructure project.
Prerequisite: None.
Registration Information: Must register for lecture and recitation. Credit not allowed for both CON 521 and CON 576.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 561 Applied Productivity Improvement  Credits: 3 (3-0-0)
Course Description: Existing and emerging tools for productivity enhancement in project and production environment.
Prerequisite: None.
Registration Information: Admission to the construction management master's program.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.
CON 565 Legal Aspects of Construction Process  Credits: 3 (3-0-0)
Course Description: Common points of dispute; methods of avoiding disputes among owner, architect, engineer, and contractor.
Prerequisite: None.
Registration Information: Admission to the construction management master’s program.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 566 Legal Aspects of Construction Process  Credits: 3 (3-0-0)
Course Description: Common points of dispute; methods of avoiding disputes among owner, architect, engineer, and contractor.
Prerequisite: None.
Registration Information: Admission to the construction management master’s program.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 567 Preservation and Rehabilitation of Buildings  Credits: 3 (3-0-0)
Course Description: Theory and applications of preservation technology used in the management and rehabilitation of historic and archaic buildings.
Prerequisite: None.
Registration Information: Admission to the construction management master’s program.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

CON 568 Construction Industry Institute Practices  Credits: 3 (3-0-0)
Course Description: Senior executives from the Construction Industry Institute (CII) present best practices developed by CII over the last 25 years.
Prerequisite: CON 367.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

CON 569 Regulatory Impact on Construction  Credits: 3 (3-0-0)
Course Description: Role government plays in the design and construction of the built environment.
Prerequisite: None.
Registration Information: Admission to the construction management master’s program.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 571 Facility Planning and Management  Credits: 3 (3-0-0)
Course Description: Planning, organizing and managing large educational and/or commercial facilities.
Prerequisite: None.
Registration Information: Admission to the construction management master’s program.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

CON 575 Managerial Decision Making for Constructors  Credits: 3 (3-0-0)
Course Description: Construction and real estate development applications of multi-disciplinary managerial analysis and decision-making techniques.
Prerequisite: None.
Registration Information: Admission to the construction management master’s program.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

CON 577 Leadership of Sustainable Community Projects  Credits: 3 (2-0-1)
Course Description: Learn and apply principles of sustainable construction management through leading and building service-learning projects.
Prerequisite: CON 476 or CON 450 or INTD 450.
Registration Information: Required background check.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

Major in Construction Management

The Construction Management (CM) program at CSU is one of the top-ranked programs in the nation. Since its inception in 1946, more than 5,000 students have graduated, many of them going on to become leaders in their field. The program is accredited by the American Council for Construction Education.

Construction management is the overall planning, coordination, and control of a project from inception to completion. The CM major addresses issues related to the management of multiple project sites and the applications of resource management, schedule control, cost control, design, and other requirements of the construction process. Design elements concentrate on the relationship between the built environment and the comfort of its inhabitants while safety education emphasizes the health of the individual worker.

A major in Construction Management provides a strong foundation for professional careers in the construction industry. The curriculum integrates technology and innovative management systems with the basics of civil engineering, business and management, and the communication skills required to be successful in today’s world. Coursework includes construction methods, estimating, scheduling, computer technologies, architectural principles, fundamentals of management and law, steel and concrete structures, and soils. The curriculum incorporates hands-on labs for most courses. This diverse program creates a broad range of career options for graduates.

The Construction Management major is controlled, and all students admitted to CSU or seeking to change their major to CM must first be designated as pre-construction management. To be considered for admission to CM students must:

- Complete a minimum of 15 credits at CSU
- Earn a minimum 2.750 cumulative CSU GPA
- Complete CON 101 with a “B” grade or better
- Complete CO 150 with a “B” grade or better
- Complete MATH 125 with a “C” grade or better

Once a student has met the minimum requirements listed above they are eligible to apply to the CM program.

During their academic career, CM students are required to obtain an internship (full-time structured work experience) position with any one of a variety of construction companies and organizations. Our Phelps Placement Office assists current and graduating students as well as alumni with in-house interviews, bi-annual career fairs, and the publication of a graduate resume book.

Learning Outcomes

Students will develop and demonstrate:

- Professional, analytical, and problem solving skills related to the career requirements in construction management
- Strong professional communication skills with an emphasis on written, graphic, and verbal skills related to the career requirements in construction management
- Technical proficiency in the following construction management areas: design/engineering, management, materials and methods, estimating, scheduling, safety, surveying, and project administration

Potential Occupations

The construction industry has become a highly technical industry marked by continuous and dramatic change. There is a continued demand for capable and highly trained construction management professionals who can adapt and become effective leaders in the field. CM continues to boast one of the highest placement rates and entry level salaries of all majors.

In addition to the campus Career Center, the CM Department prides itself on its in-house career support. Services provided by the Phelps Placement Office include internship and career placement, bi-annual CM career fair, in-house industry interviews, graduate resume publication, year-round intern and job postings, resume and business correspondence resources, and career assessment counseling.

Entry-level occupations include, but are not limited to: field engineer, assistant estimator, project scheduler, cost control engineer, safety engineer, project supervisor, project coordinator, quality assurance specialist, project engineer, assistant project manager, and assistant superintendent. Recruiting Industries include: Commercial, Heavy Civil and Heavy Highway, Industrial and Utility, Mechanical and Electrical, Project Controls and Consulting, Residential Development, Specialty Contracting, and Transportation.

Students may consider simultaneously completing the requirements for a minor in Business Administration. Several of the courses required for the minor in Business Administration are also required for the major in Construction Management curriculum.

**Major Completion Map**

**Distinctive Requirements for Degree Program:**

Every student pursuing the Construction Management (CM) major will start as Pre#Construction Management and must meet the following admission requirements before being fully admitted to the Construction Management major:

- Earn a minimum 2.750 cumulative CSU GPA
- Complete CON 101, Introduction to Construction Management, with a "B" grade or better
- Complete CO 150, College Composition, with a "B" grade or better
- Complete MATH 125, Numerical Trigonometry, with a "C" grade or better

Besides CON 101, Pre#Construction Management students are not able to take CON courses until fully admitted to Construction Management. There is a required internship course that takes place the summer prior to the student’s graduation. Students must complete CON 487A (24 week Internship) or CON 487B (12 week Internship) plus 500 hours work experience to be submitted by December prior to internship.
MATH 117 and MATH 118 are prerequisite courses required for this major in order to complete MATH 125.

Minor in Construction Management

About the Minor
The Construction Management minor is designed to provide students an opportunity to study basic concepts of construction, materials, techniques, design, and managerial skills required for the construction industry. The CM minor has admission criteria and consists of nine courses beginning with CON 101 Introduction to Construction Management. The minor will take students a minimum of five semesters to complete.

How to Add the CM Minor
Students must meet with a CM Advisor to declare interest in the minor and will be given an override to register for CON 101. An online application must be completed and once a student satisfies the following criteria he or she will be admitted to the minor and allowed to register for additional required CON courses.

Admission Criteria
- Earn a minimum 2.750 cumulative CSU GPA
- Complete CON 101 with a “B” grade or better
- Complete CO 150 with a “B” grade or better
- Complete MATH 125 with a “C” grade or better

Once a student has met the minimum requirements listed above he or she is eligible to apply to the CM Minor program. Students are admitted each semester in May and December.

Requirements
Effective Fall 2015
Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Professor Nancy Miller, Department Head

Mission Statement
An ongoing commitment to cultivating innovative and socially responsible solutions to local and global human-centered opportunities and challenges in apparel, interior design, merchandising, and product development by:

2. Addressing and communicating future societal needs by analyzing historic and current needs, as well as considering national and international perspectives.
3. Incorporating a pragmatic and socially responsible approach to teaching, research, and engagement.
4. Applying technology in pursuit of creative human-centered solutions to societal needs.
5. Designing, producing, and marketing industry-relevant products and services for diverse populations.
7. Enhancing students’ preparedness through experiential, collaborative, community, and industry-based learning.
8. Fostering students’ intellectual curiosity, objectivity, and independence, as well as their ability to critically evaluate information and to use resources in addressing problems.
9. Advancing interdisciplinary and global perspectives.
10. Maximizing business, cultural, and socially responsible opportunities enhancing and highlighting the principles of design.

Graduate Programs in Design and Merchandising

The department offers graduate programs leading to a Master of Science degree in Design and Merchandising. Students may specialize in Apparel and Merchandising or Interior Design. For more information about program emphases and requirements, contact the department. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Design and Merchandising (http://www.dm.chhs.colostate.edu).

Learning Outcomes

Design and Merchandising graduate students will:

- Demonstrate mastery of design and merchandising concepts and theories in their respective focal areas, including apparel design and production, consumer behavior, creativity, merchandising, interior design, social/cultural/historical aspects of dress and design, sustainability/resilience, and textile science.
- Critically review and interpret research through a review of literature relevant to a research problem or challenge.
- Demonstrate an understanding of how to conduct and implement original research in design and merchandising as demonstrated through problem identification, literature review, study design, data collection, and data analysis/interpretation.
- Effectively communicate outcomes of design and merchandising research in diverse presentation formats (e.g., oral, written, visual).
- Graduates of the Master of Science in Design and Merchandising will be successful in procuring positions in industry or academia and/or admission to doctoral-level programs.
- Be involved in co-curricular activities.

Courses

Subjects in this department include: Apparel and Merchandising (AM), Design and Merchandising (DM), and Interior Design (INTD).

Apparel and Merchandising (AM)

AM 101 Fashion Industries Credits: 3 (3-0-0)
Course Description: Development, organization, and trends of domestic and foreign fashion industries.
Prerequisite: None.
Terms Offered: Fall, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

AM 110 Apparel and Merchandising Digital Technology Credits: 3 (2-2-0)
Course Description: Introduction to computer technologies used in apparel and merchandising industries.
Prerequisite: None.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

AM 130 Design Foundation-Apparel and Merchandising Credits: 3 (3-0-0)
Course Description: Impact of elements and principles of design on apparel and merchandising within 20th century art.
Prerequisite: None.
Registration Information: Sections may be offered: Online.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

AM 143 Introduction to Apparel Design Credits: 4 (2-4-0)
Course Description: Apparel and garment-pattern development, construction, quality, skill development in technical drawing and rendering.
Prerequisite: None.
Registration Information: Acceptance into Apparel Design and Production program concentration required. Must register for lecture and laboratory.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: Yes.

AM 240 Computer-Aided Apparel Design Credits: 3 (0-6-0)
Course Description: Apparel design using the computer to generate drawings for fabric, graphic logo, and apparel.
Prerequisite: AM 143.
Registration Information: Portfolio review required.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.
AM 241 Apparel Production  Credits: 3 (1-4-0)
Course Description: Production processes of sewn textile products, flat pattern, pattern grading, marker making, and writing specifications.
Prerequisite: (AM 143) and (MATH 117) and (MATH 118) and (MATH 124, may be taken concurrently).
Registration Information: Portfolio review required. Must register for lecture and laboratory.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: Yes.

AM 243 Adobe Photoshop for Textile Design  Credits: 3 (3-0-0)
Course Description: Textile design using Adobe Photoshop to generate drawings for surface and structural textile design.
Prerequisite: None.
Registration Information: Offered as an online course only.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.

The Apparel and Merchandising program emphasizes the study of product design and development; promotion, distribution, and retailing; and consumer behavior in the global environment, while fostering cultural awareness and a commitment to social responsibility. There are three concentrations in the major: Apparel Design and Production, Merchandising, and Product Development.

Learning Outcomes

Students will demonstrate their understanding and apply core design, merchandising, textiles science, and technical skills relative to their program areas. The three concentrated areas include:

- Apparel Design and Production core skills will include, but are not limited to: use of industry-related technology for sketching pattern drafting, marker making, constructing; and crossing disciplines to include properties of design conceptual development technical production specifications communication, materials sourcing, and marketing strategies.

- Merchandising core skills will include, but are not limited to: domestic and global retailing, merchandise buying, sales and customer service, product forecasting, product promotion, consumer behavior, and crossing disciplines to include knowledge and skills in accounting/budgeting, purchasing, management, and marketing.

- Product Development core skills will include, but are not limited to: market research, product design and development, prototypes, specification sheets, global sourcing, and supply chain management. Skills in this concentration are enhanced through industry related technology. Students in the Apparel and Merchandising major will be able to assess and synthesize multiple factors in creating/producing quality products, services, and design solutions. The factors will address human, design, industry and business, global, science, and technology sensitivities.

Students will be able to describe their understanding of multiple processes that are involved in the practice of apparel design and production, merchandising, and product development. These processes include but are not limited to critical and creative thinking, communication, ethics, social responsibility and sustainability, collaborative, and interdisciplinary.

Students will distinguish and demonstrate qualities of professionalism and business practice that contribute to the industry, and advance the value of their knowledge to the near and/or built environments.

Students will enroll in Internships credits at least one semester before graduation and a pre-internship course during their third year in the major. Placement with businesses and organizations in national and international settings are intended to facilitate depth and integration of knowledge in the study of apparel and merchandising and to enhance students’ professional development and career opportunities. Students with a 2.500 GPA are eligible to participate in department-facilitated internships.

Students who engage in co-curricular learning experiences will have the opportunity to visit apparel and fashion headquarters, manufacturers, and markets, network with industry professionals, engage in project based learning experiences, assist with department recruiting events and new student orientations, and participate in a variety of leadership events.

Potential Occupations

Example careers for Apparel Design and Production graduates include, but are not limited to: apparel and fashion designer, computer-aided design (CAD) manager, creative director, design director, fashion illustrator, fashion magazine editorial contributor, fashion stylist, pattern-maker, technical designer, trend/fashion forecaster.

Example careers for Merchandising graduates include, but are not limited to: brand/product merchandise manager, merchandise buyer, retail analyst, retail manager, retail store/website planner, resident buying office administrator, sales representative, showroom coordinator/manager, inventory control agent, consumer or market researcher, product trend analyst, advertising and promotions coordinator/manager, public relations specialist, social media specialist, and visual merchandiser.

Example careers for Product Development graduates include, but are not limited to: consumer or market researcher, product designer/developer, prototype engineer, import/export specialist, sourcing agent, product testing specialist, production manager, quality control agent, and sourcing agent.
Concentrations

• Apparel Design and Production Concentration
• Merchandising Concentration
• Product Development Concentration

Major in Apparel and Merchandising, Apparel Design and Production Concentration

In the Apparel Design & Production concentration, the curriculum focuses on the development of knowledge and skills necessary to engage in the design of textile and apparel goods for an identified target market, including coursework in aesthetics and design, fashion/trend forecasting, fashion illustration, pattern development; material selection (e.g., fibers, fabrics, dyes/finishes), apparel construction techniques, computer-aided design (CAD), historic textiles and costume, and social-psychological aspects of dress.

Students applying to the Apparel Design and Production concentration are accepted first into the Apparel and Merchandising major. Full acceptance into the Apparel Design and Production concentration requires passing the Portfolio Review held in the fall semester. Industry professionals in the field of apparel design and manufacturing will evaluate portfolios. The 20 to 25 highest scoring students will be accepted into the Apparel Design and Production concentration and become eligible to take the Apparel Design and Production courses in the concentration.

1. Select upper-division (300- to 400-level) AM or DM courses ending in -00 to -79.
2. Acceptance for DM 487B depends on the student’s GPA and acceptance by a cooperating company. Students not enrolled in an internship will select 12 credits from the department list of Internship Alternative Courses.

**Major Completion Map**

**Distinctive Requirements for Degree Program:**
Competitive Selection process: Portfolio Review required for all students who desire to declare Apparel Design and Production (ADAZ) concentration. Upon successful passing of the Portfolio Review, students are able to take AM 143. No course requirements to submit a Portfolio, however, a minimum 2.500 cumulative reported GPA is required. 20#25 students selected each Fall and can then declare ADAZ concentration # those are then permitted to enroll in AM 143, AM 241, AM 244, AM 341, AM 345, AM 446.

Program Total Credits:  120
Minor in Merchandising

A minor in Merchandising provides students in other majors an opportunity to expand their knowledge of merchandising. The minor may be of special interest to students majoring in areas such as art, business, and journalism and media communication. The perspectives gleaned by selecting a Merchandising minor both enhance understanding of the student’s major program and expand career opportunities available to the student.

The Apparel and Merchandising program emphasizes study in apparel and textile design, product development, marketing and retailing of consumer goods, and sourcing of products. The program encompasses global study of the cultural/historical economic, and scientific aspects of the textile and apparel industry, while fostering understanding of consumer behavior and socially responsible business practices.

Requirements
Effective Fall 1999

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

1 Select in consultation with advisor. Must be upper-division (300- to 400-level).

Major in Interior Design

The Interior Design program exemplifies the definition of the professional interior designer as qualified by education, experience, and examination to enhance the function and quality of life, increase productivity, and protect the health, safety, and welfare of the public. The program is accredited by the Council for Interior Design Accreditation (CIDA).

Students seeking to apply to the Interior Design major at CSU first are admitted to CSU as Pre-Interior Design. All students who wish to be considered for admission to Interior Design will be required to complete the Interior Design Scenario. Selective advancement into the major is based on the score received at the Interior Design Scenario determined by external reviewers who assess student competencies in writing, drawing, problem solving, and conceptual frameworks. A cohort of approximately 40 students is selected upon completion of the Interior Design Scenario. The Design Scenario occurs annually in spring semester. See the Department of Design and Merchandising (http://www.dm.chhs.colostate.edu) website for more information regarding the Interior Design Scenario.

In order to participate in the Interior Design Scenario students must have the following:

- GPA of 2.5 or higher.
- Completion of or current enrollment in INTD 129 and INTD 166 or equivalent. Equivalent courses from other institutions must be approved at least two weeks prior to the Interior Design Scenario by the Interior Design transfer advisor.

The Interior Design department Academic Support Coordinator will work with Pre-Interior Design students and advise them on their current performance in relation to the possibility of their admission to Interior Design.

Faculty in the Interior Design program value learning as a collaborative effort inviting diversity, design research as a basis for excellence in design practice, and new models for learning to respond to new ways of working. The program guides students toward becoming dedicated interior designers who have strong communication skills, are active as team players and creative problem solvers, and who make a positive impact in the practice of interior design. Students engage in research-based problem solving, providing a solid transition from education to practice in a global community. An internship in interior design practice is required for graduation.
The Interior Design graduate will learn the entirety of the design process, beginning with assessment of client needs through design programming, development of alternative design solutions, development of conceptual and theoretical frameworks, selection of furniture and finish materials, construction documentation, core compliance, and contract administration including project management and post-occupancy evaluation methodologies. In addition, students take coursework in construction/building systems and codes, business principles in interior design, computer-aided design and drafting, animation, multimedia, graphic visualization, interior design history, and sustainable practices.

The teaching facilities include design studios; display, resource, and critique spaces; and computer labs.

**Learning Outcomes**

- Interior Design core skills will include but are not limited to: applications of history and culture; space and form; color and light; fixtures, equipment, and finish materials; environmental systems; building systems, and interior construction; technology; and regulations.
- Students in the Interior Design major will be able to assess and synthesize multiple factors in creating/producing quality products, services, and design solutions. The factors will address human, design, industry and business, global, science and technology sensitivities.
- Students will be able to describe their understanding of multiple processes that are involved in the practice of interior design. These processes include but are not limited to critical and creative thinking, communication, ethics, social responsibility and sustainability, collaborative and interdisciplinary.
- Students will distinguish and demonstrate qualities of professionalism and business practice that contribute to the industry, and advance the value of their knowledge to the near and/or built environments.
- Students will enroll in Internships credits at least one semester before graduation.
- Students who engage in co-curricular learning experiences will have the opportunity to network with industry professionals, engage in project based learning experiences, assist with department recruiting events and new student orientations, and attend a variety of leadership events.

**Potential Occupations**

Students are prepared as entry-level interior designers with competency in design fundamentals, space planning and programming, code compliance, lighting, materials research, project management, and professional practices in the design of diverse interior spaces.

Graduates seek employment in interior design and architecture firms as residential, corporate, retail, health care, institutional, education, and hospitality designers. Graduates also work in lighting design, product development, marketing, research, design-related journalism, illustration, facility management, showroom management, and as manufacturers’ representatives.

The CSU Educator Preparation Program is nationally accredited by the Council for the Accreditation of Educator Preparation (CAEP) and state accredited by the Colorado Department of Education and the Colorado Department of Higher Education.

Section 207 of Title II of the Higher Education Act mandates that the Department of Education collect data on state requirements for teacher certification and licensure, as well as data on the performance of teacher preparation programs. The Title II Institutional Report for CSU is available through the Educator Preparation website (http://www.cep.chhs.colostate.edu/school/accreditation.aspx).

Learning Outcomes

Students will demonstrate:

- Employment of innovative instructional methods to promote student success and to meet state and national standards
- Understanding of how students differ in their approaches to learning and create instructional opportunities that are adapted to diverse learners
- Mastery of the content knowledge students will use for teaching a subject
- Ability to impact learning of P-12 students through course work and field experiences
- Knowledge of education governance and about careers in teaching

Potential Occupations

Examples include: public or private school teacher, principal, staff developer, educational sales, school counselor, school social worker,
school occupational therapist, curriculum specialist, human resources
trainer, post-secondary teacher, and early childhood center director.

One of the most important ways to help people and to impact our society
is through involvement in public and private schools. Teachers make
lasting contributions to our nation and its many generations of learners.
Teacher education programs at CSU serve the needs of individuals
preparing to teach in most secondary areas, K-12 art, foreign languages,
instructional technology, and music, or early childhood education.
CSU is one of the public institutions in Colorado designated to offer
programs leading towards a career and technical (vocational) credential.
Candidates for teacher licensure are skilled in a teaching concentration
and proficient in educational methodology. These students take their
professional education course work concurrently while completing
their subject matter courses. Candidates may complete licensure while
enrolled in an undergraduate program or after completing a bachelor’s
degree at an accredited university.

Approved Majors for Teacher Endorsements

At CSU, the following are the approved majors for each endorsement
area. Undergraduate teacher licensure candidates must be majoring in
one of the approved majors that align with their endorsement area for
admission to the teacher preparation program.

**Admission to Teacher Licensure**

Students who wish to pursue an endorsement program should apply for admission to the Teacher Preparation Program in the Center for Educator Preparation. Formal admission to the Teacher Preparation Program is based upon completion of a minimum of 30 semester credits and successful completion of the following:
• Submission of written application
• Submission of reference forms
• Field experience documentation (20 hour form)
• 2.75 cumulative GPA; 3.00 GPA for admission to the social studies endorsement
• Evidence of oral English proficiency
• Background check (fingerprinting using CDE forms/process)
• Successful completion of Phase I education courses
• Verification of lawful presence

(Note: Admission requirements are subject to change based on program and state licensing requirements and laws.)

Detailed information about the admission process and specific deadline dates for admission are available in the Center for Educator Preparation (http://www.cep.chhs.colostate.edu) Advising Center, Education Building, Room 111.

Student Teaching
Teacher licensure candidates apply for student teaching placement one semester before student teaching. Candidates must pass the state teacher’s exam in their respective teaching area by mid-April or mid-October before the student teaching experience. Additionally, candidates must demonstrate acceptable professional, personal, and academic fitness. Student teaching must be completed at an approved school. Placement is contingent upon acceptance of the student by a school system. All assignments are made by CSU. The experience is full time for the specific time period.

Requirements for Licensure
Colorado licensure requires completion of an approved program and the recommendation of the institution at which the program was completed. The Co-Chairs and Student Teaching Coordinator in the Center for Educator Preparation serve as the licensure officers for CSU. Additional requirements of the Colorado Department of Education and the Colorado Department of Higher Education include the successful completion of the state teacher’s exam. Successful completion of the approved teacher preparation program at CSU does not guarantee successful completion of the teacher’s exam. The Center for Educator Preparation does not assume responsibility for the successful completion of the teacher’s exam.

CSU’s approved program requirements include completion of a baccalaureate degree, completion of course work in general education, content area, and professional education, and fulfillment meeting the Colorado Performance Based Standards for teachers at the proficient or advanced proficient level. Additionally, all grades in professional education and content courses must be a C or better for licensing. The minimum scholastic average acceptable for completion of the Teacher Preparation Program and recommendation for licensing is 2.75 computed for all course work, except for social studies where a 3.00 GPA is required.

CSU reserves the right to not recommend a student for licensure on the basis of unacceptable professional, personal, and academic fitness/performance.

Professional Education Coursework for Licensure
The professional education requirements listed below apply to all teaching endorsement areas except early childhood education where EDUC 400, EDUC 425, and EDUC 426 are required in place of EDUC 350, EDUC 386, EDUC 450, and EDUC 486E. Additional courses may be required by specific endorsement areas. For clarification, refer to individual coursework check sheets which can be obtained in the Education Building, Room 111, and online (http://www.cep.chhs.colostate.edu).

Candidates in all endorsement areas must complete appropriate methods courses the semester prior to enrolling in student teaching.

Career and Technical Education
Individuals desiring to teach in or administer career and technical programs in the state of Colorado must qualify for a credential in addition to a teaching license. Those who plan to qualify as career and technical education (CTE) teachers or directors must meet the requirements for a CTE credential established by the Community Colleges of Colorado and the Colorado Department of Education. Credentialing questions may be directed to the Department of Education, (303) 866-6628.

Professional Education Course Requirements
The professional education course requirements listed under Professional Education Coursework for Licensure apply to all teaching endorsement areas in career and technical education.

Agricultural Education
Kellie Enns, Ph.D., Program Chair

Candidates studying Agricultural Education are prepared to teach youth and adults in high schools, community colleges, junior colleges, area career and technical schools, and technical institutes. Two thousand hours in the agriculture industry are required in addition to completion of the agriculture curriculum and professional education courses.

For the detailed four-year curriculum, refer to the College of Agricultural Sciences, Department of Agricultural and Resource Economics, major in Agricultural Education, or contact the Center for Educator Preparation Advising Center in the Education Building, Room 111.

Family and Consumer Sciences
Dawn Mallette, Ph.D., Program Chair

Candidates majoring in Family and Consumer Sciences with a concentration in Family and Consumer Sciences Education are prepared to be employed as teachers in middle schools, junior or senior high schools, community and junior colleges, area career and technical schools, and technical institutes.

For the detailed four-year curriculum, refer to the interdepartmental major in Family and Consumer Sciences, Family and Consumer Sciences Education concentration, under the School of Education.

Technology Education
Michael A. De Miranda, Ph.D., Program Chair
The B.S. degree program in Engineering Science with an Engineering Education concentration provides students with opportunities to enter junior and senior high school laboratories to teach engineering design principles and concepts in an exciting engineering and technology education classroom. The program consists of a balanced mix of mathematics, science, and engineering courses with additional professional education courses in the Center for Educator Preparation leading to a B.S. degree in Engineering Science and teacher licensure in Technology Education (Engineering). For details see http://www.engr.colostate.edu/students/future-students/teachengineering/index.php

For the detailed degree and licensure curriculum, refer to the major in Engineering Science, Teacher Education concentration, in the College of Engineering.

The School of Education offers graduate programs leading to a Master of Education in Education and Human Resource Studies, a Master of Science in Student Affairs in Higher Education, and a Doctor of Philosophy degree in Education and Human Resource Studies.

Master of Education specializations are available in Adult Education and Training; Counseling and Career Development which is approved by the Council for Accreditation of Counseling and Related Educational Programs; Education Sciences; and Organizational Learning, Performance and Change.

The Master of Science degree in Student Affairs in Higher Education follows the Council for the Advancement of Standards in higher education.

Doctoral degree specializations are available in Education Sciences; Higher Education Leadership; Organizational Learning, Performance and Change; and School Leadership.

Regional Graduate Program status has been given to the doctoral degree by the Western Interstate Commission on Higher Education (WICHE). This arrangement, approved by the State of Colorado, permits citizens of other states to pay resident tuition rates under certain conditions. Contact the School of Education for further details.

Non-degree programs are also available that lead to licensure/credential/endorsement as a school principal.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the School of Education. (http://soe.chhs.colostate.edu)

The Center for Educator Preparation (CEP) (http://cep.chhs.colostate.edu) is the office at CSU responsible for licensure of K-12 teachers in 15 content areas, and of public school principals, K-12.

Major in Family and Consumer Sciences

Family and Consumer Sciences is an exciting field with many career opportunities. The mission of this interdepartmental major prepares professionals dedicated to enhancing the well-being of individuals and families and the communities and environments in which they function.

Students graduate with an interdisciplinary perspective about the challenges encountered by consumers and families. Family and Consumer Sciences students attain skills to assist families and consumers with quality of life decisions and challenges related to interpersonal/human relationships, consumer and financial resource management, personal development, nutrition and wellness, and balancing family and work. This program emphasizes management and problem solving skills needed to be a responsible and productive individual, family member, and worker. Students take course work primarily in Family and Consumer Sciences and in the Departments of Human Development and Family Studies, Food Science and Human Nutrition, and Design and Merchandising.

Students have the option of the Family and Consumer Sciences concentration or the Family and Consumer Sciences Education concentration. Graduates qualify to sit for the examination to be certified in Family and Consumer Sciences (CFCS) with the American Association of Family and Consumer Sciences.

Learning Goals

Students will:

• demonstrate an understanding and comprehension of the family and consumer sciences body of knowledge
• demonstrate, at a professional level, oral and written communication and problem solving proficiency within Family and Consumer Sciences
• demonstrate synthesis and integration of the specialized Family and Consumer Sciences body of knowledge through an engaged learning experience

### Major in Family and Consumer Sciences, Family and Consumer Sciences Education Concentration

Family and Consumer Sciences Education directly addresses the needs of youth, families, and consumers. Helping to shape the future, teachers of family and consumer sciences impact the lives of individuals, the health of families, and the welfare of society.

The Education concentration has as its mission to teach and model best educational practices to prepare emerging teachers as learners, collaborators, and leaders. The Family and Consumer Sciences licensure program includes general education courses, subject matter courses, and teacher preparation courses.

Students apply for the licensure program in their junior year and participate in practicum experiences working closely with classroom teachers and students in area schools. Throughout the phases of the licensure program, teacher candidates are placed in a middle school and a high school where they apply professional knowledge and refine...
their instructional skills. While student teaching, they work closely with a Family and Consumer Sciences mentor teacher(s) and a university professor(s).

Teacher candidates completing the program meet the requirements for the Bachelor of Science degree in Family and Consumer Sciences, a Colorado Initial Teaching License in Family and Consumer Sciences, and a Family and Consumer Sciences Career and Technical Education endorsement (1200 hours of paid work experience related to FCS is required for the CTE endorsement).

This concentration is accredited and approved by the Colorado Department of Higher Education (CDHE) and the Colorado Department of Education (CDE). Nationally, it is approved by the Teacher Education Accreditation Council.

Students interested in pursuing a teaching license through CSU may refer to the School of Education section in this chapter for general information. Detailed information about the Center for Educator Preparation (CEP) (http://cep.chhs.colostate.edu) program and licensure requirements is available in the Education Building, Room 111.

Course Description: Cost control for food, beverage, and labor in the hospitality industry.
Prerequisite: ACT 205 and CS 110.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

RRM 350 Restaurant and Resort Marketing Credits: 3 (3-0-0)
Course Description: Restaurant and resort operations marketing, including planning, promotion, and special industry considerations.
Prerequisite: RRM 101.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

RRM 386 Practicum Credits: 3 (0-0-9)
Course Description: Practicum in Hospitality Management.
Prerequisite: RRM 101.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U Sat/Unsat Only.
Special Course Fee: No.

RRM 400 Food and Society Credits: 3 (2-0-1)
Course Description: Exploration of the influence of food, dining, and nutrition on cultural aspects of the human experience.
Prerequisite: (SOC 100 or PSY 100) and (AMST 100 or AMST 101 or ANTH 140 or NR 320 or HIST 252 or HIST 255 or ETST 250 or ETST 252 or ETST 255 or HIST 101 or HIST 150 or HIST 151 or HIST 171 or HIST 250 or HIST 121) and (AGRI 270 or HIST 170 or AM 250 or ANTH 200 or LJPN 250 or LB 170 or LB 171 or ETST 100 or PHIL 170 or SA 482 or E 238 or E 245 or HIST 100 or ETST 205 or ETST 253 or ETST 256 or PF 110 or HIST 115 or HIST 120 or IE 116 or IE 270 or IE 370 or HORT 171 or SOC 171 or SOC 205 or POLS 232 or POLS 131 or POLS 241 or ECON 211 or LCHI 250 or LARA 250 or LFRE 250 or LGER 250 or LRUS 250 or LSPA 250 or AGRI 116).
Registration Information: Must register for lecture and recitation.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

RRM 415 Catering Techniques and Culinary Arts Credits: 3 (0-6-0)
Course Description: Management of advanced techniques in culinary technique; catering of food and beverages for special functions.
Prerequisite: RRM 311.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: Yes.

RRM 450 Leadership in the Hospitality Industry Credits: 3 (3-0-0)
Course Description: Exploration of leadership skills, their relationship to ethics through self-analysis, and leading change in the hospitality industry.
Prerequisite: RRM 310 and MGT 305.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

RRM 460 Event and Conference Planning Credits: 3 (3-0-0)
Also Offered As: NRRT 460.
Course Description: Foundation in planning, organizing, and producing special events and conferences. Functions and strategies for effective event management.
Prerequisite: NRRT 270 or RRM 101.
Registration Information: Credit not allowed for both RRM 460 and NRRT 460.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

RRM 487 Internship: Hospitality Management Credits: 3 (0-0-9)
Course Description: Applying and synthesizing service knowledge and management functions; project discussions, benchmark presentations, execution of a capstone project.
Prerequisite: MKT 305.
Terms Offered: Fall, Spring.
Grade Mode: Instructor Option.
Special Course Fee: Yes.
RRM 500 Understanding Food Credits: 3 (3-0-0)
Course Description: Role of food in the creation of identity, as a driver of technology, and the prominent role food plays in the media.
Prerequisite: RRM 400.
Registration Information: RRM 400 or admission to the GPldea M.S. in Dietetics program.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

RRM 510 Foodservice Management Credits: 2 (1-0-1)
Course Description: Analysis of a wide variety of foodservice operations, including procurement, forecasting, operational design, and menu planning.
Prerequisite: NRRT 402 or NRRT 471.
Registration Information: This is a partial-semester course.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

RRM 520 Lodging Management Credits: 2 (1-0-1)
Course Description: Operating standards and practices essential to the profitability of a hotel, lodging, and accommodation enterprise.
Prerequisite: NRRT 442 or NRRT 471.
Registration Information: This is a partial-semester course.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

RRM 604 Research Methods in Food and Nutrition Credits: 3 (3-0-0)
Course Description: Research techniques used in food and nutrition disciplines. Emphasis on design, preparation, and evaluation of research.
Prerequisite: EDRM 606 or STAT 301 or STAT 311.
Restriction: Must be a: Graduate, Professional.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

RRM 686 Practicum-Food Service Management Credit: 1 (0-4-0)
Course Description: Food production, menu planning, nutritional analysis and food costing.
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

Major in Fermentation Science and Technology
Fermentation Science and Technology (http://www.fshn.chhs.colostate.edu/students/undergraduate/fermentation-

Effective Fall 2015
Freshman

Select one group from the following:

Group A:
BZ 110 Principles of Animal Biology (GT-SC2) 3A
BZ 111 Animal Biology Laboratory (GT-SC1) 3A

Group B:

Learning Outcomes
Students will demonstrate:

- Ability to integrate biological and chemical processes to quality and stability of fermented foods, and to critique and effectively communicate the relationships among processing of fermented foods, nutrition, and food safety.
- Discipline specific knowledge of the skills and competencies needed in fermentation science and technology. Examples include knowledge of food chemistry, sensory evaluation of fermented products, brewing processes, refining and packaging technology, food production management, and fermentation microbiology.
- Understanding of classification, production, financial aspects, consumption, and service of controlled beverages, including effective management of facilities and people with emphasis on safe service training and management.
- Competent application of science, history, culture, safety, health, and nutrition dimensions of fermented foods and beverages.

Potential Occupations
Partnerships with industry help provide field experience and internships for majors in Fermentation Science and Technology. The food industry is the largest in the world and fermentation science is a rapidly emerging area so the future is promising. Examples of careers include fermentation scientist, food scientist, food technologist, food health inspector, food safety specialist, brewer, biotechnologist, quality control analyst, sensory analyst, food microbiologist, or entrepreneur.

Major in Hospitality Management

The Hospitality Management major combines courses in food service, lodging, event planning, nutrition, and business to provide students with a strong skill set for entry into hospitality professions. Elective credits allow students to take courses in areas of interest to enhance their education. The curriculum has a strong emphasis on management skills required for success in the hospitality industry.

The Hospitality Management program maintains strong ties with the foodservice, lodging, and event planning industries locally, state-wide, and nationally to connect graduates with a wide variety of employment opportunities in the expanding commercial and non-commercial segments of the hospitality management industry. The hospitality industry is the second largest employer in Colorado and the United States. The department oversees internships in the industry and aids in job placement upon graduation.

Learning Outcomes

Students will demonstrate:

- A conceptual understanding and systems approach to the business of hospitality management.
- The ability to make logical decisions by organizing, analyzing, and interpreting information and formulating rational solutions in a hospitality business environment.
- The knowledge and skills to successfully manage a hospitality operation, including allocating resources such as time, labor, and material inputs to achieve customer satisfaction.
- An understanding of the managerial functions of planning, organizing, directing, staffing, controlling, and budgeting in various hospitality environments.
- The behaviors of effective, ethical leaders by demonstrating the fundamental principles of leadership in a hospitality business environment.

Potential Occupations

Participation in the experiential learning laboratory, The Aspen Grille, and internship opportunities are highly recommended to enhance practical training and development. The hospitality industry encompasses careers in restaurants, hotels, resorts, spas, event venues, catering, breweries and wineries, bed and breakfast inns, ski areas, business and industry dining venues, hospitals, correctional facilities, and military facilities in the United States and around the world.

Examples of careers include, but are not limited to: restaurant managers, caterers, event planners, wedding planners, banquet managers, hotel sales and marketing, hotel guest operations, hospitality real estate acquisition, hotel manager, food writing and media, brewery hospitality operations, commercial wine and liquor sales, chef, purchasing agent, conference coordinator, guest service agent, tourist attraction manager, spa operations manager, housekeeping manager, time share sales and marketing, bed & breakfast owner/manager, travel agent, school food service manager, hospitality food and equipment sales representative, health inspector, hospital food service manager, food importer, and country club manager.

1. Select one course each from the list in category 3D and 3E and two courses from category 3B of the All-University Core Curriculum (AUCC). A total of 12 credits must be selected.

2. Select enough elective credits to bring the program total to 120, of which a minimum of 42 credits must be upper-division (300- to 400-level). At least 3 elective credits must be upper-division.

Major Completion Map

Distinctive Requirements for Degree Program:
Students should maintain 2.500 GPA by the end of Sophomore year. Students may substitute RRM 415 for RRM 340, and should discuss their desired choice with faculty or advisor the end of Freshman year. Hospitality Management students may also take RRM 487 Hospitality Internship, or RRM 386 Work Practicum which requires attendance at an internship meeting by end of Sophomore year.

Major in Nutrition and Food Science

Public interest regarding the importance of nutrition to health and fitness is at a high level and increasing. The Nutrition and Food Science major involves integration of the biological, medical, and social sciences and their application to the improvement of human nutrition and fitness, prevention of chronic disease, and improved quality of life. The major is both science and human service oriented.

Nutrition and Food Science graduates gain a scientific understanding of the principles of human nutrition, the role of nutrition in the prevention and management of disease, delivery of nutritional care, and the principles of nutrition assessment and food preparation. Additionally, graduates know the techniques of interviewing, counseling, information management, and effective communication.

Four concentrations are currently available in this major – Dietetics and Nutrition Management, Nutrition and Fitness, Nutritional Sciences (pre-med), and Food Safety and Nutrition.

Learning Outcomes

Students will demonstrate:
Colorado State University 611

• Ability to identify nutrition-related public health problems, integrate information from basic nutrition sciences, critically analyze data, and develop appropriate conclusions
• Discipline-specific knowledge, skills, and competencies needed in the field of dietetics and nutrition. Examples include knowledge of medical nutrition therapy; nutrition and metabolism; program planning, monitoring, and evaluation; management in school nutrition programs and long-term care; food safety; and the role of food in the promotion of health
• Competent application of nutrition knowledge and skills in a work environment, including an ability to calculate and/or define diets for various health/disease conditions, screen individuals for nutritional risk, determine nutrient requirements across the lifespan, and calculate enteral and parental nutrition formulations; determine costs of services/operations, interpret financial data, and prepare a budget

(See Dietetics and Nutrition Management concentration [http://fshn.chhs.colostate.edu/students/undergraduate/nutrition-food-science/dietetics.aspx] on website for specific learning outcomes for the ACEND accredited dietetics program).

Potential Occupations
Participation in community outreach, internships, volunteer activities, or cooperative education opportunities is highly recommended to enhance career planning, skills, and development. Graduates who go on for advanced studies can attain more responsible leadership positions with the possibility of rising to top professional levels.

Some examples of career opportunities include, but are not limited to: dietitian or nutritionist in health care, hospitals, long-term care, schools, state or county health agencies, health clubs, corporate wellness programs, grocery stores/food chains, or private practice; community nutritionist; biomedical scientist; restaurant manager; caterer; quality assurance specialist; food scientist; food inspector; food technologist, food plant manager; food service manager in hospitals, schools, or long-term care. The median salary for Registered Dietitians is $49,500 – the range is $38,976–$64,993.

Students interested in teaching nutrition and/or food science content at the secondary education level should explore the interdepartmental concentration in Family and Consumer Sciences Education at the beginning of this college section. The Family and Consumer Sciences Education concentration allows students to combine their interests in nutrition, wellness/health, food science, culinary arts, and/or catering with teaching. Family and Consumer Sciences Education students take course work in the Department of Food Science and Human Nutrition, Design and Merchandising, and Human Development and Family Studies as well as complete an education sequence which qualifies them for a secondary teaching license. The demand for secondary family and consumer sciences teachers exceeds the supply in Colorado as well as nationally. Therefore, job placement is extremely high with starting salaries in the $34,000–$37,000 range for a nine-month teaching position.

Students may choose from among four concentrations under the Nutrition and Food Science major.

Major in Nutrition and Food Science, Dietetics and Nutrition Management Concentration

The Dietetics and Nutrition Management concentration provides a broad background in clinical nutrition, health promotion, and food service management. The science-based curriculum includes nutritional assessment, application of food theory, and course work focusing on nutritional counseling and medical nutrition therapy. The concentration is designed to prepare students for a dietetic internship and a professional career in medical nutrition therapy or community-based nutrition programs. The Accredited Didactic Program option of the Dietetics and Nutrition Management concentration is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND). This concentration is open to all students interested in becoming registered dietitians. However, students must qualify to continue in the Accredited Didactic Program option by meeting the prerequisites for the Dietetic Practice Seminar (FSHN 392) in their junior year. These prerequisites are an overall GPA of 3.0 and grades of "B" or better in FSHN 150, FSHN 300/FSHN 301, and basic sciences (CHEM 107/CHEM 108, or CHEM 111, CHEM 112, CHEM 113; CHEM 245, CHEM 246; LIFE 102 or BZ 110, BZ 111; BMS 300, BMS 302, FSHN 150; FSHN 300, FSHN 301). Students who do not meet these requirements are encouraged to exercise their repeat/delete options in those courses which are lower than a “B” grade if they wish to be considered for the Accredited Didactic Program option. The Childhood Nutrition option prepares students for supervisory positions in the school nutrition program. The Gerontology Nutrition option prepares students for supervisory positions in food service management in long-term care and rehabilitation or for working with community programs providing nutrition services to older individuals.

Requirements
**Effective Fall 2015**

Admission to the Accredited Didactic Program requires a minimum 3.0 GPA and grades of B or better in LIFE 102, CHEM 107 and CHEM 108, or CHEM 111, CHEM 112, and CHEM 113; CHEM 245, CHEM 246, BMS 300, BMS 302, FSHN 150, FSHN 300, and FSHN 301.¹

1. Select one course each from the lists of courses in categories 3D and 3E, and two courses from category 3B of the All-University Core Curriculum (AUCC), for a total of 12 credits. Only 3 of the 6 credits required for Arts and Humanities may come from intermediate (L*** 200 and L*** 201) foreign language courses.

2. Select enough elective credits to bring the program to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

---

1. Select one course each from the lists in categories 3D and 3E, and two courses from category 3B of the All-University Core Curriculum (AUCC), for a total of 12 credits.

2. Select enough elective credits to bring the program to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Students may complete this major/option at 120 credits by selecting CHEM 107, CHEM 108, and BUS 150 in the freshman year. Students wishing to complete the Gerontology Interdisciplinary Minor should consult with advisors about course selection. Completion of the major/option and the minor will exceed the 120 credit total.

**Major in Nutrition and Food Science, Food Safety and Nutrition Concentration**

The Food Safety and Nutrition concentration blends a strong science base with courses in food science, food safety, food microbiology, and nutrition. The curriculum prepares students for employment in the food industry or in government in such areas as quality assurance, product development, research, food inspection, sensory evaluation, and consumer education. The concentration also provides an excellent background for a graduate program. Students in the concentration are encouraged to participate in the interdisciplinary minor in Food Science/Safety to further their understanding of the continuum of responsibility shared through the food system in ensuring that food is safe and healthful. By addition of several elective courses, students can also meet ACEND (http://www.eatrightacend.org/ACEND) course requirements.

Major in Nutrition and Food Science, Nutrition and Fitness Concentration

The nutrition and fitness concentration prepares students for employment as nutrition and fitness counselors and personal lifestyle coaches in health care settings, commercial establishments, public health settings, or private practice. The curriculum blends a strong science base with course work in exercise science, nutrition, teaching, and counseling. The concentration also provides an excellent background for a graduate program. By the addition of several elective courses, students can meet ACEND didactic course requirements if they meet requirements for FSHN 392.

Requirements

Effective Spring 2014

Freshman

Select one group from the following:

Group A:
- BZ 110 Principles of Animal Biology (GT-SC2) 3A
- BZ 111 Animal Biology Laboratory (GT-SC1) 3A

Group B:
- LIFE 102 Attributes of Living Systems (GT-SC1) 3A

Major in Nutrition and Food Science, Nutritional Sciences Concentration

The Nutritional Sciences concentration provides a strong background in natural and biomedical sciences and nutrition, making it an appropriate preparation for graduate study, medical school, or a career in nutritional research, biomedical research, or college teaching. This concentration forms the basis for a pre-medical professional program. By addition of several elective courses, students can meet ACEND course requirements if they meet requirements for FSHN 392.

Minor in Nutrition

This minor provides an opportunity for a non-major to gain a significant orientation to a food, nutrition, and health-related field. The courses in the minor in Nutrition have a significant number of prerequisites that should be examined carefully before selecting the minor. Although open to any interested student, the Nutrition minor would be most easily taken by students majoring in a life science discipline such as biology or health and exercise science.

Requirements
Effective Fall 2004

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Department of Health and Exercise Science

Undergraduate Majors

- Major in Health and Exercise Science
Graduate Programs in Health and Exercise Science

The department offers two graduate degrees: the Master of Science in Health and Exercise Science, and the Doctor of Philosophy in Human Bioenergetics. Students interested in a Master’s degree in Public Health with a focus in Health and Exercise Science can refer to the School of Public Health (http://publichealth.colostate.edu). Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Health and Exercise Science (http://hes.chhs.colostate.edu).

Master Programs

- Master of Science in Health and Exercise Science, Plan A
- Master of Science in Health and Exercise Science, Plan B
- Master of Science in Health and Exercise Science, Plan A, Exercise Science and Nutrition Specialization

Ph.D.

- Ph.D. in Human Bioenergetics

Courses

Health and Exercise Science (HES)

HES 100A Beginning Physical Education: Aerobic Exercise  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100B Beginning Physical Education: Beginning Ice Skating  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U Sat/Unsat Only.
Special Course Fee: No.

HES 100C Beginning Physical Education: Soccer  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100D Beginning Physical Education: Self-Defense  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100E Beginning Physical Education: Tennis  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.

Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100H Beginning Physical Education: Basketball  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100I Beginning Physical Education: Racquetball  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100J Beginning Physical Education: Volleyball  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100K Beginning Physical Education: Swimming  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100L Beginning Physical Education: Golf  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100M Beginning Physical Education: Basketball  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100N Beginning Physical Education: Racquetball  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100O Beginning Physical Education: Weight Training  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 100P Beginning Physical Education: Ice Skating  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U Sat/Unsat Only.
Special Course Fee: No.

HES 100Q Beginning Physical Education: Aquatic Conditioning  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.
HES 102C  Physical Education Activities: Special Activities  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U Sat/Unsat Only.
Special Course Fee: No.

HES 102D  Physical Education Activities: Advanced Swimming  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.

HES 102F  Physical Education Activities: Conditioning and Fitness  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

HES 102G  Physical Education Activities: Athletics  Credit: 1 (0-3-0)
Course Description: Physical activities for the development of personal motor skills.
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: S/U Sat/Unsat Only.
Special Course Fee: No.

HES 120  Introduction to Health and Exercise Science  Credit: 1 (1-0-0)
Course Description: Health and Exercise Science major, career options, campus resources, tools for academic success, various health-related topics.
Prerequisite: None.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

HES 145  Health and Wellness  Credits: 3 (3-0-0)
Course Description: Personal health behaviors and personal choice in response to wellness.
Prerequisite: None.
Registration Information: Credit not allowed for both HES 145 and HES 143. Sections may be offered: Online.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

HES 207  Anatomical Kinesiology  Credits: 3 (2-2-0)
Course Description: Anatomical, physiological, and mechanical fundamentals of human movement.
Prerequisite: MATH 125, may be taken concurrently.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

HES 232  Techniques of Teaching Group Exercise  Credit: 1 (0-2-0)
Course Description: Learn practical skills for the instruction of various group fitness activities. Emphasis is on physiological principles related to group fitness, as well as choreography, safety, and modifications for diverse populations and current trends.
Prerequisite: HES 207.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

HES 232A  Techniques of Teaching Physical Activity: Weight Training  Credit: 1 (0-2-0)
Course Description: Practical and theoretical aspects of teaching individual sports with special emphasis on materials, teaching techniques, and analyzing skills.
Prerequisite: None.
Terms Offered: Fall, Spring.

HES 240  First Aid and Emergency Care  Credits: 2 (1-2-0)
Course Description: Principles, applied techniques emphasizing emergency rescue and care. Meets requirements for Red Cross Advanced First Aid and Emergency Care Credential.
Prerequisite: None.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

HES 303  Biomechanics and Neurophysiology  Credits: 3 (3-0-0)
Course Description: Study and elementary analysis of human motion based on anatomical, neurophysiological, and mechanical principles.
Prerequisite: HES 207.

HES 307  Biomechanical Principles of Human Movement  Credits: 4 (3-2-0)
Course Description: Study and elementary analysis of human motion based on anatomical and mechanical principles.
Prerequisite: (HES 207 or BMS 301) and (PH 121 or PH 141).
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

HES 309  Methods of Coaching  Credits: 2 (2-0-0)
Course Description: Preparation to coach in an interscholastic athletic situation.
Prerequisite: None.
Registration Information: Sections may be offered: Online.
Term Offered: Summer.
Grade Mode: Traditional.
Special Course Fee: No.
HES 319 Neuromuscular Aspects of Human Movement Credits: 4 (3-2-0)
Course Description: Neuromuscular anatomy and physiology of human movement. Applied/integrated topics: aging, muscle fatigue, training, force control, and neuromuscular disease.
Prerequisite: BMS 300 and HES 207.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

HES 332F Techniques of Teaching Individual Sports: Weight Training Credit: 1 (0-2-0)
Course Description: Practical and theoretical aspects of teaching weight training with special emphasis on materials, teaching techniques, and analyzing skills.
Prerequisite: None.
Registration Information: Corresponding laboratory or competency in area.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

HES 332H Techniques of Teaching Individual Sports: Aerobics Credit: 1 (0-2-0)
Course Description: Practical and theoretical aspects of teaching aerobics with special emphasis on materials, teaching techniques, and analyzing skills.
Prerequisite: None.
Registration Information: Corresponding laboratory or competency in area.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

HES 340 Exercise Prescription Credits: 3 (2-0-0)
Course Description: Theory and practice of exercise prescription for healthy individuals, cardiac patients, and other special populations according to the American College of Sports Medicine (ACSM) guidelines. Includes the practice of proper lifting and spotting techniques, manipulation of training variables, and design of safe, effective, and efficient individual workout programs.
Prerequisite: BMS 300 with a minimum grade of C and FSHN 150 with a minimum grade of C and HES 145 with a minimum grade of C and HES 207 with a minimum grade of C.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

HES 345 Population Health and Disease Prevention Credits: 3 (3-0-0)
Course Description: Causes of disease throughout the lifespan and interventions designed to prevent disease.
Prerequisite: HES 145.
Registration Information: Sections may be offered: Online.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

HES 354 Theory of Health Behavior Credits: 3 (3-0-0)
Course Description: Health behavior (HB) theories and their application to health promotion (HP) programs. Multi-level factors that interactively impact human HBs, theoretical foundations for these factors, and the relationship between HBs & selected health outcomes. Discuss application of HB theories, and examine HP programs that have applied these theories in different settings and high risk populations.
Prerequisite: HES 145 or PSY 100.
Registration Information: Junior standing.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

HES 355 Integration of Health Behaviors Credits: 3 (3-0-0)
Course Description: Designed to guide students in applying their knowledge of health behavior change to individuals with various health challenges. Explores a variety of health topics including understanding stress and coping and managing stress, behavioral factors in chronic disease, and behavioral health.
Prerequisite: HES 340 and HES 354.
Registration Information: Completion of 60 credits.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

HES 379 Psychology and Sport Credits: 3 (3-0-0)
Course Description: Psychological and social implications involved in teaching physical education and coaching athletics.
Prerequisite: PSY 100 and HES 145 with a minimum grade of C and HES 207 with a minimum grade of C and BMS 300 with a minimum grade of C.
Registration Information: Must have taken the following courses and maintained a minimum GPA of 2.500 in them: HES 145; HES 207; BMS 300.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

HES 386 Practicum–Adult Fitness Credits: 2 (1-2-0)
Course Description: Adult fitness.
Prerequisite: HES 232 and HES 340 with a minimum grade of C.
Registration Information: Must have earned a cumulative 2.750 GPA in: BMS 300, FSHN 150, HES 145, and HES 207. Must register for lecture and laboratory.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

HES 403 Physiology of Exercise Credits: 4 (3-2-0)
Course Description: Effects of exercise on tissues, organs, and systems of the body.
Prerequisite: (BMS 300 or BMS 360) and (LIFE 102).
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: Yes.

HES 405 Exercise Testing Instrumentation Credits: 2 (1-2-0)
Course Description: Theory and operation of devices commonly employed in quantifying factors related to exercise.
Prerequisite: HES 403.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: Yes.
HES 410  Bioethics: Concepts and Controversies  Credits: 3 (2-0-1)
Course Description: Origins of bioethics and analysis of cases/controversies in contemporary bioethics.
Prerequisite: PHIL 205.
Registration Information: PHIL 205 or 7 credits of AUCC-science category 3A.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

HES 420  Electrocardiography and Exercise Management  Credits: 3 (2-2-0)
Course Description: Interpretation of 12-lead ECG tracings, administering exercise tests, and prescribing exercise program for healthy individuals and special populations.
Prerequisite: BMS 300.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: Yes.

HES 434  Physical Activity Throughout the Lifespan  Credits: 3 (3-0-0)
Course Description: Impact of physical activity on biology and physiology of human development and aging processes.
Prerequisite: BMS 300.
Registration Information: Credit not allowed for both HES 434 and HES 444.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

HES 444  Successful Aging: Role of Physical Activity  Credits: 2 (2-0-0)
Course Description: Biology and physiology of healthy aging and impact of disease and physical activity on aging processes.
Prerequisite: LIFE 102 or BZ 110.
Registration Information: Sections may be offered: Online.
Terms Offered: Fall, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

HES 455  Health Promotion Programming  Credits: 3 (3-0-0)
Course Description: Investigation of established health promotion programs with special emphasis on design, implementation, and evaluation of programming models.
Prerequisite: HES 355 and HES 386A and HES 403.
Registration Information: Senior standing. Credit not allowed for both HES 455 and HES 456.
Terms Offered: Fall, Spring (every third year).
Grade Mode: Traditional.
Special Course Fee: No.

HES 476  Exercise and Chronic Disease  Credits: 3 (3-0-0)
Course Description: Interaction of physical activity with pathophysiology and treatment of chronic diseases and conditions.
Prerequisite: BC 351 and FSHN 350 and HES 403.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

HES 484  Supervised College Teaching  Credits: Var[1-5] (0-0-0)
Course Description:
Prerequisite: None.
Registration Information: Maximum of 10 credits allowed in course. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

HES 486A  Practicum: Adaptive Correctives  Credits: Var[1-3] (0-0-0)
Course Description:
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

HES 486B  Practicum: Wellness Program Management  Credits: Var[1-3] (0-0-0)
Course Description:
Prerequisite: HES 386B and BMS 300 with a minimum grade of C and HES 145 with a minimum grade of C and HES 207 with a minimum grade of C and FSHN 150 with a minimum grade of C.
Registration Information: 2.5 GPA.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

HES 486C  Practicum: Coaching  Credits: Var[1-3] (0-0-0)
Course Description:
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

HES 487  Internship  Credits: 15 (0-0-40)
Course Description: Practical application of knowledge and skills in a professional situation.
Prerequisite: HES 486B and BMS 300 with a minimum grade of C and HES 145 with a minimum grade of C and HES 207 with a minimum grade of C and FSHN 150 with a minimum grade of C.
Registration Information: 2.5 GPA.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

HES 492  Health and Exercise Science Seminar  Credits: 3 (0-0-3)
Course Description: Integration and reflection on health and exercise science disciplinary knowledge.
Prerequisite: None.
Registration Information: Senior standing.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

HES 495A  Independent Study: Health  Credits: Var[1-18] (0-0-0)
Course Description:
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

Major in Health and Exercise Science
Students may choose from two concentrations offered in the Health and Exercise Science major—Health Promotion or Sports Medicine.

Learning Outcomes
Students will demonstrate:
• Practical knowledge and skills (stress/fitness testing, leadership, administrative, teaching/communication, customer service, and professional attitude) in exercise science and health promotion through laboratory and/or practicum and internship experiences
• Ability to synthesize, integrate, apply, and communicate health and exercise science disciplinary knowledge through structured written assignments and oral presentations
• Skills and knowledge required to successfully compete for employment within the discipline or compete for graduate or professional school placement

Potential Occupations
The United States and other developed countries are struggling with an aging and increasingly unhealthy population. Understanding the role of physical activity in preventing and treating disease and maintaining optimal health at any age is critical. Graduates trained in the foundations of human movement such as physiology, anatomy, biomechanics and neurophysiology, AND the ability to apply this knowledge to enhance the health, well-being and functional performance of the public, will be in high demand.

We take pride in training students in Health and Exercise Science to be strong critical thinkers who can express themselves clearly in written and oral form, view the world from multiple perspectives and are models of professional behavior and citizenship: qualities that will serve them well in any career they choose to pursue. Graduates that follow the Health Promotion track also acquire theoretical and hands-on training that makes them competitive for career opportunities in a wide variety of areas including, but not limited to: corporate fitness/wellness, community health/wellness, public health, health behavior change, exercise technicians, cardiac rehabilitation, personal trainers, group exercise/fitness instructors, fitness/medical equipment sales, and recreation directors. In the Sports Medicine track, graduates acquire more grounding in foundations of human movement. This training provides excellent preparation for the further education required for careers as physicians, physical therapists, college professors, physician assistants, occupational therapists, molecular imaging, and respiratory therapists.

Concentrations
• Health Promotion Concentration
• Sports Medicine Concentration

Major in Health and Exercise Science, Health Promotion Concentration
A concentration in Health Promotion provides content and experience in promoting positive health behaviors, such as physical activity, weight management, stress management, smoking cessation, and ergonomics, to name a few. Students are prepared for numerous careers in a variety of allied health fields. Specifically, graduates have found employment in corporations as wellness/fitness specialists, as hospital and community health promotion directors, in insurance-based health promotion programs, medical settings, hotel wellness facilities, university health promotion centers, and in health and fitness clubs. The curriculum focuses on health promotion program development, implementation, and evaluation. Other course work includes chemistry, anatomy, physiology of exercise, marketing, advertising, accounting, and more. Students also have opportunities for practical field experiences before graduating. We are proud that the Health Promotion concentration track of the Health and Exercise Science major was ranked #1 in the country by the Association for Worksite Health Promotion.

Requirements

**Cardiac Care Internship Requirements**

Students enrolling in internships in cardiac care must take HES 420 prior to the internship. Students may use elective credits in the sophomore, junior, or senior year to do so. A minimum grade of B (3.00) is required in HES 420 prior to internship placement.

1. Students with current certification in Adult, Infant, and Child CPR; General First Aid; and AED may replace this course with 2 elective credits.
2. Students selecting an internship in cardiac care must take HES 420 prior to enrolling in the internship. See requirements and recommendations for cardiac care internships above.
3. Select enough elective credits to bring the program total to a minimum of 120-121 credits, of which at least 42 must be upper-division (300- to 400-level).

**Major Completion Map**

The Major Completion Map for this concentration will be published in the 17-18 General Catalog. Students should consult with their Advisor or visit the Department for the current Major Completion Map requirements.

**Major in Health and Exercise Science, Sports Medicine Concentration**

The Sports Medicine concentration is a preprofessional program that offers a science-based education dealing specifically with the application of the natural sciences to the study of health and exercise science.

In the Sports Medicine track, graduates acquire more grounding in foundations of human movement. This track provides excellent preparation for the further education required for careers as physicians, physical therapists, college professors, physician assistants, occupational therapists, pharmacology, molecular imaging, and respiratory therapists.

This concentration was structured for two types of students:

1. those seeking preprofessional preparation in medical fields, physical therapy, or allied health fields and
2. students planning to pursue an advanced degree (master’s and/or Ph.D.) in exercise science or related field.

Some of the courses required for this concentration include chemistry, biology, physics, anatomy, kinesiology, biomechanical principles of human movement, exercise testing, biochemistry, organic chemistry, human nutrition, and rehabilitation exercise.

1. MATH 155 or MATH 160 may be substituted for MATH 118, MATH 124 and MATH 125. You may not count MATH 155 or MATH 160 for a Sports Medicine Guided Elective if you have substituted one of these courses for MATH 118, MATH 124 & MATH 125.

2. CHEM 111/CHEM 112 can be substituted for CHEM 107/CHEM 108 and should be seriously considered by students who want to go on to graduate studies. Students should select CHEM 111/CHEM 112 as it better prepares students for CHEM 113/CHEM 114.

3. CHEM 341/CHEM 343/CHEM 344 may be substituted for CHEM 245/CHEM 246 provided that all three courses are completed.

4. Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

**Online Degree Programs**

The major in Human Development and Family Studies (HDFS) is offered in two formats, both leading to a Bachelor of Science degree. We offer on-campus classes to local degree-seeking students, and we offer distance students the HDFS degree through the Division of Continuing Education and CSU Online. The Online Bachelor of Science Degree in HDFS (http://www.online.colostate.edu/degrees/hdfs) provides a high quality university education that is flexible, convenient, and accessible for working and distance students. The courses in the online program are the same as the on-campus courses. The five concentrations are available online with only some limitations, as not all CSU courses are available online. The online Bachelor of Science degree in HDFS carries the full accreditation of CSU and is indistinguishable on student transcripts from the on-campus version of the degree. The Gerontology Interdisciplinary Minor and courses required to pursue a variety of certifications are also available online.
Gerontology Interdisciplinary Minor

The Gerontology Interdisciplinary Minor is a 21-23 credit program, housed in HDFS and available on-campus as well as online, that provides students with the opportunity to earn an undergraduate minor in gerontology. The Gerontology Interdisciplinary Minor helps students to develop an understanding of the aging process, including the biological, psychological and social aspects of adult development and aging. Admission is ongoing throughout the year. The full program may be found under University-Wide Instructional Programs.

Graduate

Graduate Programs in Human Development and Family Studies

The Department of Human Development and Family Studies offers two specializations leading to the Master of Science degree in Human Development and Family Studies (HDFS), and one doctoral program in Applied Developmental Science. The focus of the department is the development of the individual and the family throughout the lifespan. Our graduate programs provide students with an advanced understanding of human behavior and development, as well as with skills enabling them to contribute to scholarship and professional practice.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Human Development and Family Studies (http://www.hdfs.chhs.colostate.edu/students). (http://hdfs.chhs.colostate.edu/students/masters)

Master Programs

The Master of Science degree in HDFS (Plan A thesis option only) has two specializations, one in Prevention Science and one in Marriage and Family Therapy. Curricula in both programs include core courses in individual development and family theories, issues in HDFS, and research methods, as well as a research thesis.

- Master of Science in HDFS, Prevention Science Specialization
- Master of Science in HDFS, Marriage & Family Therapy Specialization

Ph.D.

- Ph.D. in Applied Developmental Science

HDFS 500. In collaboration with the Center for Educator Preparation (CEP) (http://cep.chhs.colostate.edu) within the School of Education (http://soe.chhs.colostate.edu) (SOE), the Department of Human Development and Family Studies (HDFS) (http://www.hdfs.chhs.colostate.edu) provides a competitive-entry Early Childhood Education Major requiring an application in the sophomore year for possible admission in the junior year. The
degree enables students to apply for Early Childhood teacher licensure and D (http://www.coloradoofficeofearlychildhood.com/#director-qualifications/c15f)irector Qualifi (http://www.coloradoofficeofearlychildhood.com/#director-qualifications/c15f)cation (http://www.coloradoofficeofearlychildhood.com/#director-qualifications/c15f) in the state of Colorado, and will thus qualify students to engage in a number of early childhood professions: teaching grades P-3 in public or private schools in Colorado, teaching in Head Start or other preschool or childcare programs, establishing a business as a family child care or center child care provider, or serving as director of a childcare center. An understanding of human development and family studies provides a strong foundation for students desiring a license to teach young children between the ages of 0 and 8. Knowledge of lifespan developmental processes and family systems prepares future teachers to work in partnership with parents and grandparents in educating children. Students aspiring to work with children between the ages of 0 and 8 can apply during their sophomore year to the major in Early Childhood Education. If accepted, students take courses in HDFS and SOE as a part of their degree requirements.

Students are encouraged to check the program of study as a small number of prerequisites are required prior to entry in the major. The Early Childhood Education Major uses a cohort model, and admits a limited number of students, typically between 25-30, each year. The admission process takes place once a year in the spring, with the admitted candidates starting in the fall. Students in the Early Childhood Education major achieve both Early Childhood Education core learning outcomes, obtained through HDFS and SOE courses, and all learning outcomes required by the Colorado Department of Education for Early Childhood Education licensure. (http://www.cde.state.co.us/cdep/prof/checklist-initialtoprofessionalteacher)

Learning Outcomes
Students will demonstrate:

- Content knowledge and understanding of theory, research, and practice relevant to optimizing the development, health, and well-being of children and families in the context of the larger social environment.
- Effective written and oral communication skills appropriate for early childhood educators interfacing with colleagues, children, and parents/guardians.
- The ability to access, critically evaluate, and apply multiple forms of information related to children and families.
- Professional and leadership skills with individuals and families, including ethical and culturally sensitive conduct.
- Knowledge and skill in teaching and assessing literacy, mathematics, social studies, science, music, art, and physical education in early childhood.

Major Completion Map

Distinctive Requirements for Degree Program:

Students seeking admission to the Early Childhood Education (ECE) Major with teacher licensure must formally apply and be accepted. The admission process into the program takes place once a year in the spring with the admitted candidates starting the program the following fall. All coursework within the Center for Educator Preparation (CEP) requires a 4 semester (or 2 year) consecutive commitment to complete, therefore EDUC subject code courses must be taken in the semester indicated. Requirements for applying to the ECE major: 1) Must have a 2.75 GPA or better, 2) Suggested to have completed 60 credits (or more) by the end of the semester in which the student is applying (typically students apply their second semester sophomore year), 3) Must have 20 hours of volunteer or work service with children ages 0\#8 years (experience must have been within the last 5 years), 4) Must have 3 references. All HDFS subject code courses and EDUC subject code courses must be completed with a grade of C or higher. Students will be required to pass a criminal arrest record background check prior to participating in field placement courses. Students will complete a graduation contract with an HDFS Academic Advisor during the first two weeks of the semester in which they are graduating.

Major in Human Development and Family Studies

Human Development and Family Studies (HDFS) is an interdisciplinary major focusing on the development of individuals across the lifespan, within the context of family and culture. Students complete foundational coursework in human development (i.e., infancy and childhood, adolescence, emerging and young adulthood, middle and later adulthood/aging) and in the area of family studies. Students become familiar with theory and innovative research in the field and learn to identify diverse factors influencing cognitive, emotional, social, and physical development across the lifespan. Students participate in an internship in order to apply knowledge and skills acquired in foundational course work. The HDFS major offers five concentrations that enable students to specialize within their degree and prepare for a variety of career paths. In addition to selecting one of five concentrations, students also have the opportunity to work toward the Gerontology Interdisciplinary Minor or director qualifications in early childhood settings, or apply to the Early Childhood Education Major.

Potential Occupations

Graduates with a major in HDFS are prepared to work in a range of human service settings including youth services organizations; early childhood, elementary, adolescent, and parent education programs; health care organizations; juvenile and adult corrections; family and community services; and programs serving older adults, including long-term care facilities. Students interested in teaching human development and family studies content at the secondary level should explore the interdepartmental major in Family and Consumer Sciences, Education Concentration. HDFS graduates are also well prepared to pursue graduate degrees in mental health, behavioral and social sciences, education, health and medicine, or other professional programs.

Some examples of career opportunities with a bachelor’s degree in HDFS include, but are not limited to: early childhood teacher, early childhood administrator, adult recreation programmer, career development specialist, family services specialist, human development specialist, adult education teacher, human resources coordinator, youth agency administrator, community outreach worker, women’s program administrator, youth intervention and prevention program administrator, youth employment, training, and development specialist, parent educator, children-family educator, child protection worker, family assistance worker, program administrator, public relations specialist, youth services worker, case manager, nonprofit agency administrator, and residential center manager.
To help guide students in their career planning, there are five concentrations within the Human Development and Family Studies major. The HDFS Major Program of Study consists of the HDFS foundational courses, which are required for all students regardless of concentration, 15 credits selected from the list of courses within students' chosen concentration, and additional electives to reach 120 credits as required for graduation. Students must declare a minimum of one concentration and may not declare more than two concentrations in the HDFS major. The declared concentration(s) are listed on the students' transcripts and thus indicate specialized training within the HDFS degree program.

Human Development and Family Studies Concentration

The Human Development and Family Studies Concentration is a general concentration that is available to HDFS majors who do not choose one of the more specific concentrations. This general concentration is an excellent choice for students who are interested in a lifespan or more general focus in HDFS and are not seeking the specialized training offered in the other four concentrations. Students choosing this concentration will be preparing to enter a variety of different careers or graduate programs, as outlined above. The curriculum includes primarily HDFS, psychology, and social work courses as well as selected courses from other disciplines for a well-rounded and robust education in human development and family studies. By selecting this concentration, students have an opportunity to participate in a variety of experiential learning courses and internship options as they explore and prepare for their career path and additional credentialing options. Please note that the HDFS general concentration does not appear on students' transcripts.

Early Childhood Professions Concentration

The courses in the Early Childhood Professions Concentration prepare students for careers in early childhood education as well as professional work with children across a variety of settings, including working with children with special needs. This concentration is an ideal choice for first and second year HDFS majors who plan to apply to the competitive on-campus Early Childhood Education Major during their sophomore year. Additionally, this concentration is the preferred choice for students interested in the early childhood education careers that do not require teacher licensure, or for students who will pursue a graduate degree and licensure in childhood education. Students interested in working with children with special needs, those seeking director qualifications in early childhood education, and those seeking other relevant credentials would also benefit from choosing this concentration. The curriculum incorporates courses from several disciplines that focus on early child development, education, diversity, and professional skills.

Pre-Health Professions Concentration

Many students pursuing an HDFS degree plan to apply to graduate or professional programs in a variety of health professions. The Pre-Health Professions Concentration prepares students for these careers and supports their goals of obtaining graduate training. Some of the careers students in this concentration pursue are: allied health practitioner, anesthesiologist assistant, child life specialist, chiropractor, dentist, medical doctor, music therapist, naturopathic or complementary medicine practitioner, nurse, occupational therapist, optometrist, pharmacist, physical therapist, physician's assistant, podiatrist, speech and language pathologist, or veterinarian. The courses within this concentration include a focus on science and also help prepare students to work with individuals (and their families) with disabilities, mental and physical illness, or those experiencing death, dying, or grief. In addition, students in this concentration are strongly encouraged to consult with pre-professional advisors in the Center for Advising and Student Achievement for specific course (and corresponding course prerequisite) recommendations based on the credentials that they are pursuing, as the prerequisite requirements vary for graduate and professional programs.

Prevention and Intervention Sciences Concentration

The Prevention and Intervention Sciences Concentration is designed for students who are preparing for careers in the helping and human services professions such as counselors, educators, and social service providers, as well as for students seeking a research career in human development and family studies or a related field. This concentration is an excellent choice for students interested in careers requiring either a bachelor’s degree or additional credentials. Concentration coursework emphasizes evidence-based programs, and students will learn how to design and implement community-based prevention and intervention programs for youth, adults, and families. Students can either focus on a specific aspect of the lifespan or choose courses across the lifespan.

Leadership and Entrepreneurial Professions Concentration

The Leadership and Entrepreneurial Professions Concentration guides students who are preparing for entry-level or long-term leadership positions in organizations that promote the optimal development of individuals and families. Students in this concentration may intend to work in organizations as directors, managers, or owners. This concentration includes coursework in finance, management, marketing, public policy, professional communication, and leadership. This concentration is also appropriate for students preparing for careers in legal services, such as lawyers or politicians. Students in this concentration may choose to pursue additional credentials in leadership, business and entrepreneurship.

Online Degree Program

The HDFS major is offered in two formats, both leading to a Bachelor of Science degree. We offer on-campus classes to local degree-seeking students, and we also offer the HDFS degree online through CSU Online (http://www.online.colostate.edu). The Online Bachelor of Science Degree in HDFS (http://www.online.colostate.edu/degrees/hdfs) provides a world-class university education that is flexible, convenient, and accessible for working and distance students. The HDFS courses are the same in the online degree program as they are in the on-campus program, with many of the same faculty teaching both courses. The five HDFS concentrations are available online with only some limitations, as not all CSU courses are available online. The online Bachelor of Science degree in HDFS carries the full accreditation of CSU and is indistinguishable on student transcripts from the on-campus version of the degree.

1 Of the 12 required credits of concentration courses, a minimum of 6 credits must be HDFS courses and a minimum of 9 credits must be upper-division (300- to 400-level). Courses may not double-count for more than one HDFS concentration.

2 Students with substantial career-relevant experience may petition to replace HDFS 488B with a three-course upper-division cognate defined with and approved by the advisor. The additional 1-4 credits required for the cognate can be double-counted as electives but not as concentration courses.

3 Select enough elective credits to bring the program to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

4 Courses selected to fulfill All-University Core Curriculum (AUCC) requirements may not double count toward the Early Childhood Professions Concentration Course requirement.

Major Completion Map

Distinctive Requirements for Degree Program:
Human Development and Family Studies is an open-entry major for freshmen. For sophomores and above, students must complete and/or be enrolled in HDFS 101, PSY 100 or SOC 100 in order to declare HDFS. HDFS subject code courses must be completed with a grade of C or higher. Students will be required to pass a criminal arrest record background check prior to participating in the internship course their senior year. The internship comprises...
the HDFS 477 and HDFS 488B (requires a background check through CBI, FBI) courses which must be taken concurrently. Students will complete a graduation contract with an HDFS Academic Advisor during the first two weeks of the semester in which they are graduating.

Major in Human Development and Family Studies, Human Development and Family Studies Concentration

The Human Development and Family Studies Concentration is a general concentration that is available to HDFS majors who do not choose one of the more specific concentrations. This general concentration is an excellent choice for students who are interested in a lifespan or more general focus in HDFS and are not seeking the specialized training offered in the other four concentrations. Students choosing this concentration will be preparing to enter a variety of different careers or graduate programs, as outlined above. The curriculum includes primarily HDFS, psychology, and social work courses as well as selected courses from other disciplines for a well-rounded and robust education in human development and family studies. By selecting this concentration, students have an opportunity to participate in a variety of experiential learning courses and internship options as they explore and prepare for their career path and additional credentialing options. Please note that the HDFS general concentration does not appear on students' transcripts.

Effective Fall 2016

A minimum grade of C is required in all courses used to satisfy the requirements of the Major in Human Development and Family Studies, Human Development and Family Studies Concentration. Courses used as substitutions also require a minimum grade of C.

### Major in Human Development and Family Studies, Leadership and Entrepreneurial Professions Concentration

The Leadership and Entrepreneurial Professions Concentration guides students who are preparing for entry-level or long-term leadership positions in organizations that promote the optimal development of individuals and families. Students in this concentration may intend to work in organizations as directors, managers, or owners. This concentration includes coursework in finance, management, marketing, public policy, professional communication, and leadership. This concentration is also appropriate for students preparing for careers in legal services, such as lawyers or politicians. Students in this concentration may choose to pursue additional credentials in leadership, business and entrepreneurship.

#### Requirements

**Effective Fall 2016**

A minimum grade of C is required in all courses used to satisfy the requirements of the Major in Human Development and Family Studies, Leadership and Entrepreneurial Professions Concentration. Courses used as substitutions also require a minimum grade of C.

1. Of the 12 required credits of concentration elective courses, a minimum of 6 credits must be HDFS courses and a minimum of 9 credits must be upper-division (300- to 400-level). Courses may not double-count for more than one HDFS concentration.

2. Students with substantial career-relevant experience may petition to replace HDFS 488E with a three-course upper-division (300- to 400-level) cognate defined with and approved by the advisor. The additional 1-4 credits required for the cognate can be double-counted as electives but not as concentration courses.

3. Select enough elective credits to bring the program to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

4. Courses selected to fulfill All-University Core Curriculum (AUCC) requirements may not double count toward the Leadership and Entrepreneurial Professions Concentration Course requirement.

5. Students in the concentration may select a maximum of 6 credits of HDFS 497A, HDFS 497B, HDFS 497C, HDFS 497D, HDFS 497E, with a maximum of 3 credits per subtopic.

### Major Completion Map

**Distinctive Requirements for Degree Program:**

Human Development and Family Studies is an open-entry major for freshmen. For sophomores and above, students must complete and/or be enrolled in HDFS 101, PSY 100 or SOC 100 in order to declare HDFS. HDFS subject code courses must be completed with a grade of C or higher. Students will be required to pass a criminal arrest record background check prior to participating in the internship course their senior year. The internship comprises
the HDFS 477 and HDFS 488E courses which must be taken concurrently. Students will complete a graduation contract with an HDFS Academic Advisor during the first two weeks of the semester in which they are graduating.

Major in Human Development and Family Studies, Pre-Health Professions Concentration

Many students pursuing an HDFS degree plan to apply to graduate or professional programs in a variety of health professions. The Pre-Health Professions Concentration prepares students for these careers and supports their goals of obtaining graduate training. Some of the careers students in this concentration pursue are: allied health practitioner, anesthesiologist assistant, child life specialist, chiropractor, dentist, medical doctor, music therapist, naturopathic or complementary medicine practitioner, nurse, occupational therapist, optometrist, pharmacist, physical therapist, physician’s assistant, podiatrist, speech and language pathologist, or veterinarian. The courses within this concentration include a focus on science and also help prepare students to work with individuals (and their families) with disabilities, mental and physical illness, or those experiencing death, dying, or grief. In addition, students in this concentration are strongly encouraged to consult with pre-professional advisors in the Center for Advising and Student Achievement for specific course (and corresponding course prerequisite) recommendations based on the credentials that they are pursuing, as the prerequisite requirements vary for graduate and professional programs.

Requirements

Effective Fall 2016

A minimum grade of C is required in all courses used to satisfy the requirements of the Major in Human Development and Family Studies, Pre-Health Professions Concentration. Courses used as substitutions also require a minimum grade of C.

Major in Human Development and Family Studies, Prevention and Intervention Sciences Concentration

The Prevention and Intervention Sciences Concentration is designed for students who are preparing for careers in the helping and human services professions such as counselors, educators, and social service providers, as well as for students seeking a research career in human development and family studies or a related field. This concentration is an excellent choice for students interested in careers requiring either a bachelor’s degree or additional credentials. Concentration coursework emphasizes evidence-based programs, and students will learn how to design and implement community-based prevention and intervention programs for youth, adults, and families. Students can either focus on a specific aspect of the lifespan or choose courses across the lifespan.

Requirements

Effective Fall 2016

A minimum grade of C is required in all courses used to satisfy the requirements of the Major in Human Development and Family Studies, Prevention and Intervention Sciences Concentration. Courses used as substitutions also require a minimum grade of C.

1 Of the 15 credits of concentration courses, a minimum of 9 credits must be HDFS courses and a minimum of 12 credits must be upper-division (300- to 400-level). Courses may not double-count for more than one HDFS concentration.

2 Students with substantial career-relevant experience may petition to replace HDFS 488D with a three-course upper-division cognate defined with and approved by the advisor. The additional 1-4 credits required for the cognate can be double-counted as electives but not as concentration courses.

3 Select enough elective credits to bring the program to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program:
Human Development and Family Studies is an open-entry major for freshmen. For sophomores and above, students must complete and/or be enrolled in HDFS 101, PSY 100 or SOC 100 in order to declare HDFS. HDFS subject code courses must be completed with a grade of C or higher. Students will be required to pass a criminal arrest record background check prior to participating in the internship course their senior year. The internship comprises the HDFS 477 and HDFS 488D courses which must be taken concurrently. Students will complete a graduation contract with an HDFS Academic Advisor during the first two weeks of the semester in which they are graduating.

Master of Science in Human Development and Family Studies, Plan A, Marriage and Family Therapy Specialization

The Marriage and Family Therapy (MFT) program, which is accredited by the Commission on the Accreditation of Marriage & Family Therapy Education, provides a specific professional curriculum that prepares graduates for licensure as Marriage and Family Therapists. Courses focus on individual and family development, evidence-based clinical practices, social-justice frameworks, and research methods. MFT students also complete a thesis. Training includes practica and internships with live supervision in the CSU Center for Family and Couple Therapy as well as Campus Connections: Therapeutic Mentoring At Risk Youth and other clinical programs. MFT graduates go on to work as therapists in private practice or at for-profit and non-profit mental health agencies. Some students enter doctoral programs upon graduation, including our Applied Developmental Science doctoral program.

For more information, please visit Department of Human Development & Family Studies Marriage and Family Therapy Program (http://www.hdfs.chhs.colostate.edu/students/masters/mft.aspx).

Master of Science in Human Development and Family Studies, Plan A, Prevention Science Specialization

Coursework in the Prevention Science specialization focuses on the processes of lifespan development and normative family functioning, as well as theories of prevention science and risk and resilience. Students gain skills such as program planning and evaluation, program administration, grant writing, research design, and technical communication. Graduates of the Prevention Science program enter careers in program evaluation, policy analysis, education, and the management of prevention and intervention programs in human services. For students who are interested in prevention-oriented research careers, this specialization articulates well with the Applied Developmental Science doctoral program.

For more information, please visit Department of Human Development & Family Studies Prevention Science Program (http://www.hdfs.chhs.colostate.edu/students/masters/ps.aspx).

Ph.D. in Applied Developmental Science

The Ph.D. program in Applied Developmental Science (ADS) emphasizes how research regarding basic processes in human development can be used to prevent problems and enhance well-being across the lifespan. Students gain knowledge in lifespan human development theory, empirical research skills to conduct high-quality basic and applied research, and the abilities to translate science into practices and programs that address a wide range of social and public health problems. Graduates from the ADS program have the basic knowledge and the applied skills to work in settings such as academia, for-profit and not-for-profit research and advocacy organizations, governmental and human services agencies, or community agencies with programs designed to enhance health and well-being of individuals, families, and communities.

Students can enter the ADS program with a completed master’s degree or with a completed bachelor’s degree. Students entering with a bachelor’s will be required to complete a master’s in Human Development and Family Studies (HDFS), with a specialization in Prevention Science or Marriage and Family Therapy.

For more information, please visit Department of Human Development & Family Studies Ph.D. in Applied Developmental Science (http://www.hdfs.chhs.colostate.edu/students/doctoral).

Known nationally and internationally for its excellence, the Department of Occupational Therapy is ranked among the top 10 programs in the nation by *U.S. News and World Report*. It is recognized by CSU as a Program of Research and Scholarly Excellence and it has been designated as a Program of Excellence by the state of Colorado. The department offers undergraduate education to prepare students as leaders in the field of occupational therapy.

The occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449; (301) 652-6611. The National Board for Certification in Occupational Therapy (NBCOT) is the credentialing agency responsible for the development and implementation of the certification process for OT practitioners.

Students interested in more information regarding prerequisite and application requirements may contact the department at (970) 491-6253 or otinfo@colostate.edu.

**Graduate Programs in Occupational Therapy**

The Occupational Therapy Department offers the following degree programs:

- Master of Science in Occupational Therapy (M.S.)
- Master of Occupational Therapy (M.O.T.)
- Post-Professional Master of Science (M.S.)
- Ph.D. in Occupation and Rehabilitation Science

Students with a bachelor’s degree in a discipline outside of occupational therapy pursue the Master of Science (http://www.ot.chhs.colostate.edu/students/professional.aspx) or the Master of Occupational Therapy (http://www.ot.chhs.colostate.edu/students/professional.aspx) degree. The program focuses on preparation for a broad-based, advanced-generalist practice and provides students with the knowledge and skills necessary to support people of all ages who have special needs by addressing daily challenges related to their life roles and assisting them in maximizing their independence.

Students with a bachelor’s degree in occupational therapy pursue the Post-Professional Master of Science (http://www.ot.chhs.colostate.edu/students/post-professional.aspx) degree. Under the guidance of an advisor, students complete an individualized program of study and a thesis project that is designed to add to the profession’s understanding of human performance and participation in everyday occupations and contexts.

The interdisciplinary Doctor of Philosophy (Ph.D.) degree in Occupation and Rehabilitation Science (http://www.ot.chhs.colostate.edu/students/phd.aspx) offers graduate training in research that is dedicated to assisting people of all ages and abilities perform and participate in everyday occupations as a source of lifelong meaning, development, health, and well-being. The program was created to meet the national demand for Ph.D. trained scientists and educators in occupational therapy and related disciplines. Upon graduation, students typically pursue academic careers in research and higher education, although additional career opportunities exist in industry and government.

Please contact the Occupational Therapy Department for further details by calling (970) 491-6253 or emailing the department at otinfo@colostate.edu.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Occupational Therapy (http://ot.chhs.colostate.edu).

Professor Audrey Shillington, Director
Associate Professor Banghwa Casado, PhD Program Director
Associate Professor Louise Quijano, MSW Program Director
Instructor Amy Riep, CLOE Director
Instructor Brenda Miles, BSW Program Director

The School of Social Work offers a Bachelors in Social Work (BSW), Masters in Social Work (MSW) and a PhD in social work. Additionally, we offer several graduate certificate programs to provide further practice specialization.

Social work is distinguished by a tradition of concern for people and their interactions with society. Social work professionals are community problem solvers who intervene in organizational settings, communities, social service agencies, groups, individuals, and families with goals of enhancing well-being and promoting social, economic, and environmental justice.

Employment Opportunities:
- Child Welfare
- Public Health
- Family Services
- Gerontology
- Behavioral Health
- Policy/Legislative Work
- Mental Health
- Addictions
- Medical/Health
- School Social Work
- Corrections
- Community Organization/Advocacy

The Social Work curriculum focuses on the practical application of social work principles, research, policies, and practices within human rights and social justice perspectives. Students acquire a professional social work knowledge-based skills and values transferable to different settings, population groups, and problem areas. Students apply a person-in-environment lens to engage and intervene with social systems locally, nationally, and globally. Several practical experiences are required through intensive internship programs. Both the BSW and MSW programs are accredited by the Council on Social Work Education.

Undergraduate Majors
- Major in Social Work

Graduate

Graduate Programs in Social Work

The School of Social Work offers an M.S.W. degree and a Ph.D. in Social Work. The MSW degree is accredited by the Council on Social Work Education, with an emphasis in advanced generalist practice. The Ph.D. prepares students for academic positions or for careers in research. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the School of Social Work (http://www.ssw.chhs.colostate.edu).

Major in Social Work

Social work is distinguished by a tradition of concern for people and their interactions with society. Social work professionals are community problem solvers who intervene in organizational settings, communities, social service agencies, groups, individuals, and families with goals of enhancing well-being and promoting social and economic justice. Most social workers are employed in fields such as child welfare and family services, mental health, medical social work, school social work, corrections, community organization, or advocacy.

The Social Work curriculum focuses on the practical application of social work principles, policies, and practices within human rights and social justice perspectives. Students acquire a professional social work foundation transferable to different settings, population groups, and problem areas. Attention is devoted to understanding the social welfare system in the U.S., and working with individuals, families, and communities to affect desired change. Several practical experiences are required. Students work with an agency participant throughout their sophomore year, and then as seniors, participate in a social work agency internship. The curriculum also includes a strong liberal arts base in social science research and statistics, arts, humanities, social science, and natural sciences.

CSU students are admitted to the School of Social Work (SSW) when they declare Social Work as a major. Two professional organizations, The National Association of Social Workers (NASW) and the Council on Social Work Accreditation (CSWE) guide social work practice and education. The NASW develops the Code of Ethics for practicing social workers. The CSWE accredits bachelors and masters social work educational programs in the United States. The BSW program is accredited by CSWE.

Learning Outcomes

Graduating seniors will have demonstrated:

- Skills in conceptualizing and applying knowledge of social welfare policy and services, a systems perspective, theory, community resources, and community policy-making processes and practices.
- Knowledge and mastery of the foundation competencies as required by the CSWE for accreditation of the BSW degree.
- An understanding of the social work code of ethics including mastery of skills in maintaining client confidentiality, establishing professional boundaries, and resolving ethical dilemmas that are presented in case situations.
Potential Occupations
Social Work graduates are employed in a variety of settings including welfare agencies, schools, hospitals, clinics, institutions, community centers, public health, corrections, and group homes. Entry-level job opportunities are plentiful. Graduates should be willing to work with people of all ages and in a multitude of circumstances and settings. Opportunities to work with older adults are especially prevalent. Internships are required. Graduates of the BSW program are eligible to apply for advanced standing in MSW social work programs.

Some examples of career opportunities include, but are not limited to: child welfare worker, adolescent group home counselor, crisis counselor, child protection worker, adult protection worker, geriatric social worker, case manager, nursing home administrator, medical social service counselor, community outreach coordinator, youth program counselor, home health worker, occupational social services worker, foster parent consultant, probation officer, client advocate, victim-witness program counselor, program manager, substance abuse counselor, domestic violence counselor, or adoption worker.

Progression in the Major
Progression in the Major in the SSW is guided by standards required by both NASW (http://socialworkers.org/pubs/code/code.asp) and CSWE (http://cswe.org/File.aspx?id=41861) to ensure compliance with accreditation standards and that SSW students meet nationally recognized ethical requirements for their profession.

The NASW (http://socialworkers.org/pubs/code/code.asp) Code of Ethics requires that social workers act ethically in their work with clients. It also requires that social workers take action when their colleagues are not acting competently or ethically. The CSWE (http://cswe.org/File.aspx?id=41861) requires that social work programs describe the procedures for informing students of the program’s criteria for evaluating students’ academic and professional performance and that the program has policies and procedures for terminating students’ enrollment in the social work program for reasons of academic and professional performance.

To meet the requirements of these professional governing bodies, the SSW has developed this Progression in the Major procedure. Progression in the Major is a time in a student’s academic career when faculty and students can review each student’s character and fitness for the profession of social work. Prior to enrolling in the 300 level practice courses (SOWK 340, SOWK 341, SOWK 342), students must apply for Progression in the Major. Approval of the Progression in the Major application is a prerequisite for enrollment in SOWK 340. Generally students who have 60 or more credits must apply for progression in order to graduate in the following four semesters. The application for Progression in the Major will be distributed in SOWK 286A and SOWK 286B.

As a professional program, academic performance and fitness to proceed in the SSW program requires a minimum grade point average, completion of required course work, and behaviors appropriate to the performance of social work. Problems in student performance may be addressed with the student at any time in the student’s academic career in the SSW.

Student Expectations for Progression:
• Maintain a minimum GPA of 2.5 in SOWK course work; a grade of C or better in all SOWK coursework; 2.0 in overall university course work; 2.0 in All University Core Curriculum (AUCC) course work.

• Demonstrate conduct that complies with the CSU Student Code of Conduct.
• Demonstrate conduct that adheres to the NASW Code of Ethics and social work values in interactions with faculty, peers, the community, organizations and clients.
• Remain free of criminal convictions while enrolled in the SSW and CSU.
• Refrain from substance use that interferes with the performance of responsibilities to clients and agencies and/or interferes with classroom performance.
• Demonstrate behavior that prioritizes the welfare of those to whom the student has a responsibility such as clients and coworkers.
• Refrain from any behaviors that cause harm to clients, including romantic or sexual relationships.
• Demonstrate respect for all persons and appreciation for race, age, color, religion, national origin or ancestry, sex, gender, disability, veteran status, genetic information, sexual orientation, or gender identity or expression.
• Demonstrate sound judgment, both in work with clients and in regard to oneself, such as seeking professional help for physical and emotional problems that interfere with professional functioning.
• Demonstrate honesty and integrity in work with client systems and in the classroom.

Review Process
Concerns regarding a student’s application for progression will be reported to the Director of the BSW Program. Concerns may be identified during the Progression in the Major application review process or at any time before or after progression. Progression applications will be reviewed by the Director of the BSW Program. Concerns regarding any of the foregoing student expectations will be addressed by the BSW Director directly with the student and the student’s advisor. Major concerns regarding the student’s ability to proceed in the program will be reviewed by the Director of the BSW program with the administrative team of the SSW, including but not limited to the Director of the SSW. A meeting will then be scheduled for review of the concerns with the student, faculty member(s) involved, the Director of the BSW Program and the Director of SSW. Review of concerns may result in one or more of the following resolutions, through the Director of SSW:

• Dismissal or resolution of the expressed concerns.
• A probationary period which includes a remediation contract with the student to address concerns that will be monitored by the BSW Program Director or designated faculty.
• Dismissal of the student from the Social Work major.
• A report to the CSU Office of Conflict Resolution and Student Conduct Services, in the event the concerns include possible violations of the Student Conduct Code.

Students may appeal these decisions using established university and SSW procedures.

Practicum and Internship
Students directly apply classroom knowledge, skills, and social work values through a six-credit supervised practicum, SOWK 286A and SOWK 286B, in the sophomore year. In this practicum, students are matched with community agencies which require background checks before placement.
In the senior year, students fulfill a 10-credit field placement in a social work agency or program in a community setting. Field placement agencies generally require background checks also. Examples of available field placements include child and public welfare programs; hospitals, homeless and women’s shelters, rehabilitation and mental health agencies, schools, adolescent residential care, geriatric centers, and correction programs. In their field placement and under supervision, students have the opportunity to demonstrate the required CSWE competencies.

Master of Social Work

The Master of Social Work degree offered by CSU features a nationally recognized advanced generalist curriculum. Students are prepared for roles as social work practitioners in complex, diverse, and dynamic settings and learn to promote human rights and individual, community, and global well-being. The School of Social Work offers different programs options for completing the MSW degree. There are four campus-based programs, two distance learning options, and a dual degree MSW-MPH. All of our program options utilize a cohort model.

1. **Full-time two year** - This is the standard two year program. It follows the cohort model, starting every fall. Students attend full-time for four semesters - fall, spring, and the following fall and spring on campus, in-person instruction. (Schedule here [http://www.ssw.chhs.colostate.edu/students/graduate/onsiteMSW/schedule_fulltime.aspx].)

2. **Part-time three year days** - This option begins in fall and takes three years to complete, breaking down the first full-time year into two part-time years. During the majority of these years, students attend classes on campus either Monday or Tuesday of each week, with the field placement falling in their fourth semester. The final year is still a full-time year, as the field placement requirement cannot be reduced. The schedule [http://www.ssw.chhs.colostate.edu/students/graduate/onsiteMSW/schedule_parttime.aspx] for this final year is identical to the full-time program's second year.

3. **Part-time evenings** - This part-time format takes 27 months to complete and begins during the summer term. Classes are hybrid which means that 50-75% of class time is online. During most terms, in-person classes will take place on Tuesday and Thursday evenings starting at 5:00 p.m. every other week. This format operates on a cohort model which currently admits students every other year. The next cohort will start in Summer 2018.

4. **Advanced Standing On Campus** - This option is available only to those who have earned a BSW from a program accredited by the Council on Social Work Education and have earned that degree within the past seven years. The BSW degree must be granted prior to the beginning of advanced standing classes. Students attend one full year consisting of three semesters, starting with the summer term. (Schedule here [http://www.ssw.chhs.colostate.edu/students/graduate/onsiteMSW/schedule_advancedstanding.aspx].)

5. **Distance Learning options** - The School of Social Work also offers a part-time hybrid program that utilizes online and in-person instruction based at the cohort location of either Denver or Colorado Springs.
   a. The Denver cohort begins January 2017 (application deadline 6/1/16) with Advanced Standing beginning in January 2018 (application deadline 6/1/17).
   b. The next Colorado Springs cohort is projected to begin in January 2018 (application deadline 6/1/17) with Advanced Standing beginning in January 2019 (application deadline 6/1/18). For more information visit the Distance MSW Program [http://www.ssw.chhs.colostate.edu/students/graduate/distanceMSW/]

6. **MSW/MPH Dual Degree** - In partnership with Colorado School of Public Health, the School of Social Work will be offering a dual degree MSW/MPH program. For information visit the MSW/MPH section [http://www.ssw.chhs.colostate.edu/students/graduate MPH/indexMPH.aspx].

The MSW program is accredited by the Council on Social Work Education, which enables students to pursue professional licensure upon program completion. Additionally, our program is approved by the Colorado Department of Education for school social work licensure, for those students who elect to complete the additional course requirement (SOWK 560) or seek our graduate certificate in PreK-12 School Social Work.

College-Wide Graduate Programs

• Master’s Programs

• Master in Arts Leadership and Cultural Management, Plan C

The College of Liberal Arts aims to educate committed and active citizens and to develop in them an understanding of humans, including their history, literature, and art; their social, political, and economic systems; and their relationship to the environment. The College offers courses in the arts, humanities, and social sciences, which constitute the foundation of a liberal arts education.

College Programs

Undergraduate majors lead to one of three degrees: Bachelor of Arts, Bachelor of Fine Arts, or Bachelor of Music. Descriptions of the specific departmental and interdepartmental majors and concentrations in the College of Liberal Arts are located in the following pages.

Students should consider simultaneously completing the requirements of a second major or a departmental or interdisciplinary minor, either in the College of Liberal Arts or in another college. With careful planning, numerous combinations are possible within four years of study.

The minimum scholastic average acceptable for graduation in any college program is a 2.000 average in all major courses in addition to the university’s overall grade point average requirement of 2.000 for Colorado State courses.

Undergraduate Career Opportunities and Career Counseling

Graduates from the College of Liberal Arts enter a remarkable variety of careers. Degrees from the College of Liberal Arts prepare students for success in their professional, personal, and civic lives. The skills and dispositions students develop through study in the liberal arts are widely sought. In preparing themselves for future career opportunities students are encouraged to work closely with Academic Support Coordinators, departmental mentors, and career counselors. Through these conversations students will be encouraged to develop resumes, interviewing skills, and articulation of the ways in which their skills will benefit potential employers. Students should also consider participating in internships to gain practical work experience.

Prelaw

Clark C, Room 336B
(970) 491-0704
courtenay.daum@colostate.edu

Prelaw adviser, Dr. Courtenay Daum

Students preparing for law school can choose any major. Law schools seek above-average students with broad educational backgrounds and excellent communication, and analytical skills. Prelaw students, regardless of major, should design a course of study that develops their skills in speaking, writing and analytical capabilities. Law schools require an undergraduate degree for admission. Visit the Department of Political Science (http://politicalscience.colostate.edu/undergraduate/pre-law) for more information.

Education Abroad

Because the knowledge of at least one other culture is valuable in understanding our own, students are encouraged to take a semester or longer to study outside of the United States as part of their overall program at CSU. Students interested in education abroad should plan, far in advance, by discussing opportunities with their advisor and by visiting the Office of International Programs (http://educationabroad.colostate.edu) in Laurel Hall.
Foreign Service Officer Career

Students interested in a career as a foreign service officer may prepare for both the general Foreign Service Officer Examination and the associated language examination within the following majors: economics; history; international studies; journalism and technical communication; languages, literatures, and cultures; liberal arts; political science; or sociology.

Graduate Programs

A variety of liberal arts advanced degrees are available in the College. Academic degrees offered are Doctor of Philosophy, Master of Arts, Master of Science, Master of Fine Arts, and Master of Music. The last two are generally considered professional degrees.

The College offers three interdisciplinary master’s degrees. The Department of Anthropology offers a master’s degree in Anthropology with a specialization in International Development, with courses from across CSU. The Departments of English and Languages, Literatures and Cultures offer a joint master’s program in foreign languages and the teaching of English as a second/foreign language. The LEAP Institute for the Arts offers a Master’s in Arts Leadership and Cultural Management in collaboration with the College of Business, the College of Liberal Arts and others, that prepares students for leadership opportunities within and outside of the creative sector. Information on all three degree programs may be obtained from any participating department.

For detailed information about graduate programs, contact individual departments. See also the Graduate and Professional Bulletin.

1. Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Attendance at the required workshops may be spread over the student’s five year program.

2. Select from the following subject codes: ANTH, ART, CO, D, E, ECON, ETST, GR, HIST, JTC, L***, LB, MU, PHIL, POLS, PSY, SOC, SPCM, TH, WS. Courses used to fulfill All-University Core Curriculum (AUCC) requirements may not be double-counted toward this major requirement.

3. Select 18 upper-division (300- to 400-level) credits from at least two subject codes in the arts and humanities or social sciences disciplines: ANTH, ART, CO, D, E, ECON, ETST, GR, HIST, JTC, L***, LB, MU, PHIL, POLS, PSY, SOC, SPCM, TH, WS. No more than 6 credits of Psychology (PSY) may count toward this major requirement.

4. Select from the list of CLA AUCC 4B courses (above).
Select from College of Engineering, Engineering Science list of courses.

Students may need to obtain a prerequisite override from the department to enroll in this course.

**Distinctive Requirements for Degree Program:**

**TO PREPARE FOR FIRST SEMESTER:** The curriculum for this major assumes students enter college prepared to take calculus. Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Attendance at the required workshops may be spread over the student’s five-year program.

1. Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Attendance at the required workshops may be spread over the student's five year program.

2. Courses are to be selected with the approval of the Engineering advisor. A minimum of 7 credits must be upper-division (300- to 400-level).

3. Each student is required to complete a minor in a foreign language. Contact the Department of Languages, Literatures and Cultures.

4. Students may need to obtain an override in order to register for some courses. For Engineering courses, students should see the appropriate Engineering department. For International Studies courses, students should contact the instructor.
To fulfill the International Studies Course Selection requirement, select a minimum total of 18 credits, of which at least 15 must be upper-division (300- to 400-level), from a minimum of three different subject codes. Students will choose an International Studies geographic option area, and from those course lists select: a minimum of 6 credits from 1) History and Politics; a minimum of 3 credits from 2) Thought and Culture; a minimum of 6 credits from 3) International Studies (list is same for all option areas); and an additional minimum of 3 credits of choice from lists 1, 2, or 3.

Select one course from the list of courses in category 3B of the All-University Core Curriculum (AUCC) except for L*** language courses.

Credit allowed for only one of LCHI 365, LGEN 465B, LJPN 365.

French (LFRE), German (LGER), or Spanish (LSPA) only.

French (LFRE) or German (LGER) only

To count toward the International Studies Course Selection, travel abroad must be to a country or area covered by the chosen geographic option.

**Distinctive Requirements for Degree Program:**

**TO DECLARE MAJOR:** Engineering is a controlled major: students are admitted into the major only if they meet established academic standards. Please see competitive major requirements or the advisor in the Department for more information.

**TO PREPARE FOR FIRST SEMESTER:** The curriculum for this major assumes students enter college prepared to take calculus. Students are required to participate in the Professional Learning Institute (PLI) program as a requirement for graduation. The program consists of eleven PLI workshops distributed by focus areas as follows: Global and Cultural Diversity (2 workshops), Innovation (2 workshops), Leadership (2 workshops), Civic and Public Engagement (2 workshops), and Ethics (3 workshops). Each workshop is between 1-2 hours long and no outside preparation is required to attend any of the workshops. Attendance at the required workshops may be spread over the student’s five-year program.

**Major in International Studies**

Office in Clark Building, Room C214
(970) 491-3295
inst.colostate.edu (http://inst.colostate.edu)

Andrea Williams, Director

The International Studies major is an interdisciplinary program designed to help students understand the nature of diverse cultures and peoples. There are four concentrations: Asian Studies, European Studies, Latin American Studies, and Middle East and North African Studies. Courses are required in foreign language, geography, political science, economics, history, and international studies, with other elective courses chosen from these and many more disciplines across the college and university.

**Learning Outcomes**

Graduates of the International Studies major will demonstrate that they are competent and capable in:

- Writing effectively about the themes of International Studies and related fields
- Communicating cross-culturally through written and oral expression
- Thinking critically about international issues
- Applying an interdisciplinary approach to knowledge

**Potential Occupations**

Graduates in International Studies apply their education in a wide variety of careers, including those in international business, nonprofit organizations, academics, public policy, law, government, city planning, engineering, environmental sustainability and clean energy, information systems, journalism, publishing, education, sales and marketing, management and administration, artistic production, mass media, communications, museums, entertainment, foreign service, and many other areas in need of intelligent, well-rounded, and broadly world-educated people. Some International Studies graduates enter graduate or professional schools for more specialized study in either international studies or one of many other disciplines. To enhance their career opportunities, majors are encouraged to consider participating in paid or volunteer work or internship opportunities, and to study abroad.

**Concentrations**

- Asian Studies Concentration
- European Studies Concentration
- Latin American Studies Concentration
- Middle East and North African Studies Concentration

Major in Interdisciplinary Liberal Arts

Dean’s Office
Clark Building, Room C138
(970) 491-5421
libartsmajor.colostate.edu (http://libartsmajor.colostate.edu)

Kevin Foskin, Director

The Interdisciplinary Liberal Arts major is a degree program combining the humanities, the arts, languages and literature, and social sciences so as to foster interdisciplinary knowledge, core career competencies, personal development, professional excellence, interpersonal confidence and expertise, and a deeper understanding of the complex world in which we live. Interdisciplinary Liberal Arts majors can select between the Interdisciplinary Liberal Arts major and a five-year joint program with dual degrees in Liberal Arts (B.A.) and Engineering Science (B.S.).

To further increase depth and focus, and to enhance expertise and career opportunities, Interdisciplinary Liberal Arts students are required to complete a minor or an interdisciplinary minor from within the College of Liberal Arts.

Learning Outcomes

Students will demonstrate the following skills:

- Writing effectively about the knowledge and perspectives of their field of study, including
  a. organization in a manner that aids the readers’ comprehension as well as the writer’s purpose;
  b. use of accepted grammatical form, spelling, and punctuation;
  c. use of language in a style that is appropriate to the writer’s purpose;
  d. effective support of claims; and
  e. clear citation of information sources.

- Speaking effectively, including
  a. creation of a logically constructed message;
  b. adaptation of that message to a particular audience;
  c. use of accepted grammatical forms of standard American English dialect;
  d. use of appropriate and engaging language; and
  e. use of effective delivery skills.

- Thinking critically about contemporary issues, particularly within their field of study, including
  a. description of a policy, position, or artifact;
  b. analysis of the policy, position, or artifact by identifying issues or articulating and then applying a critical framework or perspective; and
  c. clear articulation and support of conclusions based on that analysis/identification of issues.

Potential Occupations

Graduates in Interdisciplinary Liberal Arts apply their education in a wide variety of careers and/or academic professions, including public policy, politics, healthcare, artistic production, mass media, engineering, law, city planning, business, information systems, international business, journalism, publishing, education, sales and marketing, management and administration, government, communications, museum work, entertainment, foreign service, and many others. Many continue on to graduate or professional schools for more specialized study. To enhance their career, academic or professional opportunities, majors are encouraged to participate in paid or volunteer work or internship opportunities.

Requirements

Effective Spring 2015

Second Field Requirement

Students in the Interdisciplinary Liberal Arts major must complete one of the following choices:

- A minor
- An interdisciplinary minor
- A second major
- 21 credits in a single language to include at least 6 upper-division (300- to 400-level) credits. At least 6 upper-division credits in this choice must be completed at CSU. (Completion of this choice is not transcripted.)

Master in Arts Leadership and Cultural Management, Plan C (M.A.L.C.M.)

University Center for the Arts, Room 303
(970) 491-3746
leap.colostate.edu (http://leap.colostate.edu)

Constance DeVereaux (constance.devereaux@colostate.edu), Director

The LEAP Institute for the Arts at CSU opens possibilities for career and life through visionary leadership, creative entrepreneurship, impassioned advocacy, and public engagement through a deeper understanding of arts and culture. This Special Academic unit in the College of Liberal Arts is pleased to offer a Masters in Arts Leadership and Cultural Management.

This graduate degree program helps students to apply their creative talents and develop new skills to meet the rising demand for entrepreneurial arts management professionals and visionary...
organized leaders. We believe the arts serve a valuable purpose in society, and we need leaders and entrepreneurs to ensure their success. Often, however, those best suited to serve in these roles—those who are passionate about their creative work and making positive change in the community—lack formal administrative and entrepreneurial training. This arts administration master’s helps students fill their knowledge gaps, so they can do the work that they love, and be more successful at it. Students will gain the foundational skills they need to operate their own business, or take on leadership roles and impact meaningful change in an organization. The program covers a broad range of entrepreneurial subjects, including finance management, media communication, policy, project planning, events management and community engagement. These are skills that not only will be immediately applicable to their career today, but will provide valuable insight to help students make informed decisions throughout their career.

The Masters in Arts Leadership and Cultural Management is a two-year 32 credit program available both in person and 100% online. For more information about the program, admissions, or the LEAP Institute for the Arts, please visit LEAP Institute for the Arts (http://leap.colostate.edu).

Graduate Programs in Anthropology

The department offers graduate programs leading to a Master of Arts degree (Plan A thesis option or Plan B portfolio option). It also has a Master of Arts specialization in each of four programmatic areas: Health and Well-Being, Humans and the Environment, International Development and Globalization, and Professional Methods and Techniques. Students may develop a research project or professional program in these programmatic areas, or in any area related to our faculty’s research interests.

Health and Well-Being—Studies the ways that human health and wellness are influenced by past and present sociocultural, environmental, biological, and biocultural forces, by drawing from broad and holistic perspectives on human well-being.

Humans and the Environment—Investigates how past and present human activities influence the environment; the ways ecological and other processes affect human evolution and the human condition today; and the resilience of social and ecological systems.

International Development and Globalization—examines how local societies respond to global influences; the extent to which cultural meanings, beliefs, institutions, structures of inequality, and social relations between genders and among kin are changing as a result; and how processes of economic and community development can improve basic aspects of human welfare.

Professional Methods and Techniques—develops skills in a wide range of methods and techniques used by professionals in applied anthropology, federal and state natural resource agencies, and other arenas of social, historical, biological and spatial research about humans. These include qualitative research and interview protocols, quantitative analysis, GIS and remote sensing, archaeological field survey, historic archaeological methods, culture and heritage resource management, and paleoanthropological methods.

Students interested in graduate work should refer to the Graduate and Professional Bulletin, and the department’s website (http://anthropology.colostate.edu).

**Course Description:** Cultural resource laws and policy; practices commonly employed in management and preservation of these diverse resources.

**Prerequisite:** None.

**Restriction:** Must be a: Junior.

**Registration Information:** Junior standing. Credit not allowed for both ANTH 478 and HIST 478.

**Term Offered:** Spring (even years).

**Grade Mode:** Traditional.

**Special Course Fee:** No.

**ANTH 479 International Development Theory and Practice**
*Credits: 3 (3-0-0)*

**Also Offered As:** IE 479.

**Course Description:** Contemporary issues in international community and economic development, with practical and theoretical analysis from interdisciplinary perspectives.

**Prerequisite:** None.

**Restriction:** Must be a: Junior, Senior, Senior - 5yr Bachelor, Senior - Post Bachelor, Senior - Second Bachelor.

**Registration Information:** Junior or senior standing. Credit not allowed for both ANTH 479 and IE 479.

**Term Offered:** Fall.

**Grade Mode:** Traditional.

**Special Course Fee:** No.

**ANTH 484 Supervised College Teaching**
*Credits: Var[1-5] (0-0-0)*

**Course Description:** Application of anthropological methods under actual project conditions.

**Prerequisite:** None.

**Terms Offered:** Fall, Spring.

**Grade Modes:** S/U within Student Option, Trad within Student Option.

**Special Course Fee:** No.

**ANTH 486 Practicum**
*Credits: Var[1-6] (0-0-0)*

**Course Description:** Application of anthropological methods under actual project conditions.

**Prerequisite:** None.

**Terms Offered:** Fall, Spring, Summer.

**Grade Modes:** S/U within Student Option, Trad within Student Option.

**Special Course Fee:** No.
ANTH 487 Internship Credits: Var[1-9] (0-0-0)
Course Description: Academic-based work experience with selected organizations or agencies. Supervised application of anthropological principles.
Prerequisite: ANTH 100 to 499 - at least 9 credits.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 492A Seminar: Archaeology Credits: 3 (0-0-3)
Course Description: 
Prerequisite: ANTH - at least 6 credits.
Registration Information: Sections may be offered: Online.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

ANTH 492B Seminar: Biological Anthropology Credits: 3 (0-0-3)
Course Description: 
Prerequisite: ANTH - at least 6 credits.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

ANTH 493 Capstone Seminar Credit: 1 (0-0-1)
Course Description: Linkages between anthropological subfields and how professional anthropologists approach issues.
Prerequisite: None.
Registration Information: Concurrent registration in a 4A course (see department list). Sections may be offered: Online.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 495 Independent Study Credits: Var[1-3] (0-0-0)
Course Description: 
Prerequisite: None.
Terms Offered: Fall, Spring, Summer.

Course Description: Gender and sexuality cross-culturally; theory, cultural constructions, colonialism, class, race, ethnicity, health, violence.
Prerequisite: None.
Restriction: Must not be a: Undergraduate.
Registration Information: Graduate standing.
Term Offered: Spring (even years).
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 528 Economic Anthropology Credits: 3 (0-0-3)
Course Description: Theoretical approaches to the cultural context of economic activity.
Prerequisite: ANTH - at least 9 credits.
Term Offered: Spring.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ANTH 529 Anthropology and Sustainable Development Credits: 3 (0-0-3)
Course Description: Global development goals, poverty and hunger, environmental sustainability, education, and equity.
Prerequisite: ANTH - at least 9 credits.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ANTH 530 Human-Environment Interactions Credits: 3 (3-0-0)
Course Description: Paradigms and concepts in ecological anthropology with an emphasis on adaptation and resilience.
Prerequisite: ANTH 000 to 99999 - at least 9 credits.
Term Offered: Fall (odd years).
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 532 The Culture of Disaster Credits: 3 (0-0-3)
Course Description: Study of how the human impacts of disaster and the process of recovery are shaped by cultural as well as structural realities.
Prerequisite: None.
Registration Information: Graduate standing.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.
ANTH 535 Globalization and Culture Change Credits: 3 (0-0-3)
Course Description: Evolving paradigms and patterns of globalization and international development; cultural responses – resistance, dependency, fragmented identities.
Prerequisite: ANTH - at least 9 credits.
Term Offered: Fall (even years).
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ANTH 539 Anthropology of Modernity Credits: 3 (3-0-0)
Course Description: Critical examination of the institutions, values, and processes which constitute the modern world. Impact of modern forces on "traditional" peoples.
Prerequisite: None.
Registration Information: Graduate standing.
Term Offered: Fall (odd years).
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ANTH 540 Medical Anthropology Credits: 3 (0-0-3)
Course Description: Cultural and biocultural approaches to health, illness, and the body; theory and application in medical anthropology.
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Registration Information: Graduate standing.
Term Offered: Spring (even years).
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 541 Seminar in Archaeological Method Credits: 3 (1-0-2)
Course Description: Methods of archaeological recovery and interpretation, and process of archaeological analysis and reporting.
Prerequisite: ANTH - at least 9 credits.
Registration Information: Must register for lecture and recitation.
Term Offered: Spring (even years).
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 542 Seminar in Archaeological Theory Credits: 3 (1-0-2)
Course Description: Theories of recovery, reconstruction, and interpretation of the archaeological record.
Prerequisite: ANTH - at least 9 credits.
Registration Information: Must register for lecture and recitation.
Term Offered: Spring (odd years).
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ANTH 544 From Death to Discovery Credits: 3 (1-0-2)
Course Description: Theoretical perspectives on the decay and fossilization of organisms between their death and discovery.
Prerequisite: ANTH 000 to 99999 - at least 9 credits.
Registration Information: Must register for lecture and laboratory.
Terms Offered: Fall, Spring.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ANTH 545 Global Mental Health--Theory and Method Credits: 4 (3-2-0)
Course Description: Cross-cultural study of mental health and healing; cultural, clinical, and biological perspectives; integration of theory and method.
Prerequisite: None.
Registration Information: Must register for lecture and laboratory.
Graduate standing. Undergraduates must have written consent of instructor.
Term Offered: Fall (odd years).
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 546 Culture, Mind, and Cognitive Science Credits: 3 (3-0-0)
Course Description: Anthropological contributions to cognitive science. Culture, mind, and social context. Theory building and practical applications.
Prerequisite: None.
Registration Information: Graduate standing.
Term Offered: Spring (even years).
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 547 Mind, Medicine, and Culture Credits: 4 (3-2-0)
Course Description: Cultural-psychological influences on health and healing; mind-body medicine; complementary and alternative medicine; indigenous and spiritual healing.
Prerequisite: None.
Registration Information: Graduate standing.
Term Offered: Spring (even years).
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 550A Regional Prehistory: Great Plains Credits: 3 (0-0-3)
Course Description:
Prerequisite: ANTH 350.
Term Offered: Spring (even years).
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 550B Regional Prehistory: Great Basin Credits: 3 (0-0-3)
Course Description:
Prerequisite: ANTH 350.
Term Offered: Spring (odd years).
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 550C Regional Prehistory: Southwestern Credits: 3 (0-0-3)
Course Description:
Prerequisite: ANTH - at least 9 credits.
Term Offered: Spring (even years).
Grade Mode: Traditional.
Special Course Fee: No.

ANTH 551 Historical Archaeology Credits: 3 (3-0-0)
Course Description: Theory, methods, and issues in historical archaeology.
Prerequisite: None.
Restriction: Must not be a: Undergraduate.
Registration Information: Graduate standing.
Term Offered: Spring (odd years).
Grade Mode: Traditional.
Special Course Fee: No.
ANTH 553 Archaeology of Complex Societies Credits: 3 (0-0-3)  
Course Description: Issues in development and organization of complex societies with emphasis on the Americas.  
Prerequisite: None.  
Restriction: Must be a: Graduate, Professional.  
Registration Information: Graduate standing.  
Term Offered: Spring (even years).  
Grade Mode: Traditional.  
Special Course Fee: No.

ANTH 554 Ecological and Social Agent-based Modeling Credits: 3 (2-2-0)  
Also Offered As: NR 554.  
Course Description: Exploring the use and making of agent-based models featuring interacting individuals in ecological and social simulation, with examples and projects.  
Prerequisite: None.  
Restriction: Must not be a: Freshman, Freshman, Sophomore, Sophomore.  
Registration Information: Junior or senior standing. Credit not allowed for both ANTH 554 and NR 554.  
Term Offered: Spring (odd years).  
Grade Mode: Traditional.  
Special Course Fee: No.

ANTH 555 Paleoindian Archaeology Credits: 3 (0-0-3)  
Course Description: Archaeology of the Americas during late Pleistocene/early Holocene; background and development of contemporary models.  
Prerequisite: ANTH 140.  
Term Offered: Fall (even years).  
Grade Mode: Traditional.  
Special Course Fee: No.

ANTH 556 Field Methods Training in Online Environments Credits: 3 (2-2-0)  
Course Description: Collaborative analysis of ethnographic field data collected in online virtual worlds; mixed methods applicable to other built and natural places.  
Prerequisite: None.  
Registration Information: Graduate standing.  
Term Offered: Spring.  
Grade Mode: Traditional.  
Special Course Fee: No.

ANTH 570 Contemporary Issues-Biological Anthropology Credits: 3 (0-0-3)  
Course Description: Theory and applications in biological anthropology focusing on syntheses and interpretations of human biology, variation, adaptability, and evolution.  
Prerequisite: None.  
Registration Information: Six credits in biological anthropology.  
Term Offered: Fall.  
Grade Mode: Traditional.  
Special Course Fee: No.

ANTH 571 Anthropology and Global Health Credits: 3 (3-0-0)  
Course Description: Global health concerns and problems including poverty, urbanization, malnutrition, diet, war and refugees, climate, and environment.  
Prerequisite: None.  
Restriction: Must not be a: Undergraduate.  
Registration Information: Graduate standing.  
Term Offered: Fall (even years).  
Grade Mode: Traditional.  
Special Course Fee: No.

ANTH 572 Human Origins Credits: 3 (0-0-3)  
Course Description: Major trends in human evolution through use of detailed case studies and regionally focused primary research.  
Prerequisite: None.  
Restriction: Must not be a: Undergraduate.  
Registration Information: Graduate standing.  
Term Offered: Spring (odd years).  
Grade Mode: Traditional.  
Special Course Fee: No.

ANTH 573 Paleoclimate and Human Evolution Credits: 3 (3-0-0)  
Course Description: Methods used to reconstruct past environments and understand the effects of past climate on the major trends of human evolution.  
Prerequisite: None.  
Registration Information: Graduate standing.  
Term Offered: Spring (even years).  
Grade Mode: Traditional.  
Special Course Fee: No.

ANTH 643 Advanced Ethnographic Field Methods Credits: 4 (3-2-0)  
Course Description: Mixed qualitative and quantitative field methods to address practical real-world problems. Applied, public, collaborative, participatory, and community-based ethnographic research.  
Prerequisite: None.  
Restriction: Must be a: Graduate, Professional.  
Registration Information: Must register for lecture and laboratory. Graduate standing.  
Term Offered: Spring (odd years).  
Grade Mode: Traditional.  
Special Course Fee: No.

ANTH 650 Field Archaeology Credits: Var[2-10] (0-0-0)  
Course Description: Field applications of nondestructive survey methods, advanced cartographic and excavation methods, project supervision skills.  
Prerequisite: ANTH 460.  
Restriction: Must be a: Graduate, Professional.  
Registration Information: Two seasons of field experience may substitute for ANTH 460. Required field trips.  
Terms Offered: Fall, Summer.  
Grade Mode: Instructor Option.  
Special Course Fee: Yes.

ANTH 660 Applications of International Development Credits: 3 (3-0-0)  
Also Offered As: IE 679.  
Course Description: In-depth interdisciplinary analysis of theoretical and practical issues in implementing economic and community-based international development programs.  
Prerequisite: None.  
Restriction: Must be a: Graduate, Professional.  
Registration Information: Graduate standing. Credit not allowed for both ANTH 679 and IE 679.  
Terms Offered: Fall, Spring (odd years).  
Grade Mode: Traditional.  
Special Course Fee: No.

ANTH 679 Supervised College Teaching Credits: Var[1-18] (0-0-0)  
Course Description:  
Prerequisite: None.  
Restriction: Must be a: Graduate, Professional.  
Terms Offered: Fall, Spring, Summer.  
Grade Mode: Instructor Option.  
Special Course Fee: No.
ANTH 686 Practicum-Field Archaeology  Credits: Var[1-18] (0-0-0)
Course Description: Direction of anthropological fieldwork under professional supervision.
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

ANTH 692 Seminar Credits: 3 (0-0-3)
Course Description: Current trends of research in archaeology; cultural and physical anthropology.
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring.
Grade Mode: Instructor Option.
Special Course Fee: No.

ANTH 695 Independent Study Credits: Var[1-18] (0-0-0)
Course Description: Intensive analysis of selected topics and theories in anthropology, both historical and contemporary.
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

ANTH 696 Group Study-Anthropological Theory Credits: Var[1-3] (0-0-0)
Course Description: Applications of GIS techniques useful to the social sciences. Mapping techniques and GIS toolkits are practiced in lab.
Prerequisite: GR 100.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

ANTH 699 Thesis Credits: Var[1-18] (0-0-0)
Course Description: Geographic analysis of cultural phenomena, elements emphasizing human-land relationships and spatial patterns of agriculture, cities, language, religion.
Prerequisite: GR 100.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Traditional.
Special Course Fee: No.

Geography (GR)

GR 100 Introduction to Geography (GT-SS2) Credits: 3 (3-0-0)
Course Description: Major geographic themes applied to selected regions; physical environment, human-land relationships, regional analysis.
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.
Additional Information: Social & Behavioral Sciences 3C, Geography (GT-SS2).

GR 210 Physical Geography  Credits: 3 (3-0-0)
Also Offered As: ESS 210.
Course Description: Energy, mass budget, and human impacts on atmosphere, hydrosphere, and continental land surfaces.
Prerequisite: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall (even years).
Grade Mode: Traditional.
Special Course Fee: No.

GR 303 Mountain Geography Credits: 3 (3-0-0)
Course Description: The physical and human dimensions of mountains. Examples from mountains around the world with case studies from Colorado.
Prerequisite: GR 000 to 99999 - at least 3 credits.
Restriction: Junior standing.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

GR 304 Sustainable Watersheds Credits: 3 (3-0-0)
Also Offered As: WR 304.
Course Description: Effects of climate, land use, and water use on the sustainability of water quantity and quality.
Prerequisite: None.
Restriction: Completion of the AUCC 1B mathematics requirement. Credit not allowed for both GR 304 and WR 304.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

GR 311 GIS for Social Scientists Credits: 3 (1-4-0)
Course Description: Applications of GIS techniques useful to the social sciences. Mapping techniques and GIS toolkits practiced in lab.
Prerequisite: GR 100.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring.
Grade Mode: Traditional.
Special Course Fee: No.

GR 315 Quantitative Geographical Methods Credits: 3 (3-0-0)
Course Description: Methods to collect, analyze, display, and model geographic data.
Prerequisite: GR 100.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall (odd years).
Grade Mode: Traditional.
Special Course Fee: No.

GR 320 Cultural Geography Credits: 3 (3-0-0)
Course Description: Geographic analysis of cultural phenomena, elements emphasizing human-land relationships and spatial patterns of agriculture, cities, language, religion.
Prerequisite: GR 100.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall (odd years).
Grade Mode: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.
GR 323  Remote Sensing and Image Interpretation  Credits: 3 (2-2-0)  
Also Offered As: NR 323.  
Course Description: Remote sensing systems and applications; characteristics of photographic, scanner and radar images; imagery interpretations.  
Prerequisite: None.  
Registration Information: Must register for lecture and laboratory. Credit allowed for only one of the following: GR 323, GR 503, NR 323, NR 503.  
Term Offered: Fall.  
Grade Mode: Traditional.  
Special Course Fee: No.  
FR 330  Urban Geography  Credits: 3 (3-0-0)  
Course Description: Spatial distribution of urban areas and the geographic similarities and contrasts that exist between and within them.  
Prerequisite: GR 100.  
Registration Information: Sections may be offered: Online.  
Terms Offered: Fall, Spring, Summer.  
Grade Mode: Traditional.  
Special Course Fee: No.  
GR 331  Geography of Farming Systems  Credits: 3 (3-0-0)  
Course Description: Geographic analysis of farming systems worldwide and by region; their development over time, human-land relationships, and spatial patterns.  
Prerequisite: GR 100.  
Term Offered: Spring (odd years).  
Grade Mode: Traditional.  
Special Course Fee: No.  
GR 345  Geography of Hazards  Credits: 3 (3-0-0)  
Course Description: Causes, effects, distributional patterns, and human adjustments to environmental hazards.  
Prerequisite: GR 210.  
Term Offered: Spring (odd years).  
Grade Mode: Traditional.  
Special Course Fee: No.  
GR 348  Biogeography  Credits: 3 (3-0-0)  
Course Description: Species distribution of plants and animals in relation to earth history and environments, evolution, and ecology.  
Prerequisite: GR 000 to 9999 - at least 3 credits.  
Terms Offered: Fall, Spring.  
Grade Mode: Traditional.  
Special Course Fee: No.  
GR 410  Climate Change: Science, Policy, Implications  Credits: 3 (3-0-0)  
Course Description: Implications and consequences for earth systems including the cryosphere, hydrosphere, and biosphere.  
Prerequisite: GR 000 to 9999 - at least 3 credits.  
Registration Information: Junior standing.  
Term Offered: Spring.  
Grade Mode: Traditional.  
Special Course Fee: No.  
GR 415  The Geography of Commodities  Credits: 3 (3-0-0)  
Course Description: Social relations, international trade, and environmental impacts surrounding the production, transportation, exchange and consumption of commodities.  
Prerequisite: GR 100.  
Registration Information: Junior standing.  
Terms Offered: Fall, Spring, Summer.  
Grade Mode: Traditional.  
Special Course Fee: No.  
GR 420  Spatial Analysis with GIS  Credits: 4 (3-2-0)  
Course Description: Theory, application of geographic information systems for spatial analysis; conceptual basis of GIS, nature and use of geographic data, case studies.  
Prerequisite: GR 000 to 9999 - at least 3 credits.  
Registration Information: Credit not allowed for both GR 420 and NR 322.  
Term Offered: Fall.  
Grade Mode: Traditional.  
Special Course Fee: No.  
GR 430  Land Change Science and Remote Sensing  Credits: 3 (3-0-0)  
Course Description: Local case studies and global cases of land-use/land-cover changes in rural, peri-urban, and urban areas.  
Prerequisite: GR 100.  
Registration Information: Junior standing.  
Term Offered: Spring (even years).  
Grade Mode: Traditional.  
Special Course Fee: No.  
GR 431  Land Change Science Lab  Credit: 1 (0-0-0)  
Course Description: Utilize advanced remote sensing techniques and satellite images, air photos, and ancillary data to investigate land-use and land-cover changes.  
Prerequisite: GR 323 or NR 323 or GR 503 or NR 503.  
Registration Information: Must have concurrent registration in GR 430.  
Term Offered: Spring (even years).  
Grade Mode: Traditional.  
Special Course Fee: No.  
GR 448  Forest Biogeography and Climate Change  Credits: 3 (3-0-0)  
Course Description: Forest adaptation and conservation in relation to global change with a focus on climate change.  
Prerequisite: ESS 211 or ESS 311 or F 311 or GR 100 or GR 210 or ESS 210 or GR 303 or GR 348 or GR 410.  
Registration Information: Junior standing.  
Term Offered: Spring (odd years).  
Grade Mode: Traditional.  
Special Course Fee: No.  
GR 487  Internship  Credits: Var[1-9] (0-0-0)  
Course Description: Academic-based work experience with selected organizations or agencies. Supervised application of principles of geography.  
Prerequisite: GR 100 to 499 - at least 9 credits.  
Terms Offered: Fall, Spring, Summer.  
Grade Mode: Traditional.  
Special Course Fee: No.  
GR 493  Capstone  Credit: 1 (1-0-0)  
Course Description: Exploration of the linkages among geographic subfields and other natural and social sciences as well as how professional geographers approach issues.  
Prerequisite: GR 303 with a minimum grade of A++, may be taken concurrently or GR 410 with a minimum grade of A++, may be taken concurrently or GR 415 with a minimum grade of A++, may be taken concurrently or GR 430 with a minimum grade of A++, may be taken concurrently.  
Term Offered: Fall, Spring.  
Grade Mode: Traditional.

Major in Anthropology

The mission of the Anthropology Department is to

1. offer and maintain instructional programs that provide a comprehensive overview and analyses of people and their cultures, both past and present;
2. conduct research in order to advance and expand knowledge of the fields of anthropology and geography;
3. participate actively in programs of interdisciplinary research.

The Department of Anthropology houses a faculty of cultural anthropologists, archaeologists, biological anthropologists, and geographers whose scholarship spans the breadth of the human experience. The program prepares undergraduate students to describe, analyze, and interpret the human condition. An examination of the social, environmental, and evolutionary contexts in which the human species is embedded defines most course work in the discipline. The program is integrative, drawing from geography, biology, the humanities, and other social and natural sciences. Geography figures prominently in our program and provides an important spatial lens through which human groups are examined over time. Four programmatic areas define faculty research and scholarship with which students can engage: humans and the environment, international development and globalization, health and well-being, and professional methods and techniques. In the education of undergraduates, the department values and promotes experiential training, primary research, and public engagement and education.

The research endeavors of the anthropology faculty are trans-disciplinary and international, they are interested in diverse topics including but not limited to contemporary culture, ethnicity, linguistics, comparative religion, virtual worlds, subsistence patterns, archaeology, human ecology, human anatomy, evolution, biogeography, land cover/land use patterns, glaciology, and the behavior of non-human primates.

Anthropology majors follow a liberal arts curriculum that provides a broad education with an emphasis on learning how to learn. The department has ten research and teaching laboratories and three summer field schools; the Ethnographic Field School at the Pine Ridge Indian Reservation, the Archaeology Field School, and the Paleontology Field School.

Undergraduate students can pursue a general anthropology degree, learning about the diversity of the human existence from a broad and holistic perspective. Students can also declare a concentration within the program. Declaring a concentration allows for a focused course of study, specializing in the particular subfield of interest. Within each concentration (Archaeology, Biological Anthropology, Cultural Anthropology and Geography), specific categories of classes guide students in learning the major theories, methods, and applications related to modern practice of our discipline. Along with our offerings of world class field schools, archaeological, biological, and ethnographic methods and geographical techniques are encouraged in order to further gain experience and perspective. Upon graduation, students are prepared for jobs or advanced training in graduate school. Students come away with a respect and appreciation for the diversity of human existence.

Learning Outcomes

Students will:

- Demonstrate knowledge related to a basic appreciation of anthropology and its potential including:
  a. respect for the similarities and differences that characterize human cultures over time and across space;
  b. the theoretical perspectives that anthropologists use to comprehend these similarities and differences;
  c. the methods and tools used to describe and analyze them; and
  d. how the relationship between theory, methods, and data intersects.

- Integrate anthropological concepts across subfields or with other social sciences and humanities disciplines, and articulate their anthropological understandings through papers written and presented during their senior year.

- Use what they have learned in their anthropology courses in future activities after graduation.

Potential Occupations

Anthropology, like many majors in the liberal arts, provides students with a broad academic background suitable for a variety of jobs in the public and private sectors. Anthropology majors are trained to think independently and critically, communicate effectively, and function in a multicultural world. Employers appreciate liberal arts majors for their multiple skills and their ability to adapt to a variety of tasks and work environments. Participating in internships and cooperative education opportunities is highly recommended to enhance students’ practical training and development. Careers for graduates are available in international development, health care, education, business, natural resource management, and government. Graduates who go on for advanced studies can pursue careers in anthropology or attain advanced positions with the possibility of rising to top professional levels.

Some career opportunities for anthropology graduates include, but are not limited to: museum curator/researcher, genealogist, international relief representative, salvage archaeologist, collections assistant, resource specialist, classical or historical anthropologist, cultural affairs officer, diplomatic service representative, immigration or foreign service officer, linguist, educational television researcher, forensic osteologist, biographical writer, scientific/technical writer, reporter, ethnographic photographer, anthropological linguist, rural development worker, ethnic groups’ special concerns advocate, intercultural educator, medical anthropologist, grant writer, psychological anthropologist, international development administrator, public relations representative, public opinion...
pollster, sales/marketing representative, consultant for cross-cultural relations, personnel worker, geographic information systems specialist. • Cultural Anthropology Concentration

1 ANTH 100 fulfills All-University Core Curriculum (AUCC) category 3C. Taking ANTH 100 in the freshman year will eliminate the requirement for 3 credits of Social and Behavioral Sciences in the sophomore year. If ANTH 200 is chosen in the freshman year instead, then 3 credits of Social and Behavioral Sciences will be required in the sophomore year, selected from the list of courses in category 3C of the AUCC.
2 ANTH 200 fulfills AUCC category 3E. Taking ANTH 200 in the freshman year will eliminate the requirement for 3 credits of Global and Cultural Awareness in the sophomore year. If ANTH 100 is chosen in the freshman year instead, then 3 credits of Global and Cultural Awareness will be required in the sophomore year, selected from the list of courses in category 3E of the AUCC.
3 Additional Humanities courses taken in the freshman and senior years for a total of six credits must include two subject codes, selected from among the following: ART, D, CO, E, ETST 430, L***, LB 192 (Arts and Humanities sections only), MU, PHIL, SPCM, TH.
4 Select 7 credits including two subject codes and at least one formal laboratory from the following: AA, BMS, BIO, BZ, CHEM, GEOL, GR 210, LIFE, MATH, NR, NSCI, PH, SOCR, and STAT.
5 Select a total of 9 credits over the sophomore, junior and senior years as shown, and including at least two subject codes, from the following: ECON, HIST, JTC, POLS, PSY, SOC, LB 192 (social science sections only), ETST (except ETST 430).
6 Select any course with the ANTH or GR subject code.
7 ANTH 493 must be taken concurrently with one of the AUCC 4A anthropology courses listed with ANTH 493 in the senior year. Using Competencies (AUCC 4A) must be taken concurrently with ANTH 493. Courses approved for AUCC category 4A taken in the sophomore, junior, or senior year and not concurrently with ANTH 493 and not included in the approved list in the program will not count toward completion of the 4A requirement for this major. Students taking Senior Honors Thesis (HONR 499, 3 credits) are also required to register for ANTH 493 (1 credit).
8 Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

**Major in Anthropology, Archaeology Concentration**

The Archaeology concentration at CSU focuses on the Americas and includes prehistoric and historic archaeology. The faculty members of this sub-discipline have expertise in:

- Rocky Mountain and Plains Archaeology
- Paleo-Indian Studies
- Hunter-Gatherer Ecology
- Taphonomy
- Zooarchaeology
- Public Archaeology
- Andean Archaeology

- Inca and Spanish Empires
- Mining Communities
- Mesoamerican Archaeology
- Landscape Archaeology
- Legacies of Resilience Project (LORE-LPG)

Special resources include the Center for Mountain and Plains Archaeology; the MesoAmerican lab; and the Cultural Resources section of the Center for the Ecological Study of Military Lands. The archaeology program sponsors an annual field school each summer and houses the CSU Archaeological Repository.

1. ANTH 100 fulfills category 3C in the All-University Core Curriculum (AUCC). Taking ANTH 100 in the freshman year will eliminate the requirement for 3 credits of Social and Behavioral Sciences in the sophomore year. If ANTH 200 is chosen in the freshman year instead, then 3 credits of Social and Behavioral Sciences will be required in the sophomore year, selected from the list of courses in category 3C of the AUCC.

2. ANTH 200 fulfills AUCC category 3E. Taking ANTH 200 in the freshman year will eliminate the requirement for 3 credits of Global and Cultural Awareness in the sophomore year. If ANTH 100 is chosen in the freshman year, then 3 credits of Global and Cultural Awareness will be required in the sophomore year, selected from the list of courses in category 3E of the AUCC.

3. Additional Humanities courses taken in the freshman and senior years for a total of six credits must include two subject codes, selected from among the following: ART, D, CO, E, ETST 430, L***, LB 192 (Arts and Humanities sections only), MU, PHIL, SPCM, TH.

4. Select 6 credits including two subject codes from the following: AA, BMS, BIO, BZ, CHEM, GEOL, GR 210, LIFE, MATH, NR, NSCI, PH, SOCR, and STAT.

5. Select a total of 9 credits over the sophomore, junior, and senior years as shown and including at least two subject codes from the following: ECON, HIST, JTC, POLS, PSY, SOC, LB 192 (social science sections only), ETST (except ETST 430).

6. ANTH 493 must be taken concurrently with one of the AUCC 4A cultural anthropology courses listed with ANTH 493 in the senior year. Using Competencies (AUCC 4A) must be taken concurrently with ANTH 493. Courses approved for AUCC category 4A taken in the sophomore, junior, or senior year and not concurrently with ANTH 493 and not included in the approved list in the program will not count toward completion of the 4A requirement for this major. Students taking Senior Honors Thesis (HONR 499, 3 credits) also are required to register for ANTH 493 (1 credit).

7. Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300 to 400-level).

**Major in Anthropology, Biological Anthropology Concentration**

Over the past half century biological anthropology has undergone tremendous change from a discipline that was defined by a descriptive, typological approach to human morphology to one that includes both experimental and comparative analyses in a population based framework.

Biological anthropologists continue to cross traditional disciplinary boundaries and interact with both the physical and natural sciences, including biology, anatomy, genetics, chemistry, biometry, or endocrinology as well as the social sciences.

The expertise of existing faculty in Biological Anthropology at CSU includes:

- Human skeletal biology
- Evolutionary theory
- Neanderthal paleobiology and paleobiogeography
- Dental anthropology
- Public Health
- Early hominid feeding ecology
- Taphonomy
- Plio-Pleistocene Africa
- Pleistocene Asia

Special resources include the Paleoanthropology and Zooarchaeology lab, the Human Origins Lab and the Bioanthropology Lab. Existing faculty also have geographic foci significant to their research. Research areas include Uzbekistan, Kazakhstan, Tanzania, and Mexico.

1. ANTH 100 fulfills All-University Core Curriculum (AUCC) category 3C. Taking ANTH 100 in the freshman year will eliminate the requirement for 3 credits of Social and Behavioral Sciences in the sophomore year. If ANTH 200 is chosen in the freshman year instead, then 3 credits of Social and Behavioral Sciences will be required in the sophomore year, selected from the list of courses in category 3C of the AUCC.

2. ANTH 200 fulfills AUCC category 3E. Taking ANTH 200 in the freshman year will eliminate the requirement for 3 credits of Global and Cultural Awareness in the sophomore year. If ANTH 100 is chosen in the freshman year instead, then 3 credits of Global and Cultural Awareness will be required in the sophomore year, selected from the list of courses in category 3E of the AUCC.

3. Additional Humanities courses taken in the freshman and senior years for a total of six credits must include two subject codes, selected from among the following: ART, D, CO, E, ETST 430, L***, LB 192 (Arts and Humanities sections only), MU, PHIL, SPCM, TH.

4. Select a total of 9 credits over the sophomore, junior and senior years as shown, and including at least two subject codes, from the following: ECON, HIST, JTC, POLS, PSY, SOC, LB 192 (social science sections only), ETST (except ETST 430).

5. Capstone topic must focus on geography. ANTH 493 must be taken concurrently with one of the AUCC 4A anthropology courses listed with ANTH 493 in the senior year. Using Competencies (AUCC 4A) must be taken concurrently with ANTH 493. Courses approved for AUCC category 4A taken in the sophomore, junior, or senior year and not concurrently with ANTH 493 and not included in the approved list in the program will not count toward completion of the 4A requirement for this major. Students taking Senior Honors Thesis (HONR 499, 3 credits) are also required to register for ANTH 493 (1 credit).

6. Select enough elective credits to bring program total to a minimum of 120 credits, to which at least 42 must be upper-division (300- to 400-level).

**Major in Anthropology, Cultural Anthropology Concentration**

The Cultural Anthropology concentration focuses on contemporary experiences of culturally distinct communities encountering a rapidly globalizing political economy. Students are provided with robust training in mixed methods, community-based approaches, and applied anthropology. Topically, faculty investigate issues related to the transformation of individual experience and community relations within the context of economic development, governmental and nongovernmental policy, and environmental change. Increasingly, faculty seek to understand the way subjective and material well-being are impacted by the rapidly changing contexts of modernity. Topics of research interest include:

- Human-Environment Interactions
- Community and Economic Development
- Health and Well-Being
- Cultural Psychiatry
- Disasters and Resilience
- Gender
- Culture Continuity and Change

Passionate about teaching, faculty strive to bring excitement and relevance to the classroom by infusing it with their practical field experiences. Cultural faculty conduct their research in India, Southeast Asia, Central Asia, East Africa, the Caribbean, New Orleans, Native North America, and in virtual reality. Students concentrating in Cultural Anthropology explore issues of place and space, cultural theory, cultural content and methods.

**Major in Anthropology, Geography Concentration**

Geography at CSU focuses on providing undergraduate students with a broad background in geographic thinking with an emphasis on the traditional geographic focus of understanding dynamic interaction between humans and the environment in an era of rapid global change. Faculty use a wide range of research methods including geographic information systems (GIS), remote sensing, spatial modeling, and dendrochronology to address applied research questions in Colorado, the Rocky Mountains, Southeast Asia, Mesoamerica, Melanesia, and southern South America. Research focus areas include:

- Climate change implications for society and ecosystems
- Land-use and land-cover change
- Biogeography

A concentration and minor in Geography are degree options within the Department of Anthropology. Current courses offered range from introductory courses that introduce students to geography and the two main branches of cultural and physical geography, to advanced courses which focus on methods (e.g. spatial analysis and GIS, remote sensing) and topical subjects such as climate change, forest ecology, mountain geography, the geography of commodities, and land change science.

ANTH 100 fulfills All-University Core Curriculum (AUCC) category 3C. Taking ANTH 100 in the freshman year will eliminate the requirement for 3 credits of Social and Behavioral Sciences in the sophomore year. If ANTH 200 is chosen in the freshman year instead, then 3 credits of Social and Behavioral Sciences will be required in the sophomore year, selected from the list of courses in category 3C of the AUCC.

ANTH 200 fulfills AUCC category 3E. Taking ANTH 200 in the freshman year will eliminate the requirement for 3 credits of Global and Cultural Awareness in the sophomore year. If ANTH 100 is chosen in the freshman year instead, then 3 credits of Global and Cultural Awareness will be required in the sophomore year, selected from the list of courses in category 3E of the AUCC.

Anthropology Humanities courses taken in the freshman and senior years for a total of six credits must include two subject codes, selected from among the following: ART, D, CO, E, ETST 430, L***, LB 192 (Arts and Humanities sections only), MU, PHIL, SPCM, TH.

Select 7 credits including two subject codes and at least one formal laboratory from the following: AA, BMS, BIO, BZ, CHEM, GEOL, LIFE, MATH, NR, NSCI, PH, SOCR, and STAT.

Select a total of 9 credits over the sophomore, junior and senior years as shown, and including at least two subject codes, from the following: ECON, HIST, JTC, POLS, PSY, SOC, LB 192 (social science sections only), ETST (except ETST 430).

Capstone topic must focus on geography. ANTH 493 must be taken concurrently with one of the AUCC 4A anthropology courses listed with ANTH 493 in the senior year. Using Competencies (AUCC 4A) must be taken concurrently with ANTH 493. Courses approved for AUCC category 4A taken in the sophomore, junior, or senior year and not concurrently with ANTH 493 and not included in the approved list in the program will not count toward completion of the 4A requirement for this major. Students taking Senior Honors Thesis (HONR 499, 3 credits) are also required to register for ANTH 493 (1 credit).

Select enough elective credits to bring program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

**Minor in Anthropology**

Anthropology focuses on a cross-cultural view of humanity, and broadly conceived dimensions of human behavior. Description and explanation of human activities in other societies provide a sense of perspective for individuals operating within their own culture. A minor may be focused on one or more of the sub-disciplinary divisions such as biology, archaeology, cultural anthropology, or applied anthropology; or it may be distributed across the fields like the major requirements.

**Requirements**

**Effective Fall 2001**

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

**Minor in Geography**

The minor in Geography examines the critical interactions among space, place, people and the built and natural environment to interpret the spatial and temporal distribution of features and processes, applying spatial techniques and information technologies such as Geographic Information Systems (GIS) and remote sensing.
Master of Arts in Anthropology

Plan A

The thesis option must consist of a minimum of 30 semester credits of course work concentrated in anthropological areas relevant to the participant’s professional goals. The thesis is the culmination of a research project carried out by the student under the guidance of his or her advisor. A final examination consists of a defense of the thesis, as well as other parts of the program of study.

Plan B

The non-thesis option is intended for students seeking development of an understanding of anthropology which will allow them to move on to a PhD program in anthropology, or be incorporated in their work. Plan B students are expected to take a more broadly distributed series of courses and to show less specialization than that which characterizes Plan A programs of study.

Requirements

Effective Spring 2013

Total Credits 21

1 Credit for the techniques course requirement may not double count toward the minor.
2 Credit is not allowed for both GR 420 and NR 322.
Select at least three credits in a 500- or 600-level anthropology course outside the student’s subfield of specialization (archaeology, socio-cultural or biological anthropology).

Select at least six credits from departments outside of Anthropology. The courses should be integrated with the student’s program of study.

Total Credits 16-17

- A minimum of 18 hours of regular course work in Anthropology is required. This excludes independent study.
- A maximum of six credits of ANTH 695 will be allowed towards graduation under the Plan A option. A minimum of 3 credits of ANTH 695 is required toward graduation under the Plan B option.
- A maximum of six credits of ANTH 699 will be allowed towards graduation under Plan A. No credits of ANTH 699 will be allowed toward graduation under Plan B.

Major in Art, B.F.A. 

Throughout history, art has been a fundamental language of the human spirit. Visual arts express human experience through an ever-widening range of media and materials, some of which include: oils, acrylics, pastels, charcoal, clay, plaster, steel, bronze, wood, copper, litho stones, and computers. Visual artists create abstract works and images of objects, people, nature, topography, and events. The Department of Art and Art History offers several options of study. The B.F.A. (Bachelor of Fine Arts) degree in studio art and the B.A. (Bachelor of Arts) degree in art history, art education, or studio art are all professional degrees, leading to related art careers.

Learning Outcomes

Students will demonstrate:

- Fundamental knowledge and mastery of media and processes necessary to communicate meaning in a work of art.
- Ability to communicate clearly about their own art and the art of others.
- Knowledge about contemporary art and motivation to view and discuss current local, regional, and national exhibitions. Students well versed on contemporary art would:
  a. regularly read reviews of exhibitions in local and national newspapers;
  b. regularly read art periodicals;
  c. attend multiple exhibitions; and
  d. be knowledgeable about contemporary artists in their discipline (i.e., nationally known painters, sculptors, etc.).

Potential Occupations

Art graduates possess a number of transferable communication, analytical, and critical thinking skills, and as a result find positions in academia, in addition to roles as freelance artists, graphic designers, art educators, art historians, studio fine artists and as “creatives” in government and industry. Many employers appreciate art majors for their multiple skills and their ability to adapt to a variety of tasks and work environments. Participation in internships, cooperative education, and service learning opportunities is highly recommended to enhance practical training and development. Graduates who go on for advanced studies can attain more responsible positions with the possibility of rising to top professional levels.

Depending on student interests, the electives taken, or the concentration selected, available career choices include, but are not limited to: art appraiser, art director, art therapist, exhibit designer, art critic, jeweler, gallery director, graphic design artist, free lance artist, sculptor, woodworker, welder, foundry worker, studio photographer, technical illustrator, painter, textile designer, weaver, art educator, art historian, art curator, art librarian, art museum educator, web page designer, photo lab technician, art restorer, and master printer.

Bachelor of Fine Arts (B.F.A.)

The B.F.A. degree is a professional program for careers in studio art. Students have an opportunity to concentrate in one of ten studio fields: Drawing, Electronic Art, Graphic Design, Fibers, Metalsmithing, Painting, Photo Image Making, Pottery, Printmaking, and Sculpture. The curriculum progression in the department is similar within the concentrations and some concentrations may have restrictions. Freshmen study foundation courses in the fine arts, which include drawing, painting, sculpture, and art history. Sophomores explore various concentration courses and become familiar with the studio practices for the concentration studios housed in separate wings that feature large, well-equipped studio spaces designed for exploration of work in a specific media. Juniors and seniors
focus on advanced topics in their chosen concentration by taking one upper-division course in their chosen field each semester.

\(^1\) Select from the list of courses (other than ART 100) in category 3B in the All-University Core Curriculum (AUCC). Only 3 of the 6 credits required for Arts and Humanities may come from intermediate (L*** 200 and L*** 201) foreign language courses.

\(^2\) Students in the Drawing Concentration may select any three courses from this list. Students in any other concentration must select the course appropriate to their concentration as one of the three courses (ART 256 for Electronic Art, ART 250 for Fibers, ART 255 for Graphic Design; ART 245 for Metalsmithing; ART 260 for Painting, ART 230 for Photo Image Making, ART 240 for Pottery, ART 265 for Printmaking, and ART 270 for Sculpture).

\(^3\) Select six credits of upper-division art history. In order to complete category 4A and 4B of the All-University Core Curriculum (AUCC), at least three credits must be from the Upper-Division Art History list.

\(^4\) Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

In order to complete the degree, a student must also complete one of the following concentrations: drawing, electronic art, fibers, graphic design, metalsmithing, painting, photo image making, pottery, printmaking, or sculpture.

1. Select from the list of courses (other than ART 100) in category 3B in the All-University Core Curriculum (AUCC). Only 3 of the 6 credits required for Arts and Humanities may come from intermediate (L*** 200 and L*** 201) foreign language courses.
2. Students in the Drawing Concentration may select any three courses from this list. Students in any other concentration must select the course appropriate to their concentration as one of the three courses (ART 256 for Electronic Art, ART 250 for Fibers, ART 255 for Graphic Design, ART 245 for Metalsmithing; ART 260 for Painting, ART 230 for Photo Image Making, ART 240 for Pottery, ART 265 for Printmaking, and ART 270 for Sculpture).
3. Select six credits of upper-division art history. In order to complete category 4A and 4B of the All-University Core Curriculum (AUCC), at least three credits must be from the Upper-Division Art History list.
4. Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Drawing Concentration

In addition to the Art (B.F.A.) core courses, the following must be completed:

In order to complete category 4A and 4B of the All-University Core Curriculum (AUCC), at least three credits must be from the Upper-Division Art History list.
Select from the list of courses (other than ART 100) in category 3B in the All-University Core Curriculum (AUCC). Only 3 of the 6 credits required for Arts and Humanities may come from intermediate (L*** 200 and L*** 201) foreign language courses.

Students in the Drawing Concentration may select any three courses from this list. Students in any other concentration must select the course appropriate to their concentration as one of the three courses (ART 256 for Electronic Art, ART 250 for Fibers, ART 255 for Graphic Design; ART 245 for Metalsmithing; ART 260 for Painting, ART 230 for Photo Image Making, ART 240 for Pottery, ART 265 for Printmaking, and ART 270 for Sculpture).

Select six credits of upper-division art history. In order to complete category 4A and 4B of the All-University Core Curriculum (AUCC), at least three credits must be from the Upper-Division Art History list.

Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

**Fibers Concentration**

In addition to the Art (B.F.A.) core courses, the following must be completed:

1. Select from the list of courses (other than ART 100) in category 3B in the All-University Core Curriculum (AUCC). Only 3 of the 6 credits required for Arts and Humanities may come from intermediate (L*** 200 and L*** 201) foreign language courses.

2. Students in the Drawing Concentration may select any three courses from this list. Students in any other concentration must select the course appropriate to their concentration as one of the three courses (ART 256 for Electronic Art, ART 250 for Fibers, ART 255 for Graphic Design; ART 245 for Metalsmithing; ART 260 for Painting, ART 230 for Photo Image Making, ART 240 for Pottery, ART 265 for Printmaking, and ART 270 for Sculpture).

3. Select six credits of upper-division art history. In order to complete category 4A and 4B of the All-University Core Curriculum (AUCC), at least three credits must be from the Upper-Division Art History list.

4. Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Select from the list of courses (other than ART 100) in category 3B in the All-University Core Curriculum (AUCC). Only 3 of the 6 credits required for Arts and Humanities may come from intermediate (L*** 200 and L*** 201) foreign language courses.
Students in the Drawing Concentration may select any three courses from this list. Students in any other concentration must select the course appropriate to their concentration as one of the three courses (ART 256 for Electronic Art, ART 250 for Fibers, ART 255 for Graphic Design; ART 245 for Metalsmithing; ART 260 for Painting, ART 230 for Photo Image Making, ART 240 for Pottery, ART 265 for Printmaking, and ART 270 for Sculpture).

Select six credits of upper-division art history. In order to complete category 4A and 4B of the All-University Core Curriculum (AUCC), at least three credits must be from the Upper-Division Art History list.

Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Printmaking Concentration

In addition to the Art (B.F.A.) core courses, the following must be completed:

**Major in Art, B.A.**

Throughout history, art has been a fundamental language of the human spirit. Visual arts express human experience through an ever-widening range of media and materials, some of which include: oils, acrylics, pastels, charcoal, clay, plaster, steel, bronze, wood, copper, litho stones, and computers. Visual artists create abstract works and images of objects, people, nature, topography, and events. The Department of Art and Art History offers several options of study. The B.F.A. (Bachelor of Fine Arts) degree in studio art and the B.A. (Bachelor of Arts) degree in art history, art education, or studio art are all professional degrees, leading to related art careers.

**Learning Outcomes**

Students will demonstrate:

- Fundamental knowledge and mastery of media and processes necessary to communicate meaning in a work of art.
- Ability to communicate clearly about their own art and the art of others.
Knowledge about contemporary art and motivation to view and discuss current local, regional, and national exhibitions. Students well versed on contemporary art would:

- regularly read reviews of exhibitions in local and national newspapers;
- regularly read art periodicals;
- attend multiple exhibitions; and
- be knowledgeable about contemporary artists in their discipline (i.e., nationally known painters, sculptors, etc.).

**Potential Occupations**

Art graduates possess a number of transferable communication, analytical, and critical thinking skills, and as a result find positions in academia, in addition to roles as freelance artists, graphic designers, art educators, art historians, studio fine artists and as “creatives” in government and industry. Many employers appreciate art majors for their multiple skills and their ability to adapt to a variety of tasks and work environments. Participation in internships, cooperative education, and service learning opportunities is highly recommended to enhance practical training and development. Graduates who go on for advanced studies can attain more responsible positions with the possibility of rising to top professional levels.

Depending on student interests, the electives taken, or the concentration selected, available career choices include, but are not limited to: art appraiser, art director, art therapist, exhibit designer, art critic, jeweler, gallery director, graphic design artist, free lance artist, sculptor, woodworker, welder, foundry worker, studio photographer, technical illustrator, painter, textile designer, weaver, art educator, art historian, art curator, art librarian, art museum educator, web page designer, photo lab technician, art restorer, and master printer.

**Concentrations**

- Art Education Concentration
- Art History Concentration
- Studio Concentration

**Bachelor of Arts, Art Education Concentration**

The Art Education concentration embraces the artist-teacher concept, which allows students to develop a studio concentration while preparing to teach art at the K-12 level. The program is comprehensive, meaning students take course work to prepare them to teach at the elementary and secondary school levels. The Art Education program enjoys good working relationships with school districts in the state of Colorado. Students integrate studio, art history, criticism, and aesthetics as they observe and teach—through a variety of experiences—in the public schools.

Students interested in pursuing a teaching license through CSU may refer to the Center for Educator Preparation (CEP) (http://cep.chhs.colostate.edu/students/teacher/admissions.aspx), College of Health and Human Sciences section for general information.

Art Education students must maintain a 2.75 cumulative GPA for admission to the Art Education program, eligibility for student teaching placement, and licensure.

**Requirements**

**Effective Fall 2016**

A minimum grade of C (2.000) must be achieved in each upper-division art course in the student’s concentration. The minimum scholastic average acceptable for graduation is 2.000 computed only for courses attempted at CSU.

Bachelor of Arts, Art History Concentration

Art History provides a basic preparation in art history for graduate studies; careers in research and teaching at the college level; for positions in museums, libraries, or private collections; or for writing and criticism in the arts. Graduate studies or advanced-level classes are necessary for advancement. In-depth study in a second field allows students to refine their focus.

Requirements

Effective Fall 2016

A minimum grade of C (2.000) must be achieved in each upper-division art course in the student’s concentration. The minimum scholastic average acceptable for graduation is 2.000 computed only for courses attempted at CSU.

### Bachelor of Arts, Studio Concentration

The Studio concentration gives students a liberal education with a focus on one or more of the visual arts. The concentration enables graduates to incorporate their specialty into their careers and life activities. People who are knowledgeable about art may contribute much by supporting community arts activities and teaching others.

Graduate

Graduate Programs in Communication Studies
The graduate program leads to a Master of Arts in Communication Studies. Graduate coursework, as well as a required thesis for the Plan A master’s, enables students to develop expertise in one or a combination of three areas of emphasis:

1. media and visual culture;
2. relational and organizational communication; and/or
3. rhetoric and civic engagement.

In each of these areas, students select coursework from among the following topics:

1. contemporary issues in media, media theories, media audiences, media texts, and media industries;
2. communication theories, communication and diversity, interpersonal theories, and discourse and organization; or
3. public address, rhetoric and public affairs, rhetorical theory, rhetorical criticism, rhetoric of everyday life, and feminist theory.

The Plan B master’s provides a Deliberative Practices Specialization with coursework in deliberative theory and practice, a practicum, and an Independent Study serving as the culminating report in lieu of a thesis.

Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Communication Studies (http://communicationstudies.colostate.edu).

Major in Communication Studies

Communication Studies majors receive a broad-based, liberal arts education, designed to equip them for the challenges of the 21st century, the need to adapt to a rapidly changing workplace, and the likelihood of more than one career. The major encompasses many facets of media and visual culture, relational and organizational communication, and rhetoric and civic engagement. Along with courses in communication studies, the major requires courses in the arts and humanities, the social sciences, and history, and a minor or second major.

The department’s goals for undergraduate majors include helping students to achieve an outstanding education in communication studies, to further their knowledge and understanding of human communication, and to provide leadership in communication activities. In so doing, we hope to help students prepare for successful careers, the duties of citizenship, and productive and rewarding lives.

Learning Outcomes

Students will demonstrate:

- **Totality:** Students will be able to demonstrate a comprehensive understanding of the Communication Studies discipline. They will be able to discuss the central topics in the field related to history, theory, and research. Students’ knowledge of the field will also span several contexts of communication scholarship, including media and visual culture, relational and organizational communication, and rhetoric and civic engagement.

- **Synthesis:** In addition to having a comprehensive understanding of the foundational concepts, theories and research domains in the Communication Studies discipline, students will be able to integrate what they have learned in these areas and apply their knowledge to address contemporary issues salient to their personal, professional, and civic lives.
• **Skillfulness**: Central to the Communication Studies discipline is the development of strong oral and written skills. Students will be able to construct and deliver high-quality, evidence-based arguments tailored to specific audiences. Additionally, students will be able to thoughtfully and ethically critique the oral and written work of their peers (as well as communicators in other professional and public settings).

**Potential Occupations**

The Communication Studies major, like many liberal arts majors, provides students with a broad academic background suitable for a variety of jobs in the public and private sectors. Majors are trained to think independently and critically, communicate effectively, and function in a multicultural world. Employers appreciate Communication Studies majors for their multiple skills and their ability to adapt to a variety of tasks and work environments.

Many majors find employment in public relations/marketing, politics, sales, human relations, government, business management, convention and meeting planning, education, and computer-mediated communication. Some students move on to graduate work in communication studies and to post-graduate study in law and theology.

Career opportunities include, but are not limited to employee relations specialist, employment counselor, human resource consultant, industrial relations representative, public relations specialist, labor relations consultant, training director, vocational rehabilitation counselor, advance agent, business communicator, equal opportunity representative, foreign service officer, cooperative extension service worker, politician, lobbyist, speechwriter, press agent, literary agent, interviewer, sales representative, scriptwriter, lawyer, teacher.

Internships are available to Communication Studies majors and are highly recommended to enhance practical training and development. Graduates who seek advanced studies can attain more responsible positions with the possibility of rising to top professional levels.

Prerequisite: ECON 304.
Registration Information: Sections may be offered: Online.
Term Offered: Spring.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 460 Economic Development Credits: 3 (3-0-0)
Course Description: Economic problems of underdeveloped nations.
Prerequisite: ECON 304.
Registration Information: Sections may be offered: Online.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 463 Regional Economics Credits: 3 (3-0-0)
Course Description: Introduction to economic importance of location for firms, consumers, and policy makers. Basic tools, applications, and student research.
Prerequisite: ECON 306.
Registration Information: Sections may be offered: Online.
Terms Offered: Fall, Spring, Summer.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 464 Recent Economic Thought Credits: 3 (3-0-0)
Course Description: Nontraditional schools of economic thought, such as institutionalism and neo-Marxism, that critique neoclassical economic theory.
Prerequisite: ECON 304 and ECON 306.
Term Offered: Spring.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 484 Supervised College Teaching Credits: Var[1-3] (0-0-0)
Course Description: Assistance in teaching introductory economics courses.
Prerequisite: ECON 304 and ECON 306.
Registration Information: Written consent of instructor. A maximum of 10 combined credits for all 384 and 484 courses are counted towards graduation requirements.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

ECON 487 Internship Credits: Var[1-3] (0-0-0)
Course Description: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

ECON 492 Seminar Credits: 3 (0-0-3)
Course Description: Summarizes, discusses, and applies issues and policies chosen by the instructor. Emphasis on student participation, discussion, and research.
Prerequisite: AREC 335, may be taken concurrently or ECON 335, may be taken concurrently and (ECON 304, may be taken concurrently and ECON 306, may be taken concurrently).
Restriction: .
Registration Information: Senior standing.
Terms Offered: Fall, Spring.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 495 Independent Study Credits: Var[1-18] (0-0-0)
Course Description: None.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

ECON 501 Quantitative Methods for Economists Credits: 3 (3-0-0)
Course Description: Quantitative methods essential for graduate study in economics; functional forms, optimization, matrix methods, topological modeling.
Prerequisite: MATH 141 or MATH 155 or MATH 160.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 504 Applied Macroeconomics Credits: 3 (3-0-0)
Course Description: Application of macroeconomic models to economic growth, economic fluctuations, and policy analysis.
Prerequisite: ECON 304 and ECON 306.
Term Offered: Spring.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 505 History of Economic Thought Credits: 3 (3-0-0)
Course Description: History of economic thought as a foundation for studying economic theory.
Prerequisite: None.
Registration Information: Graduate standing.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

ECON 506 Applied Microeconomic Theory Credits: 3 (3-0-0)
Also Offered As: AREC 506.
Course Description: Introduction to mathematical models in modern microeconomics, including choices and demand, production and supply, and market structures and failures.
Prerequisite: ECON 306.
Registration Information: Credit not allowed for both ECON 506 and AREC 506.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 510 Labor Market Analysis Credits: 3 (3-0-0)
Course Description: Determination of wages and employment. Focus on theoretical and applied controversies.
Prerequisite: ECON 304 and ECON 306.
Term Offered: Fall (even years).
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.
ECON 515  Financial Institutions-Structure/Regulation  Credits: 3 (3-0-0)
Course Description: Regulation of financial institutions in the U.S.;
international banking and international financial institutions, and
financial modernization.
Prerequisite: None.
Term Offered: Fall (odd years).
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 520  Public Economics I  Credits: 3 (3-0-0)
Course Description: Analysis and evaluation of tax policy in terms of
efficiency and equity.
Prerequisite: ECON 506 or AREC 506 or ECON 606 or AREC 606.
Term Offered: Spring.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 530  Methodology of Economic Research  Credits: 3 (3-0-0)
Also Offered As: AREC 570.
Course Description: Philosophical foundations of science and research.
Concepts and skills for planning, performing, reporting, and evaluating
economic research.
Prerequisite: ECON 304 and ECON 306.
Registration Information: Credit not allowed for both ECON 530 and
AREC 570.
Term Offered: Fall (even years).
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 535  Applied Econometrics  Credits: 3 (3-0-0)
Also Offered As: AREC 535.
Course Description: Econometric techniques applied to testing and
quantification of theoretical economic relationships drawn from both
microeconomics, macroeconomics.
Prerequisite: (ECON 335 or AREC 335) and (ECON 304 or ECON 306).
Registration Information: Credit not allowed for both ECON 535 and
AREC 535.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 540  Environmental and Natural Resource Economics  Credits: 3 (3-0-0)
Also Offered As: AREC 540.
Course Description: Economics of environmental policy; partial
equilibrium and general equilibrium model; pollution; natural
environments; population and economic growth.
Prerequisite: ECON 306.
Registration Information: Credit not allowed for both ECON 540 and
AREC 540.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

ECON 541  Environmental Economics  Credits: 3 (3-0-0)
Also Offered As: AREC 541.
Course Description: Economics of environmental policy; partial
equilibrium and general equilibrium model; pollution; natural
environments; population and economic growth.
Prerequisite: ECON 306.
Registration Information: Credit not allowed for both ECON 541 and
AREC 541.
Term Offered: Spring.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 563  Regional Economics-Theory, Methods, and Issues  Credits: 3 (3-0-0)
Also Offered As: AREC 563.
Course Description: Tools and methods of regional economics, including
supply, demand, and externality analysis. Applications to current urban
and regional policy issues.
Prerequisite: ECON 306 and ECON 501, may be taken concurrently.
Registration Information: Credit not allowed for both ECON 563 and
AREC 563.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.

ECON 570  Evolution of Economic Thought  Credits: 3 (3-0-0)
Course Description: From Plato and Aristotle to the modern period.
Prerequisite: ECON 304 and ECON 306.
Term Offered: Fall (even years).
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 604  Macroeconomic Analysis I  Credits: 3 (3-0-0)
Course Description: Theoretical and empirical analysis of short-run and
long-run macroeconomic performance across countries using dynamic
models.
Prerequisite: ECON 304 and ECON 501.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

ECON 606  Microeconomic Analysis I  Credits: 3 (3-0-0)
Also Offered As: AREC 606.
Course Description: Advanced price/allocation theory: consumer/
producer decisions; uncertainty; market structure; partial/general
equilibrium; efficiency/welfare.
Prerequisite: ECON 306 and ECON 501.
Registration Information: Credit not allowed for both ECON 606 and
AREC 606.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

ECON 635  Econometric Theory I  Credits: 3 (3-0-0)
Also Offered As: AREC 635.
Course Description: Theory of mathematical statistics and classical
linear regression model in context of economic application.
Prerequisite: (AREC 535 or ECON 535) and (ECON 501, may be taken
concurrently),
Restriction: Must be a: Graduate, Professional.
Registration Information: Credit not allowed for both ECON 635 and
AREC 635.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 640  International Trade Theory  Credits: 3 (3-0-0)
Course Description: Theory of international trade including comparative
advantage, factor growth, market distortions, and commercial policy.
Prerequisite: ECON 306 or ECON 506.
Restriction: Must be a: Graduate, Professional.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.
ECON 663 Urban and Regional Modeling Credits: 3 (3-0-0)
Course Description: Methodological approaches in regional economics: general equilibrium, input-output, computable general equilibrium models; social accounting matrices.
Prerequisite: ECON 506.
Restriction: Must be a: Graduate, Professional.
Term Offered: Spring.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 695 Independent Study Credits: Var[1-18] (0-0-0)
Course Description: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

ECON 698 Research--Technical Paper Credits: 3 (0-0-3)
Course Description: Prerequisite: (ECON 504 and ECON 506 and ECON 705 or AREC 735) and (ECON 735).
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

ECON 699 Thesis Credits: Var[1-18] (0-0-0)
Course Description: None.
Restriction: Must be a: Graduate, Professional.
Terms Offered: Fall, Spring, Summer.
Grade Mode: Instructor Option.
Special Course Fee: No.

ECON 704 Macroeconomic Analysis II Credits: 3 (3-0-0)
Course Description: Theoretical and empirical frameworks for analyzing macroeconomic policies and their impact on economic growth, employment, and income distribution.
Prerequisite: ECON 604.
Restriction: Must be a: Graduate, Professional.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 706 Microeconomic Analysis II Credits: 3 (3-0-0)
Also Offered As: AREC 706.
Course Description: Advanced topics in microtheory: game theory; market imperfections; adverse selection; principal-agent problems; social choice theory; incentives, etc.
Prerequisite: ECON 606.
Restriction: Must be a: Graduate, Professional.
Registration Information: Credit not allowed for both ECON 706 and AREC 706.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 715 Monetary Economics Credits: 3 (3-0-0)
Course Description: Principle issues of monetary theory: money supply and demand, interest rates, and current problems of monetary policy.
Prerequisite: ECON 504.
Restriction: Must be a: Graduate, Professional.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 720 Public Economics II Credits: 3 (3-0-0)
Course Description: Analysis of welfare foundations of public expenditure, including cost-benefit analysis.
Prerequisite: ECON 506.
Restriction: Must be a: Graduate, Professional.
Term Offered: Fall.
Grade Modes: S/U within Student Option, Trad within Student Option.
Special Course Fee: No.

ECON 735 Econometric Theory II Credits: 2 (2-0-0)
Also Offered As: AREC 735.
Course Description: Econometrics models and estimators in econometrics, from fully parametric to semiparametric and nonparametric approaches.
Prerequisite: AREC 635 or ECON 635.
Restriction: Must be a: Graduate, Professional.
Registration Information: Credit not allowed for both ECON 735 and AREC 735. This is a partial semester course.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.

ECON 736A Advanced Econometric Methods: Discrete Choice Models Credit: 1 (1-0-0)
Also Offered As: AREC 736A.
Course Description: Econometrics analysis of: Discrete Choice Models.
Prerequisite: AREC 735, may be taken concurrently or ECON 735, may be taken concurrently.
Registration Information: Credit not allowed for both ECON 736A-C and AREC 736A-C. This is a partial semester course.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.
ECON 736B  Advanced Econometric Methods: Panel Data Models  Credit: 1 (1-0-0)
Also Offered As: AREC 736B.
Course Description: Econometrics analysis of: Panel Data Models.
Prerequisite: AREC 735, may be taken concurrently or ECON 735, may be taken concurrently.
Registration Information: Credit not allowed for both ECON 736A-C and AREC 736A-C. This is a partial semester course.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.
ECON 736C  Advanced Econometric Methods: Time Series Models  Credit: 1 (1-0-0)
Also Offered As: AREC 736C.
Course Description: Econometrics analysis of: Time Series Models.
Prerequisite: AREC 735, may be taken concurrently or ECON 735, may be taken concurrently.
Registration Information: Credit not allowed for both ECON 736A-C and AREC 736A-C. This is a partial semester course.
Term Offered: Spring.
Grade Mode: Traditional.
Special Course Fee: No.
ECON 740  Advanced Natural Resource Economics  Credits: 3 (3-0-0)
Course Description: Advanced theory, methods, and literature in natural resource economics, including dynamic programming and optimal control.
Prerequisite: AREC 706 or AREC 706.
Restriction: Must be a: Graduate, Professional.
Registration Information: Credit not allowed for both ECON 740 and AREC 740.
Term Offered: Fall.
Grade Mode: Traditional.
Special Course Fee: No.
ECON 741  Advanced Environmental Economics  Credits: 3 (3-0-0)
Also Offered As: AREC 741.
Course Description: Advanced theory, methods, and literature in environmental economics.
Prerequisite: AREC 706 or ECON 706.
Restriction: Must be a: Graduate, Professional.
Registration Information: Credit not allowed for both ECON 741 and AREC 741.

**Major in Economics**

Economics is the study of how people and societies use scarce resources to produce the things they want. Economic theory provides a framework for understanding economic issues, analyzing and predicting the likely effects of economic behavior and government policies, and formulating efficient and equitable solutions to pressing economic problems.

A strong liberal arts curriculum including arts and humanities, social and natural sciences, advanced composition, mathematics, and statistics provides the depth and breadth of knowledge needed to systematically and logically analyze problems, generate and test ideas, and develop effective communication and quantitative skills. Economics majors develop an appreciation of economic issues, and learn to analyze and critically evaluate economic phenomena and policies. The major core includes four semesters of economic theory, a semester of econometrics, a senior capstone seminar, and several seminars of economics electives covering a wide variety of economic topics from environmental and natural resource economics to the history of economic institutions and political economy.

**Learning Outcomes**

Students will:

- Display command of basic microeconomic concepts such as rationality, cost/benefit, supply and demand theory, decision making at the margin, monopoly and competition, and efficiency and equity.
- Display command of basic macroeconomic concepts such as aggregate demand and supply, fiscal and monetary policy, and the use of these policies in the macro-economy.
- Understand and analyze basic economic issues found in the news and understand how the economic aspects of society work.

**Potential Occupations**

Economists are employed in a wide variety of fields from education and research to business and government. Nonprofit and international organizations use economists in overseas development, environmental conservation, and international relations. Economics, like many liberal arts majors, provides students with a broad academic background suitable for a variety of jobs. Economics majors are trained to think independently and critically, communicate effectively, and function in a multicultural world. Many employers appreciate liberal arts majors for their multiple skills and their ability to adapt to a variety of tasks and work environments. Careers for graduates are available in education, business, and government. Participation in internships or cooperative education opportunities is highly recommended to enhance practical training and development. Graduates who go on for advanced studies can pursue careers in economics or attain advanced positions with the possibility of rising to top professional levels.

Depending on interests, the electives taken, or the minor selected, available career choices include, but are not limited to: commodities/stock broker, financial analyst, economic forecaster, trust administrator, loan counselor, pension funds administrator, foreign trade analyst, public policy analyst, regional/urban planner, foreign service officer, tax auditor, natural resource analyst, educator, program administrator, researcher, community organizer, environmental activist, international aid organization analyst or administrator, marketing analyst, purchasing agent, public relations/media planner, program consultant, contract administrator, systems evaluator, personnel planner, portfolio administrator, finance manager, secondary school teacher.

**Requirements**

**Effective Spring 2013**

Economics majors must achieve a minimum grade of 1.670 (C-) in each of the economics courses counted toward the major.

1. Select from the list of courses in category 3E of the AUCC. This course (except ECON 211) may also fulfill the Additional Social Sciences requirement. This course may also fulfill a requirement within a minor, second major, or interdisciplinary minor. If ECON 211 is chosen, it may also be used to fulfill the Economics requirement in footnote 3. If selecting a course that will double count for requirements within this major, then select enough elective credits to bring the program total to 120.

2. Students must complete a minor, second major, or interdisciplinary minor.

3. Select any 2 ECON courses.

4. Select any 2 upper-division (300- or 400-level) ECON courses.
Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Minor in Economics

The minor in Economics is designed to prepare students for understanding current socioeconomic problems in the areas of resource allocation, inflation, unemployment, income distribution, environmental degradation, international trade, and monopoly power. The program can be of help to students interested in careers in business management, teaching, government, banking, public policy, and related areas.

Requirements

Effective Fall 1999

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Economics minors must achieve a 2.000 grade point average in all courses taken for the minor.

Major in English

English majors develop an understanding of diverse cultures, literary traditions, and great works of English, American, and world literature. Students expand their ability to analyze a variety of texts and view them through the lenses of diverse critical perspectives. Majors develop the ability to write for both specialized and general audiences. There are five concentrations from which students can choose:

- Creative Writing,
- English Education,
- Language,
- Literature, or
- Writing, Rhetoric and Literacy.

Learning Outcomes

Students will demonstrate:

- Competency in critical reading and interpretive techniques, including:
  - formulating, developing, and supporting interpretive positions with appropriate evidence;
  - using technical and conceptual vocabulary knowledgeably;
  - using appropriate methodologies, critical approaches, and theoretical perspectives; and
  - being original and creative.

- Effective written expression in a variety of genres for a range of audiences on literary and non-literary topics.

- Familiarity with the main writers, texts, genres, and movements in the literary history of the United States and British Isles, and/or the history and development of the English language, and/or literacy issues in their historical contexts.

Potential Occupations

A major in English prepares students for business, government, or education careers that require broadly educated people who can think critically, communicate effectively, analyze texts, and write well. Many employers appreciate liberal arts majors for their multiple skills and their ability to adapt to a variety of tasks and work environments.

The department encourages experiential education by offering a variety of internship opportunities.

Students are also invited to generate their own positions in fields of interests, as well as pursue established local, regional, or national internships. Graduates who go on for advanced studies can attain more responsible positions with the possibility of rising to top professional levels.

Depending on a student’s interests, the electives taken, or the concentration selected, available career choices include, but are not limited to: copy editor; project editor; manuscript reader or story analyst; sales representative; publicity and promotion specialist; advertising coordinator; production specialist; assistant book publicist; contracts and permission specialist; agency or arts administrator; human resource manager; human services program developer; public relations; English teacher; teacher of English as a second language; curriculum developer; education administrator; grant writer; technical writer for business, industry, or science; magazine, newspaper, television, education, or government writer; biographer or writer of prose, fiction, or nonfiction; lyricist.

Major in English, Creative Writing Concentration

The Creative Writing concentration gives students the opportunity to strengthen their creative writing and reading skills and their imaginations. Students take beginning, intermediate, and advanced courses in one or more of the following genres: fiction, poetry, and nonfiction. Intermediate and advanced courses are primarily workshop classes in which students read and critique one another’s work. At the center of all creative writing courses is the study of craft. Students in the creative writing concentration also take a wide variety of literature classes, which prepare them to be writers by schooling them in literary traditions and styles. An internship program for all English majors offers creative writing students writing and research positions that may lead to employment. In addition, the creative writing program runs a vibrant reading series that gives students the chance to meet visiting writers.

Requirements

Effective Fall 2015
For graduation, an English major must attain a minimum grade point average of 2.000 in upper-division composition and English courses.

Major in English, English Education Concentration

The English Education concentration provides students with preparation for teaching in secondary schools. It is designed for students who wish to pursue a career in teaching language arts and offers a range of courses in language, literature, and writing. Students may receive an endorsement from the State of Colorado in English Language Arts. In addition to the common requirements for the English major, students pursuing teaching licensure take several extra courses in English, as well as education classes through the School of Education.

Students interested in pursuing a teaching license through CSU may refer to the Center for Educator Preparation (CEP) (http://cep.chhs.colostate.edu).

The department requires Licensure majors to take a minimum of 12 credits of upper-division E or CO subject code courses to include the categories listed below. One course may count for two categories if necessary, but students must take a minimum of 12 credits to fulfill this requirement:

1. 3 credits must be in literatures of the British Isles before 1830, or in American or European literatures before 1900;
2. 3 credits must be in literatures of the British Isles after 1830, or in American or European literatures after 1900;
3. 3 credits must be in either breakthroughs (ideological, racial, cultural, gendered) or genre courses;
4. One course must be a world literature course;
5. One course must be a capstone course (see list in senior year, above).

See the department list for the courses that fulfill these categories.

Any lower or upper-division E subject code course.

Major in English, Language Concentration

The Language concentration focuses on linguistics and TESL/TEFL. It is designed for students interested in all aspects of language and linguistics. It offers students the ability to study key theories in linguistics and second-language learning, functional aspects of language production and reception, and the impact of social and cultural contexts on language production and reception.

Requirements

Effective Fall 2015

For graduation, an English major must attain a minimum grade point average of 2.000 in upper-division composition and English courses.

Major in English, Literature Concentration

The English Department offers a curriculum featuring critical study of literature, ancient through contemporary, in poetry, prose, and drama. Students will become familiar with major figures and forces, but also with non-traditional writers outside the established canon. Courses in literary theory will give students a sense of the wide variety of approaches that can be applied to the interpretation of texts. In all courses, students practice a number of different types of analytical and critical writing.

6. The department requires literature concentrators to take 18 credits of upper-division E and/or CO subject code courses:
   - 3 credits must be in literatures of the British Isles before 1830 or in American or European literatures before 1900;
   - 3 credits must be in literatures of the British Isles after 1830 or in American or European literatures after 1900;
   - 3 credits must be in breakthroughs (ideological, racial, cultural, gendered);
   - 3 credits must be in genre courses.

See the department check sheet for the courses that fulfill these 4 categories.
Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major in English, Writing, Rhetoric and Literacy Concentration

The Writing, Rhetoric and Literacy Concentration builds on departmental strengths in composition and nonfiction writing, as well as in technology-based writing and writing instruction. It is designed for students who wish to pursue the study of theories and practices of writing and rhetoric. The Writing, Rhetoric and Literacy Concentration offers students the ability to:

- Study writing in a department that takes a humanistic approach to learning
- Study writing and rhetoric with a focus on genre, audience, invention, and style
- Study writing and writing theory in social, cultural, and historical contexts

### Minor in English

When visiting the English Department office to officially declare an English or English-related minor (http://english.colostate.edu/undergraduate/english-related-minors), students will be provided with a course guide for that minor. To speak with an advisor regarding your minor, contact Prof. Tobi Jacobi, by phone at (970) 491-3344, by email at tjacobi@colostate.edu, or in person during office hours or by appointment in Eddy Hall, Room 349.

For information about English and Composition course offerings and registration procedures for the upcoming semester or summer session, please view the Rambler (http://english.colostate.edu/undergraduate/publications), the Department’s advising newsletter.

### English Minor

The English minor is designed for students with interests in English studies who do not want to complete an English major. With very few exceptions, the minor allows students to choose any English or composition courses to create a program of study specific to their needs and interests. Minimum of 21 credits in courses with E prefix, at least 12 of which must be upper division.

The English Department also offers the Linguistics and Culture Interdisciplinary Minor.

### Requirements

#### Effective Spring 1996

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

CO 150, E 487A, and E 487B may not count toward the minor. CO 300, CO 301A, CO 301B, CO 301C, CO 301D, CO 302, and CO 401 may count toward the minor. A minimum of 6 credits must be taken at CSU.

Graduate

**Graduate Program in Ethnic Studies**

The Department of Ethnic Studies seeks to teach students to understand the unique and interlocking experiences of racially marginalized groups and to analyze how race intersects with other forces of social differentiation, such as gender, sexuality, and class, in national and international contexts. The program recognizes the importance not only of the history of racial exclusion and marginalization but also the creative ways in which various racial groups sustain their humanity through cultural preservation, transference, and renewal. Ethnic Studies is committed to nurturing students to become culturally aware, astute, civic-minded individuals who strive to strengthen the communities in which they reside. Because the study of ethnic groups intrinsically reveals how race structures life chances and opportunities, the scholarly orientation of the department reflects a commitment to meaningful changes in public policy and social life. The department offers graduate-level education to prepare students as leaders in the field of ethnic studies.

Students interested in earning a Master of Arts degree in Ethnic Studies should refer to the Graduate and Professional Bulletin and the Department of Ethnic Studies (http://ethnicstudies.colostate.edu).

Major in Ethnic Studies

Ethnic Studies critically examines the interlocking forces of race, gender, class, sexuality, and other forms of social differentiation that shape the histories and experiences of racially marginalized groups. The programs of study interrogate how these socially constructed ideas impact distribution of social goods, affect life chances, shape identities and worldviews, and reproduce social inequalities. Drawing from interdisciplinary and comparative theoretical frameworks, we bring to bear issues of power, privilege, and social justice pertinent to the experiences of diverse populations in the U.S. and abroad. We are especially committed to nurturing civic-minded and culturally informed students who strive to strengthen the communities in which they reside. In support of the land-grant mission of CSU, Ethnic Studies engages with communities on and off campus in order to effect meaningful change in public policy and social life.

Learning Outcomes

Upon completion of the programs of study, students will demonstrate:

- An understanding of the key concepts shaping the experiences of various racial and ethnic groups in the United States and abroad.
- Familiarity with social histories and experiences of racial and ethnic groups.
- Effective oral communication, writing, and research skills.
- An increase in critical thinking, intellectual, and personal growth.
- An understanding of the value of social consciousness and personal responsibility.

Potential Occupations

Both theoretical understandings of and practical experience in cross-cultural and inter-ethnic relations are invaluable in today's world. Ethnic Studies graduates work in the following fields and occupations. Education: K-12 and adult education (e.g. refugee/immigrant education, diversity training in the private sector); human social services including counseling, health care, and civil service; federal, state, tribal, and local government, and community service; natural resources development and technology transfer: practices, economics, and law in ethnic contexts; communications media such as newspaper, radio, video, and television; archival and museum studies; non-profit agencies; and advanced studies including graduate programs in the social sciences and professional programs (e.g. law, social work).

Major in Ethnic Studies, Women’s Studies Concentration

Eddy Hall, Room 210

(970) 491-6182
womensstudies.colostate.edu (http://womensstudies.colostate.edu)

Coordinated by the Director of the Center for Women’s Studies and Gender Research
Dr. Caridad Souza, Director

The Women’s Studies Program prepares individuals for the needs and opportunities of an increasingly interconnected and interdependent world. The Major in Ethnic Studies, Women’s Studies Concentration allows students to engage the complex indices of intersection including gender, sexuality, race, ethnicity, class, ability, religion, and nationality as analyzed within various disciplines. Women’s studies transforms traditional disciplinary assumptions and theories, creates innovative models for teaching and research, and develops practices for challenging systems of power and privilege.

Learning Outcomes

Upon completion of the program of study, students will demonstrate:

• Knowledge of academic disciplines from feminist and intersectional perspectives
• An understanding of the historic and contemporary contributions of women of all cultures
• Effective oral communication, writing, and research skills
• An increase in critical thinking, intellectual, and personal growth
• A critical ideological understanding regarding women and gender implicit in social institutions

**Potential Occupations**

Contemporary career opportunities can be directly enhanced by students who have a women’s studies background. Students acquire jobs in the non-profit sector, such as international relief agencies, domestic violence agencies, homeless shelters, after school programs, and children and family services. Other fields our students have entered include public relations, counseling, union organizing, public policy and research, victim advocacy, and human/civil rights. In several areas such as journalism, communication, business, law, education, and human services, it is now common to choose a career that has a direct focus on women and gender.

In areas that have not traditionally focused on women and gender, an awareness of the history and culture of feminism, women and the intersections of gender, race, class, and sexism can enhance a person’s ability to cope with dilemmas and issues related to gender and sex that arise in the workplace. In addition, students in women’s studies have the unique opportunity to apply insights from course work to their own lives, helping them to make more informed choices about careers, education, relationships, and community participation.

**Requirements**

**Students in the Ethnic Studies major must earn a minimum grade of C (2.00) for all Ethnic Studies courses required for the major.**

### Minor in Ethnic Studies

The Ethnic Studies minor offers courses on the experiences of the various racial and ethnic groups in the U.S. and abroad. Courses provide a foundation for understanding the histories and contemporary issues from a comparative framework. Drawing knowledge from multidisciplinary sources, the program of study welcomes students from the humanities, the social sciences, and professional degree programs such as education, business, and law.

**Requirements**

**Effective Fall 2015**

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

Students in the Ethnic Studies minor must earn a minimum grade of C (2.000) for all Ethnic Studies courses required for the minor.

Major in Languages, Literatures, and Cultures

Language majors accomplish:

- Real and measurable functional competencies in the target language
- A practical command of grammar and pronunciation approaching that of a native speaker
- Comprehension in reading and listening
- Ability in speaking and writing in a manner acceptable to an educated native
- A practical command of the culturally defined aspects of the language and related cultural patterns of behavior, including non-verbal communication
- In advanced-level study, a comfortable familiarity with most of the language- and culture-specific characteristics of its literature

The department strongly encourages education or other experiences abroad and has exchange agreements in place with universities in several countries. Students should visit the department prior to studying abroad for clarification on course transfers. Information is available through Education Abroad (http://educationabroad.colostate.edu).

Minors are offered in Chinese, French, German, Japanese, and Spanish, as well as interdisciplinary minors in Arabic, Italian and Russian Studies.

Basic courses may also be taken in Latin and American Sign Language.

Learning Outcomes

Students will demonstrate:

- Communicative oral skills in the target language, including grammatical accuracy, correct use of tense, fluency, appropriate intonation, suitable vocabulary and discourse devices for expressing opinions or when giving research presentations.
- Communicative writing skills in the target language, including clarity of ideas, grammatical accuracy and appropriate vocabulary, adequate elaboration of ideas through a variety of sentence structures and vocabulary, and logical flow of ideas through the use of discourse organizational devices.
- Analytical skill in literary and cultural texts of the target language, including ability to formulate and present a topic of inquiry, to critically analyze the topic with valid supporting evidence, and to cogently synthesize and summarize the ideas in bibliographical sources and the results of their own analytical inquiry.
- Increased sensitivity to and appreciation of cultural and linguistic differences.

Potential Occupations

Available career choices include, but are not limited to: bilingual educator, foreign language teacher, translation/interpretation, linguistics, civil service, foreign service and diplomacy, medical fields, social services,
immigration/naturalization, journalism/broadcasting, customs, banking, import/exports, sales/customer service, publishing, international business, international nonprofit organizations, government/military intelligence, global tourism.

1. Select from the list of courses in category 3B of the All-University Core Curriculum (AUCC). The 200-level French courses may not be used here.

2. Students must take either LFRE 433A or LFRE 433B in the senior year to satisfy AUCC category 4A. Whichever course is not taken there may be taken either in the junior year as part of the three-course French elective selection or in the senior year as a French elective.

3. LFRE 492 may be taken for up to six credits.

4. Select enough elective credits to bring program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level). A minimum of 9 elective credits must be upper-division.

**Major Completion Map**

**Distinctive Requirements for Degree Program:**
All majors and minors in the department must earn a minimum grade of C (a grade of C# is not acceptable) in each upper# division course that carries the LARA, LCHI, LFRE, LGEN, LGER, LGRK, LITA, LJPN, LKOR, LLAT, LRUS, LSGN, or LSPA subject code.

1. Select from the list of courses in category 3B of the All-University Core Curriculum (AUCC). The 200-level German courses may not be used to fulfill category 3B in this concentration.

2. Students must select either LGER 335 or LGER 336. Whichever of the two is not selected may be included among the selection of three courses in the junior year.

3. LGER 492 may be taken for up to six credits.

4. Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level). A minimum of 9 elective credits must be upper-division.

### Major Completion Map

**Distinctive Requirements for Degree Program:**

All majors and minors in the department must earn a minimum grade of C (a grade of C# is not acceptable) in each upper-division course that carries the LARA, LCHI, LFRE, LGEN, LGER, LGRK, LITA, LJPN, LKOR, LLAT, LRUS, LSGN, or LSPA subject code.

Minor in Chinese

Requirements
Effective Fall 2015

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

All majors and minors in the department must earn a minimum grade of C (a grade of C- is not acceptable) in each upper-division course that carries the LCHI subject code. Courses taught in English may not be used to meet the requirements for the minor.

Students must complete lower-division language courses or place out of lower-division courses through placement testing. Students who place into LCHI 201 or LCHI 304 will have to replace some or all of the lower-division credits with upper-division Chinese classes or other language-appropriate department-approved (non-LCHI) courses. See the department for a list of these courses.

Other courses, such as LCHI 495, may be petitioned to substitute for one of the courses below.

LCHI 408 may only count once toward the minor.

Any transferred language courses, other than gtPathways courses, will be evaluated by the Department of Languages, Literatures and Culture for equivalency to CSU language courses or as substitutions for CSU language courses.

Minor in French

Requirements
Effective Fall 2015

All students minoring in French must complete a minimum of 21 credits in the language of the minor, of which at least 15 credits must be upper-division (300- to 400-level).

Additional coursework may be required due to prerequisites.

All majors and minors in the department must earn a minimum grade of C (a grade of C- is not acceptable) in each upper-division course that carries the LFRE subject code. Courses taught in English may not be used to meet the requirements for the minor.

Major in History

History is an account of our human past and seeks to interpret the course of human affairs through evidence and reason. Historians use written records, images, artifacts, and other materials to understand the past and also the relationship between the past and the present. Historians ask not only what happened and why, but also how the present came to be. History provides insights into how individuals and groups made decisions, exercised power, and responded to change. History helps us to understand how processes—such as revolution, migration, war, ecological disturbance, and globalization—shaped societies over time. It helps us to understand how people grappled with class, ethnicity, gender, and race, and how they conceptualized the world through religion and ideology. History provides a form of knowledge that people in all times and places have used to answer basic questions about the human predicament.

The History major is designed for students to enlarge their knowledge about the past, improve their ability to think logically and critically, and sharpen their powers of written and oral expression. It is an outstanding choice for students planning further professional study in law, medicine, ministry, academia, business, and many other fields.

Learning Outcomes

Students will demonstrate:

• Ability to analyze and interpret historical materials, such as documents, artifacts, and images
• Ability to engage in chronological reasoning, to understand causation and change over time
• Ability to examine critically how people in the past understood their own history, in scholarly works and in popular forms such as myths or commemorations
• Ability to interpret, write, and speak about the past using evidence and according to the standards and expectations of the historical discipline

Potential Occupations

Government official in foreign service, national security, military, cultural resources management, and other areas.
History teacher in public and private schools; any professional occupation in business or public service requiring a liberal arts education and skills in research, writing, and the analysis of information. With additional graduate training: lawyer, physician, social worker, minister, librarian, museum curator, archivist, professor, educational administrator, or other professional.

Concentrations

• General History Concentration
• Language Concentration
• Social and Behavioral Sciences Concentration
Major in History, General History Concentration

The General History concentration is an excellent choice for students planning careers in history, government service, and other professional occupations requiring broad intellectual and practical skills. History majors who select the General History concentration must complete another major or minor offered at CSU (except History).

Effective Spring 2016

A minimum grade of C (2.00) must be earned in HIST 492 and all 100-level courses required in the history major.
