

MAJOR IN HORTICULTURE, HORTICULTURAL SCIENCE CONCENTRATION

Horticultural Science graduates conduct research to discover new information about plant growth, development, and environmental response. This research can lead to new plant varieties and production

methods. The curriculum consists of a solid foundation in the basic natural sciences as well as in agricultural sciences and prepares students for technical and scientific careers in laboratory, greenhouse, or field research. Exceptional students participate in individual research projects coordinated by professors. Graduates in this area often continue their education.

¹ The equivalent to MATH 117 and MATH 118, if needed, may be taken using elective credits.

² Students must select at least 12 credits of upper division (300- to 400-level) horticulture elective and/or free elective courses to bring the

program total of upper division credits to a minimum of 42. Select enough elective credits to bring the program total to 120 credits.
