Graduate Programs in Construction Management

The graduate program in Construction Management provides an environment that supports graduate students in their development of knowledge necessary to enhance professional practice and apply research to management decisions that impact organizations in an emerging global economy. The master's program is an advanced curriculum designed to allow students to tailor a portion of the specialization requirements to meet individual interests and goals.

Students interested in graduate work should refer to the Graduate and Professional Bulletin (<http://catalog.colostate.edu/general-catalog/graduate-bulletin/>) and the Department of Construction Management (<http://cm.chhs.colostate.edu>).
