

MASTER OF SCIENCE IN FOOD SCIENCE AND NUTRITION, NUTRITION SPECIALIZATION

The Master of Science in Food Science and Nutrition, Nutrition Specialization includes work in advanced nutrition science and nutrient metabolism, recent developments in human nutrition, research statistics, and nutritional epidemiology. Additional coursework in basic or applied behavioral sciences is also necessary, with selected electives depending on whether the student's interest is more in community/public health nutrition or nutrition metabolism. Ultimately, the Nutrition Specialization focuses on the relationship between nutrition and health. The program provides students with training for doctoral studies in basic and applied sciences, advanced preparation for professional degrees, and careers in the industry. A minimum of 35 credits is required for the M.S. degree.
