

MASTER OF ARTS IN ANTHROPOLOGY, PROFESSIONAL METHODS AND TECHNIQUES SPECIALIZATION

The Master of Arts in Anthropology, Professional Methods and Techniques Specialization develops skills in a wide range of methods and techniques used by professionals in applied anthropology, federal, and state natural resource agencies, and other arenas of social, historical, biological, and spatial research about humans. These include qualitative research and interview protocols, quantitative analysis, GIS and remote sensing, archaeological field survey, historic archaeological methods, culture and heritage resource management, and paleoanthropological methods.
