The Department of Economics is a vibrant learning community that supports the intellectual development and professional aspirations of undergraduates, graduate students, and faculty alike. Economics is a broad social science that brings together diverse tools for understanding the choices we make, the constraints we face, and the consequences for the critical social issues of equity, efficiency, and sustainability.

Our programs offer a variety of economic approaches to understanding some of the most pressing challenges of our time: how wealth, poverty, and inequality are generated; the economics of climate change; how nations are connected in global markets; the role of governments in managing markets; and so much more.

Our faculty members are caring teachers and prolific scholars who have active research agendas, providing many opportunities for both graduate and undergraduate students to collaborate. Our goal is to prepare our students to be critical thinkers who understand the debates about economic methodology and policy, as well as the techniques of economic analysis.

Professor Guy Numa, Director of Graduate Studies
Professor Martin Shields, Director of Undergraduate Studies

Undergraduate Program Highlights:
- We offer traditional, honors (http://honors.colostate.edu/admissions/), accelerated (https://provost.colostate.edu/accelerated-programs/), and online bachelor's degree (https://www.online.colostate.edu/degrees/economics/?utm_source=geniusmonkey&utm_medium=viewthrough) programs so you can choose the path that is right for you.
- The Economics major includes a solid foundation in economic analysis and provides the option to develop an area of specialty in one of six tracks: development/international economics, environmental economics, public policy, quantitative economics, political economy, and economics of race, class, and gender.
- Our students are required to choose a second major or minor, giving them the flexibility to tailor their education to their unique interests and goals.
- Economics is a versatile major that can be a gateway to many career paths in government, finance, nonprofit organizations, law, academia, and much more. Our students develop a framework for thinking analytically, and they also get the data and communication skills needed to be successful in the workplace.
- Economics majors have the unique opportunity to apply for paid research internships, providing opportunities to deepen their research skillsets and collaborate with our award-winning faculty. Every senior also develops an independent research project as part of the capstone course (ECON 492).

Graduate Programs in Economics
The Department of Economics is currently only admitting students to the Doctor of Philosophy (Ph.D.) program. Six primary fields are presently emphasized: international economics, development economics, public economics, political economy, environmental economics, and regional economics. Core requirements include micro, macro, and heterodox theory, as well as history of economic thought and applied econometrics.

More information is available in the Graduate and Professional Bulletin (http://catalog.colostate.edu/general-catalog/graduate-bulletin/).

Ph.D.
- Ph.D. in Economics (http://catalog.colostate.edu/general-catalog/colleges/liberal-arts/economics/economics-phd/)

Plan B Master's Program
Students admitted to the Ph.D. program earn a master's degree along the way. If a student does not pass the qualifying exam or does not wish to complete the doctorate after two years of study, they may exit the program with a Master of Arts in Economics (Plan B).
