- Minor in Economics (http://catalog.colostate.edu/general-catalog/colleges/liberal-arts/economics/economics-minor/)

Certificate

- Certificate in Macroeconomics (http://catalog.colostate.edu/general-catalog/colleges/liberal-arts/economics/macroeconomics-certificate/)

Undergraduate Program Highlights:

- We offer traditional, honors (http://honors.colostate.edu/admissions/), accelerated (https://provost.colostate.edu/accelerated-programs/), and online bachelor's degree (https://www.online.colostate.edu/degrees/economics/?utm_source=geniusmonkey&utm_medium=viewthrough) programs so you can choose the path that is right for you.
- The Economics major includes a solid foundation in economic analysis and provides the option to develop an area of specialty in one of six tracks: development/international economics, environmental economics, public policy, quantitative economics, political economy, and economics of race, class, and gender.
- Our students are required to choose a second major or minor, giving them the flexibility to tailor their education to their unique interests and goals.
- Economics is a versatile major that can be a gateway to many career paths in government, finance, nonprofit organizations, law, academia, and much more. Our students develop a framework for thinking analytically, and they also get the data and communication skills needed to be successful in the workplace.
- Economics majors have the unique opportunity to apply for paid research internships, providing opportunities to deepen their research skillsets and collaborate with our award-winning faculty. Every senior also develops an independent research project as part of the capstone course (ECON 492).
