

GRADUATE CERTIFICATE IN WATER RESOURCES

This certificate program is designed to provide college graduates, current practitioners, and new professionals with targeted knowledge and skills to advance their understanding and career mobility related to water resources planning, management, and policy. This skillset can be applied to a wide array of natural resource managers, as water planning is essential to sound governmental policy and community management. All courses include case studies and exercises pertaining to various water issues in Colorado and the United States, as well as international examples.

Effective Fall 2019

Additional coursework may be required due to prerequisites.
