MAJOR IN COMPUTER SCIENCE, SOFTWARE ENGINEERING CONCENTRATION

Software engineering involves designing, implementing, and maintaining computer programs. Developing modern software systems requires more than programming skills and core computer science concepts. It requires software engineering skills, which are in high demand in the software industry.

The Software Engineering concentration focuses on the concepts, techniques, and tools necessary for software analysis, design, testing, maintenance, and teamwork. Courses will include hands-on work with the software engineering tools used in industry.

This concentration combines a rigorous computer science degree with courses in software design, software testing, project management, and system analysis and design.

Learning Outcomes

Upon completing this program, students will be able to:

- Work effectively in teams to develop computational solutions to complex problems.
- · Communicate technical ideas effectively in writing and verbally.
- Confidently pursue graduate studies or professional employment in software engineering and computer science.

Potential Occupations

In addition to the career opportunities open to all computer science graduates, the software engineering concentration opens career paths that include:

Software developer, software architect, full-stack developer, software project manager, database programmer, computer systems analyst, web developer, computer and information systems manager, UX designer, cloud engineer, and mobile application developer.

Requirements Effective Fall 2023

A minimum grade of C (2.000) is required in CO 150 and in all CS, CIS, DSCI, MATH, and STAT courses which are required for graduation.

41100

MATH 156 recommended for computer science majors who do not already have MATH 160 credit.

Major Completion Map

Distinctive Requirements for Degree Program:

To prepare for first semester. The curriculum for the Computer Science major assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill precalculus requirements in the first semester. All students must maintain a C (2.000) or better in CO 150 and in all CS, CIS, DSCI, MATH, and STAT courses which are required for graduation.

Freshman

Semester 1		Critical	Recommended	AUCC	Credits
CO 150	College Composition (GT-CO2)			1A	3

, , ,	and Inclusion (http://catalog.colostate.edu/general-catalog/	Х		1C	3

Recommended sequence for most incoming students is Group A: CS 150B to CS 164.

³ CS 192 or other seminar course is a recommended elective for incoming, first semester, students.

Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400level).
