

MAJOR IN BIOMEDICAL SCIENCES, MICROBIOLOGY AND INFECTIOUS DISEASE CONCENTRATION

Microbiology is the study of organisms, many of which are too small to be seen with the naked eye, including fungi, protists, and bacteria, as well as acellular agents such as viruses and prions. Microbiology emerged as a distinct science in the late nineteenth century, with the discovery that microorganisms are the cause of many infectious diseases, and that they play essential roles in ecosystems (such as the microbiome) and in industrial processes. Much work in this field is directed toward the cure, control, or eradication of disease in humans and animals, as well as understanding how microbes support health and life. Genetically engineered microorganisms can also be used for the production of improved foods, new drugs and vaccines, and for removing toxic wastes and spills from the environment. Unfortunately, some microbes have received considerable attention as potential agents of bioterrorism and biowarfare, and consequently much work is being done to counter such threats.

Students completing the undergraduate Biomedical Sciences degree program with a concentration in Microbiology and Infectious Diseases acquire knowledge and laboratory skills in the structure, physiology, genetics, pathogenicity, ecology, and taxonomy of microorganisms, as well as immunological techniques. Students engage in authentic hypothesis-driven research problems in inquiry-based laboratory courses. Required courses in biological sciences, chemistry, physics, and mathematics support the major. Ample opportunities exist for undergraduates to obtain laboratory research experience and many student researchers have presented at conferences and have been awarded research grants or fellowships.

A Bachelor of Science degree in Biomedical Sciences with a concentration in Microbiology and Infectious Disease prepares graduates well for continued education in a professional or graduate degree program or for employment in the field.

Learning Outcomes

- **Core Knowledge:** Students will apply and integrate the fundamentals of chemistry, microbial biology, and biochemistry and key principles

from the following five core areas of the discipline: immunology, bacteriology, virology, microbial physiology, and microbial genetics.

- **Relevance/Impact:** Students will demonstrate an awareness of issues at the forefront of the discipline and will evaluate the important interaction between microbes and society, from their beneficial use in industrial, biotechnological, and clinical applications to their role as etiologic agents of infectious disease in humans and animals.
- **Communication Skills:** Students will assimilate factual and conceptual information and effectively communicate disciplinary knowledge to both science literate and general audiences through written or verbal presentations.
- **Laboratory Skills:** Students will demonstrate proficiency using microbiological and immunological laboratory techniques employed in clinical, industrial, and research laboratories, and will be able to explain the principles behind the procedures, employ mathematical computations, properly execute the procedures, interpret the results correctly, and analyze the results to draw a conclusion.

Potential Occupations

The curriculum, with the proper selection of departmental electives, meets the requirements for entrance into most professional programs in veterinary and human medicine, and is ideal preparation for students desiring a career as a veterinarian, physician, physician assistant, pharmacist, medical laboratory scientist, optometrist, or dentist. The degree also prepares students for graduate (PhD or MS) studies in various biological sciences, and also provides students with the knowledge and skills to go directly into a career. Career opportunities will continue to grow because microbiology is at the center of complex issues facing our world today, as well as at the forefront of fast-paced innovation and development. Employment opportunities exist in biotechnology (vaccine and therapeutics, pharmaceutical, food, beverage, and medical device industries); government public health agencies (CDC, FDA, and state and municipal health departments); and primary research institutions, such as universities.

For more information about the Microbiology & Infectious Disease concentration under the Biomedical Sciences Major, please visit the College of Veterinary Medicine and Biomedical Sciences (<https://vetmedbiosci.colostate.edu/degree-programs/undergraduate/>).

Requirements Effective Summer 2020

Freshman

| | | AUCC | Credits |
|---|---|------|---------|
| CHEM 111 | General Chemistry I (GT-SC2) | 3A | 4 |
| CHEM 112 | General Chemistry Lab I (GT-SC1) | 3A | 1 |
| CHEM 113 | General Chemistry II | | 3 |
| CHEM 114 | General Chemistry Lab II | | 1 |
| CO 150 | College Composition (GT-CO2) | 1A | 3 |
| LIFE 102 | Attributes of Living Systems (GT-SC1) | 3A | 4 |
| MIP 250 | Eukaryotic Microbiology | | 3 |
| MIP 260 | The World of Parasites | | 3 |
| VMBS 100 | Introduction to Biomedical Sciences Major | | 2 |
| Select a minimum of 3 credits from the following: | | 1B | 3-4 |
| MATH 118 | College Algebra in Context II (GT-MA1) | 1B | |

2 Major in Biomedical Sciences, Microbiology and Infectious Disease Concentration

| | | | |
|----------|--|----|---|
| MATH 124 | Logarithmic and Exponential Functions (GT-MA1) | 1B | |
| MATH 125 | Numerical Trigonometry (GT-MA1) | 1B | |
| MATH 126 | Analytic Trigonometry (GT-MA1) | 1B | |
| MATH 155 | Calculus for Biological Scientists I (GT-MA1) | 1B | |
| MATH 160 | Calculus for Physical Scientists I (GT-MA1) | 1B | |
| Elective | | | 3 |

Total Credits **30-31**

Sophomore

| | | | |
|--------------------------------------|---------------------------------|--|---|
| BC 351 | Principles of Biochemistry | | 4 |
| MIP 300 | General Microbiology | | 3 |
| MIP 302 | General Microbiology Laboratory | | 2 |
| MIP 342 | Immunology | | 4 |
| Select one group from the following: | | | 8 |

Group A

| | | | |
|---|--|--|--|
| CHEM 245 | Fundamentals of Organic Chemistry | | |
| CHEM 246 | Fundamentals of Organic Chemistry Laboratory | | |
| Concentration Elective (see list below) | | | |

Group B

| | | | |
|-----------------------|-------------------------------------|--|--|
| CHEM 341 | Modern Organic Chemistry I | | |
| CHEM 343 ¹ | Modern Organic Chemistry II | | |
| CHEM 344 | Modern Organic Chemistry Laboratory | | |

Concentration Electives

Code **Title** **Credits**

Select a minimum of 18 credits from the following not taken elsewhere in the program. CHEM 343 may count as a Concentration Elective for students who select organic chemistry Group B in the Sophomore year.

A minimum of two laboratory courses MUST be selected from the following:

| | | |
|-----------------------------|---|--|
| MIP 150 | Introduction to Research Methods | |
| MIP 335 | Food Microbiology Laboratory | |
| MIP 343 | Immunology Laboratory | |
| MIP 352 | Medical Bacteriology Laboratory | |
| MIP 425 | Virology and Cell Culture Laboratory | |
| MIP 433/ESS 433 | Microbial Ecology Laboratory | |
| MIP 462/ BSPM 462/BZ 462 | Parasitology and Vector Biology | |
| MIP 550 | Microbial and Molecular Genetics Laboratory | |

Two unique courses (for a maximum of 6 credits) may be selected from the following:

| | | |
|---------|-----------------------------|--|
| MIP 298 | Introductory Research | |
| MIP 384 | Supervised College Teaching | |
| MIP 495 | Independent Study | |
| MIP 498 | Research | |

| | | |
|----------------|--|---|
| ANEQ 460 | Meat Safety | 2 |
| BC 404 | Comprehensive Biochemistry Laboratory | 2 |
| BC 463 | Molecular Genetics | 3 |
| BMS 301 | Human Gross Anatomy | 5 |
| BMS 305 | Domestic Animal Gross Anatomy | 4 |
| BMS 325 | Cellular Neurobiology | 3 |
| BMS 401 | Laboratory Research in Biomedical Sciences | 4 |
| BMS 450 | Pharmacology | 3 |
| BSPM 302 | Applied and General Entomology | 2 |
| BZ 220 | Introduction to Evolution | 3 |
| BZ 310 | Cell Biology | 4 |
| BZ 333 | Introductory Mycology | 4 |
| BZ 346 | Population and Evolutionary Genetics | 3 |
| BZ 350 | Molecular and General Genetics | 4 |
| BZ 360 | Bioinformatics and Genomics | 3 |
| BZ 418 | Ecology of Infectious Diseases | 4 |
| BZ 577/MIP 577 | Computer Analysis in Population Genetics | 2 |
| BZ 578/MIP 578 | Genetics of Natural Populations | 4 |
| CHEM 334 | Quantitative Analysis Laboratory | 1 |
| CHEM 335 | Introduction to Analytical Chemistry | 3 |
| CHEM 343 | Modern Organic Chemistry II ¹ | 3 |
| ERHS 210 | | 2 |
| ERHS 320 | Environmental Health–Water Quality | 3 |

| | | | | | |
|-----------|---|---|-----------------|---|-----|
| ERHS 332 | Principles of Epidemiology | 3 | MIP 4000 | Capstone in Microbiology: Pathology of Infectious Disease | 2 |
| ERHS 430 | Human Disease and the Environment | 3 | MIP 400P | Capstone in Microbiology: Veterinary Microbiology | 2 |
| ERHS 502 | Fundamentals of Toxicology | 3 | MIP 400Q | Capstone in Microbiology: One Health | 2 |
| ERHS 567 | Cell and Molecular Toxicology Techniques | 3 | MIP 400R | Capstone in Microbiology: Food Microbiology | 2 |
| FTEC 360 | Brewing Processes | 4 | MIP 400S | Capstone in Microbiology: Biofilm Biology | 2 |
| FTEC 460 | Brewing Science II | 4 | MIP 401 | Laboratory Research Methods in Microbiology | 4 |
| FTEC 574 | Current Issues in Food Safety | 2 | MIP 432/ESS 432 | Microbial Ecology | 3 |
| LIFE 103 | Biology of Organisms-Animals and Plants (GT-SC1) | 4 | MIP 443 | Microbial Physiology | 4 |
| LIFE 201B | Introductory Genetics: Molecular/Immunological/Developmental (GT-SC2) | 3 | MIP 450 | Microbial Genetics | 3 |
| LIFE 203 | Introductory Genetics Laboratory | 2 | MIP 496 | Group Study | 1-3 |
| LIFE 210 | Introductory Eukaryotic Cell Biology | 3 | MIP 530 | Advanced Molecular Virology | 4 |
| LIFE 211 | Introductory Cell Biology Honors Recitation | 1 | MIP 540 | Biosafety in Research Laboratories | 2 |
| LIFE 212 | Introductory Cell Biology Laboratory | 2 | MIP 555 | Principles and Mechanisms of Disease | 3 |
| LIFE 320 | Ecology | 3 | MIP 563 | Biology of Disease Vectors | 3 |
| MATH 155 | Calculus for Biological Scientists I (GT-MA1) | 4 | MIP 570 | Functional Genomics | 3 |
| MATH 160 | Calculus for Physical Scientists I (GT-MA1) | 4 | PH 122 | General Physics II (GT-SC1) | 5 |
| MIP 192 | Microbiology First-Year Seminar | 2 | SOCR 330 | Principles of Genetics | 3 |
| MIP 275 | Microcomputing Applications in Microbiology | 2 | SOCR 455 | Soil Microbiology | 3 |
| MIP 303 | General Microbiology--Honors Recitation | 1 | SOCR 456 | Soil Microbiology Laboratory | 1 |
| MIP 315 | Pathology of Human and Animal Disease | 3 | VS 331 | Histology | 4 |
| MIP 334 | Food Microbiology | 3 | VS 333 | Domestic Animal Anatomy | 4 |
| MIP 400A | Capstone in Microbiology: Medical Microbiology | 2 | | | |
| MIP 400B | Capstone in Microbiology: Biotechnology | 2 | | | |
| MIP 400C | Capstone in Microbiology: Immunology | 2 | | | |
| MIP 400D | Capstone in Microbiology: Microbial Diversity/Ecology | 2 | | | |
| MIP 400E | Capstone in Microbiology: Microbial Genetics | 2 | | | |
| MIP 400F | Capstone in Microbiology: Virology | 2 | | | |
| MIP 400G | Capstone in Microbiology: Service Learning | 2 | | | |
| MIP 400H | Capstone in Microbiology: Prion Biology | 2 | | | |
| MIP 400I | Capstone in Microbiology: Mycobacterial Biology | 2 | | | |
| MIP 400J | Capstone in Microbiology: Big Data Sets in Microbiology | 2 | | | |
| MIP 400K | Capstone in Microbiology: Parasitology | 2 | | | |
| MIP 400L | Capstone in Microbiology: Microbiome Biology | 2 | | | |
| MIP 400M | Capstone in Microbiology: Vector Biology | 2 | | | |
| MIP 400N | Capstone in Microbiology: Environmental Sustainability & Health Science | 2 | | | |

¹ CHEM 343 may count as a Concentration Elective for students who select organic chemistry Group B in the Sophomore year.

² Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300- to 400-level).

Major Completion Map

Distinctive Requirements for Degree Program:

To Declare Major: competitive entry controls required and capped enrollment in place. Please contact Director of Student Success in the CVMBS Student Success Center for more information.

To prepare for first semester: The curriculum for the microbiology and infectious disease concentration assumes students enter college prepared to take MATH 124. Entering students who are not prepared to take MATH 124 will need to prerequisite requirements in the first semester. Those requirements are listed as benchmark courses in Freshman Semester 1 below. LIFE 102 requires high school chemistry as a prerequisite; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam).
